the introductory one and the one on selected advanced topics Each part consists of several chapters which present an in depth discussion of selected topics A strong connection is established between evolutionary algorithms and traditional search algorithms This connection enables us to incorporate ideas in more established fields into evolutionary algorithms The book is aimed at a wide range of readers It does not require previous exposure to the field since introductory material is included It will be of interest to anyone who is interested in adaptive optimization and learning People in computer science artificial intelligence operations research and various engineering fields will find it particularly interesting Cellular and Molecular Phytotoxicity of Heavy Metals Mohammad Faisal,Quaiser Saquib,Abdulrahman A. Alatar,Abdulaziz A.

Al-Khedhairi,2020-10-19 Plant growth and development is closely dependent on the plant environment including the wide spread presence of organic and inorganic xenobiotics and pollutants Currently heavy metals are the most common inorganic environmental pollutants and they have pronounced effects and consequences not only for plants but also for the ecosystem in which the plants form an integral component It has been suggested that these contaminants accumulate in agricultural crops thus entering the food chain and posing a significant health risk Plants growing in polluted sites exhibit altered metabolism reduced growth and decreased biomass production These pollutants adhere to plant roots and exert physical or chemical toxicity and subsequently cell death in plants Yet plants have developed various defence mechanisms to counteract the toxicity induced by heavy metals Only detailed study of the processes and mechanisms would allow researchers and students to understand the interactions responses and adaptations of plants to these pollutants however there are several unresolved issues and challenges regarding the interaction and biological effects of heavy metals Therefore this volume provides relevant state of the art findings on environmental phytotoxicity and the mechanisms of such interactions at the cellular and molecular levels This volume consists of chapters on relevant topics contributed by different experts or group of experts so as to make available a comprehensive treatise designed to provide an in depth analysis of heavy metals phytotoxicity This book may serve as a reference to scientists researchers and students in the fields of toxicology environmental toxicology phytotoxicology plant biology plant physiology plant biochemistry and plant molecular biology and especially those interested in heavy metals toxicology *An Account of Experiments to Determine the Figure of the Earth, by Means of the Pendulum Vibrating Seconds in Different Latitudes* Sir Edward Sabine,1825
