Expressing Music:

Musical Meaning and Expression Stephen Davies, 1994 We talk not only of enjoying music but of understanding it Music is often taken to have expressive import and in that sense to have meaning But what does music mean and how does it mean Stephen Davies addresses these questions in this sophisticated and knowledgeable overview of current theories in the philosophy of music Reviewing and criticizing the aesthetic positions of recent years he offers a spirited explanation of his own position Davies considers and rejects in turn the positions that music describes like language or depicts like pictures or symbolizes in a distinctive fashion emotions Similarly he resists the idea that music's expressiveness is to be explained solely as the composer's self-expression or in terms of its power to evoke a response from the audience Music's ability to describe emotions he believes is located within the music itself it presents the aural appearance of what he calls emotion characteristics The expressive power of music awakens emotions in the listener and music is valued for this power although the responses are sometimes ones of sadness Davies shows that appreciation and understanding may require more than recognition of and reaction to music's expressive character but need not depend on formal musicological training

Hearing and Writing Music Ron Gorow, 2011-03-15 A self-training manual as well as a classroom text this book is a complete step by step course to develop the musician's ability to hear and notate any style of music Personal training theory and exercises produce techniques which are combined in an integrated craft which may be applied to composition orchestration arranging improvisation and performance A kind of finishing school for those who wish to pursue a career in composing orchestrating arranging or performing The Score Society of Composers and Lyricists A myriad of practical information Comprehensive ear training important because aural skills are among the most overlooked in music education Survey of New Teaching Materials Jazz Educators journal A synthesis of the author's vast knowledge and his quest to define the question How do we hear ITG Journal A wonderfully systematic approach to ear training neatly designed and structured it just flows Direct and easily understood New books Jazz Educators Journal Bernard Brandt says *Hearing and Writing Music* by Ron Gorow is a superb book It makes a simple and elegant presentation of the internal process by which we hear sounds and music how we recognize intervals chords melody harmony counterpoint and the timbre of instrumentation orchestration how we can develop the skills of listening auditory memory and imagination and how to use these skills to hear and to write down music of any sort The hallmark of an expert is the ability to explain the basics of his field as simply as possible By that standard Mr Gorow has proven his expertise in this book I note that the other reviews both for Amazon and in musical journals tend to limit the importance of *Hearing and Writing Music* to ear training I believe that Mr Gorow's book is valuable for much more than ear training I have studied it and as a result of that study I believe that my auditory memory and imagination and my abilities in score reading have improved enormously Further I have been able to use the skills in this book to transcribe melodies harmonies and counterpoint almost effortlessly both those that I have heard and those which

existed only in my imagination This book has opened many doors for me I believe that it can do so for many others

Levitin, 2014-08-18 Two of the most important social skills in humans are the ability to determine the moods of those around us and to use this to guide our behavior To accomplish this we make use of numerous cues Among the most important are vocal cues from both speech and non speech sounds Music is also a reliable method for communicating emotion It is often present in social situations and can serve to unify a group s mood for ceremonial purposes funerals weddings or general social interactions Scientists and philosophers have speculated on the origins of music and language and the possible common bases of emotional expression through music speech and other vocalizations They have found increasing evidence of commonalities among them However the domains in which researchers investigate these topics do not always overlap or share a common language so communication between disciplines has been limited The aim of this Research Topic is to bring together research across multiple disciplines related to the production and perception of emotional cues in music speech and non verbal vocalizations This includes natural sounds produced by human and non human primates as well as synthesized sounds Research methodology includes survey behavioral and neuroimaging techniques investigating adults as well as developmental populations including those with atypical development Studies using laboratory tasks as well as studies in more naturalistic settings are included *Science and Music* Lior, 2013-02-15 The book is describing how the brain works in a musical way How people see the world through musical eyes and through musical perception Musical chords are in the basic of every brain expression in the past and in the present including scientific theories paintings movies plays books speeches conversations and so on People see space and time in terms of music they see anything in terms of music People being aware to themselves as musical creatures can improve their way of life in many aspects because through music reality becomes very accurate clear transparent aware Engaging Musical Practices Suzanne Louise Burton, 2012 Engaging Musical Practices A Sourcebook for Middle School General Music presents numerous ways to engage adolescents in active music making that is relevant to their lives so that they may be more apt to continue their involvement with music as a

Expression in the Performing Arts Inma Álvarez, Héctor J. Pérez, Francisca Pérez-Carreño, 2010-02-19 The performing arts represent a significant part of the artistic production in our culture Correspondingly the fields of drama film music opera dance and performance studies are expanding However these arts remain an underexplored territory for aesthetics and the philosophy of art Expression in the Performing Arts tries to contribute to this area The volume collects essays written by international scholars who address a variety of themes concerning the core philosophical topic of expression in the theory of the performing arts Specific questions about the ontology of art the nature of the performances the role of the performer and the relations between spectators and works emerge from the study of the performing arts Besides these arts challenge the unchanging physicality of other kinds of works of art usually the direct result of creative individual artist and barely affected by the particular

circumstances of their exhibition Expression is one of the issues that adopt a special character in the performing arts Do singers dancers or actors express the feelings a work is expressive of How does the performer contribute to the expressive content of the work How does the spectator emotionally respond to the physical proximity of the performers Is aesthetic distance avoided in the understanding of the performing arts How are the expressive properties of work performance and characters related And how are the subjectivities they embody revealed The contributions presented here are not all in agreement on the right answers to these questions but they offer a critical and exciting discussion of them In addition to original proposals on the theoretical aspect of expression in the performing arts the collection includes analyses of individual artists historical productions and concrete works of art as well as reflections on performative practice *Sharing Thoughts*

Verdejo, 2025-07-08 Philosophical work on the nature of thought has until recently focused primarily on what it is for an individual to think leaving aside important questions about the intersubjective dimension of thought For example In what sense if any can thoughts really be shared Is there a shareability requirement on successful communication disagreement or the transmission of knowledge Do particular types of thought such as those based on perception or self location raise distinctive challenges to their shareability More generally how should we understand the communication and coordination of our thoughts in exchanges with others Are there distinctive rationality constraints governing the intersubjective aspects of thought *Sharing Thoughts* brings together original work by established and emerging philosophers to address these and related foundational issues while also paying attention to more specific questions such as the interplay between the intersubjectivity of thought and the internalism externalism debate the elucidation of first person or egocentric thought our capacity for joint thinking the conditions for knowledge transmission and collective inquiry the expression of thought in music and more
