The Routledge

Companion to Literature and Trauma Colin Davis, Hanna Meretoja, 2020-05-11 Literary trauma studies is a rapidly developing field which examines how literature deals with the personal and cultural aspects of trauma and engages with such historical and current phenomena as the Holocaust and other genocides 9 11 climate catastrophe or the still unsettled legacy of colonialism. *The Routledge Companion to Literature and Trauma* is a comprehensive guide to the history and theory of trauma studies including key concepts, consideration of critical perspectives and discussion of future developments. It also explores different genres and media such as poetry, life writing, graphic narratives, photography and post apocalyptic fiction and analyses how literature engages with particular traumatic situations and events such as the Holocaust, the Occupation of France, the Rwandan genocide, Hurricane Katrina and transgenerational nuclear trauma. Forty essays from top thinkers in the field demonstrate the range and vitality of trauma studies as it has been used to further the understanding of literature and other cultural forms across the world. This book is a groundbreaking collection of essays by Latin American scholars on the theories and practices of postmodernity. It provides an important forum for Latin American

Whitewash Jan Grabowski, 2024-08-01 Poland the epicentre of the Holocaust began denying responsibility as soon as the Nazi atrocities ended The nation's distortion of history continues today with disturbing consequences Holocaust denial has now been replaced by a much more dangerous and insidious foe Jan Grabowski Poland is the place where the Holocaust was perpetrated where close to 5 out of 6 million Jews were killed Today it is the place where a new threat is unfolding the hijacking of history to transform the nation's past Whitewash grapples with modern Poland's failure to acknowledge its role in the Holocaust World renowned Holocaust historian Jan Grabowski examines how the government museums schools and state institutions have been deployed to propagate a narrative of Polish national innocence He recounts his own experience as the victim of smears and a notorious lawsuit for questioning the complicity of Poles in the destruction of the country's Jews and explores the far reaching consequences of Poland's historical distortions which have been echoed and replicated worldwide to challenge the truth of the Holocaust

The Literary Role of History in the Fiction of J. R. R. Tolkien Nicholas Birns, 2023-12-22 This volume analyzes the literary role played by history in the works of J R R Tolkien It argues that the events of The Lord of the Rings are placed against the background of an already existing history both in reality and in the fictional worlds of the books History is unfolded in various ways both in explicitly archival annals and in stories told by characters on the road or on the fly and in which different visions of history emerge In addition the history within the work can resemble or be patterned on histories in our world These histories range from the deep past of prehistoric and ancient worlds to the early medieval era of the barbarian invasions and Byzantium to the modern worlds of urbane civility and a paradoxical longing for nature and finally to great power rivalries and global prospects The book argues that Tolkien did not employ these histories indiscriminately or reductively Rather he regarded them as aspects of aesthetic and representative figuration that are above all literary While most criticism has concentrated on Tolkien's use of historical traditions of Northern Europe this book argues that Tolkien also valued Southern and Mediterranean pasts and registered the Germanic and the Scandinavian pasts as they related to other histories as much as his vision of them included a primeval mythic aura

Interpreting Violence Cassandra Falke, Victoria Fareld, Hanna Meretoja, 2023-03-30 Representations of violence surround us in everyday life in news reports films and novels inviting interpretation and raising questions about the ethics of viewing or reading about harm done to others How can we understand the processes of meaning making involved in interpreting violent events and experiences And can these acts of interpretation themselves be violent by reproducing the violence that they represent This book examines the ethics of engaging with violent stories from a broad hermeneutic perspective It offers multidisciplinary perspectives on the sense making involved in interpreting violence in its various forms

from blatant physical violence to less visible forms that may inhere in words or in the social and political order of our societies By focusing on different ways of narrating violence and on the cultural and paradigmatic forms that govern such narrations *Interpreting Violence* explores the ethical potential of literature art and philosophy to expose mechanisms of violence while also recognizing their implication in structures that contribute to or benefit from practices of violence

Epidemics and Genocide in Eastern Europe, 1890-1945 Paul Weindling, 2000-02-03 During the First World War delousing became routine for soldiers and civilians following the recent discovery that the louse carried typhus germs But how did typhus come to be viewed as a Jewish disease and what was the connection between the anti typhus measures during the First World War and the Nazi gas chambers in the Second World War In this powerful book Professor Weindling draws upon wide ranging archival research throughout East and Central Europe to the United States to provide valuable new insight into the history of German medicine from its response to the perceived threat of typhus epidemics from its Eastern borders He examines how German experts in tropical medicine took an increasingly racialised approach to bacteriology regarding supposedly racially inferior peoples as carriers of the disease So they came to view typhus as a Jewish disease By the Second World War as migrants and deportees had become conditioned to expect the ordeal of delousing at border crossings ports railway junctions and on entry to camps so sanitary policing became entwined with racialisation as the Germans sought to eradicate typhus by eradicating the perceived carriers Typhus had come to assume a new and terrifying genocidal significance as the medical authorities sealed the German frontiers against diseased undesirables from the east and gassing became a favoured means of disease eradication

Environmental Consciousness Stephen Hussey, Paul Richard Thompson, 2004 Across the globe environmental questions feature more and more in today's social and political agendas In Western countries environmental campaigns target issues at home and abroad They have a special urgency which draws in an astonishing range of field campaigners from young militants to rebel aristocrats This book examines the roots of contemporary environmental consciousness and action in terms of both popular experience and tradition The global reach of this book reflects the character of contemporary environmentalism It examines a geographically and thematically diverse range of case studies including British environmental campaigners in the Brazilian rainforest ecocriticism and literature the environmental movement in Kazakhstan and medieval church iconography The common theme linking each chapter is that environmental consciousness and activism are shaped through people's life

stories and that their memories are shaped not only through individual experience but also through myth tradition and collective memory Containing a wealth of empirical source material Environmental Consciousness will be invaluable for sociologists and historians alike It offers a cutting edge illustration of how narrative and oral history can illuminate our understanding of an uncertain present Stephen Hussey is a research associate at the School of Education at the University of Cambridge His previous publications include Childhood in Question and his next publication will be a book for the wider market entitled Headline History Paul Thompson is research professor in sociology and director of Qualidata at the University of Essex He is also founder of the National Life Story Collection at the British Library National Sound Archive and founder editor of Oral History His previous publications include The Voice of the Past The Edwardians and The Work of William Morris
