 longer referred to an object to be watched it had transformed into content to be streamed downloaded and shared Tens of
 millions of viewers have cut the cord abandoned cable television tuned into online services like Netflix Hulu and YouTube and
 also watch pirated movies and programmes at an unprecedented rate The idea that the Internet will devastate the television
 and film industry in the same way that it gutted the music industry no longer seems farfetched The television industry
 however remains driven by outmoded market based business models that ignore audience behaviour and preferences In Post
 TV Michael Strangelove explores the viewing habits and values of the post television generation one that finds new ways to
 exploit technology to find its entertainment for free rather than for a fee Challenging the notion that the audience is
 constrained by regulatory and industrial regimes Strangelove argues that cord cutting digital piracy increased competition
 and new modes of production and distribution are making audiences and content more difficult to control opening up the
 possibility of a freer more democratic media environment A follow up to the award winning Watching YouTube Post TV is a
