The analysis of these communities serves not only as a

comparison of online language practices but also as a close look at how globalization phenomena and international English play out in the practices of everyday life in different non English speaking countries. The author concludes that the root of the distinctive practices in the two communities studied is the disparity between their language ideologies. She argues that community participants draw on their respective national language ideologies which have developed over centuries but also reach beyond any static forms of those ideologies to negotiate contest and re evaluate them. This book will be of interest to linguists and other social scientists interested in social media youth language and the real world linguistic consequences of globalization.
