**The Reality of ESP** Russell Targ,2012-12-19 On February 4 1974 members of the Symbionese Liberation Army kidnapped nineteen year old newspaper heiress Patricia Hearst from her Berkeley California apartment Desperate to find her the police called physicist Russell Targ and Pat Price a psychic retired police commissioner As Price turned the pages of the police mug book filled with hundreds of photos suddenly he pointed to one of them and announced That s the ringleader The man was Donald DeFreeze who was indeed subsequently so identified Price also described the type and location of the kidnap car enabling the police to find it within minutes That remarkable event is one reason Targ believes in ESP Another occurred when his group made 120 000 by forecasting for nine weeks in a row the changes in the silver commodity futures market As a scientist Targ demands proof His experience is based on two decades of investigations at the Stanford Research Institute SRI which he cofounded with physicist Harold Puthoff in 1972 This twenty million dollar program launched during the Cold War was supported by the CIA NASA the Defense Intelligence Agency and Army and Air Force Intelligence The experiments they conducted routinely presented results could have happened by chance less than once in a million Targ describes four types of experiments Remote Viewing in which a person describes places and events independent of space and time For example while in California Price drew to scale a Soviet weapons factory at Semipalitinsk with great accuracy later confirmed by Satellite photography In another remote viewing Targ accurately sketched an airport in San Andreas Columbia himself Distant Mental Influence where the thoughts of the experimenter can positively or negatively affect the physiology heart rate skin resistance etc of a distant

person Whole field isolation where someone in a state of sensory isolation accurately describes the visual experiences of someone else in another place Precognition and retrocausality showing that the future can affect the past That is the elephant you see on television in the morning can be the cause of your having dreamed about elephants the previous night Final chapters present evidence for survival after death explain how ESP works based on the Buddhist Hindu view of our selves as nonlocal eternal awareness discuss the ethics of exercising psychic abilities and show us how to explore ESP ourselves I am convinced Targ says that most people can learn to move from their ordinary mind to one not obstructed by conventional barriers of space and time Who would not want to try that     *A Most Unusual Life* Kirsten Van Gelder, Frank Chesley, 2015-01-01 An intimate look inside the life of an influential pioneer of alternative healing Born on a sugar plantation in Java at the turn of the twentieth century psychic alternative healer and writer Dora van Gelder Kunz was to become one of the most unique and unforgettable women of her age This biography traces her life from her signs of clairvoyant ability in early childhood through her pioneering development with Delores Krieger of Therapeutic Touch her presidency of the Theosophical Society in America and finally her death at ninety five Among her several seminal books in the genre of modern esoteric literature are *The Real World of Fairies* *The Personal Aura* and *Spiritual Healing* Those who knew Dora were captivated by her blunt honesty tremendous perception deep compassion and infinite capacity for hilarity As this book lovingly chronicles hers was indeed a most unusual life     **Taking into Account the Extraordinary** Ronald D. Cowen, 2016-02-04 Extraordinary science according to Thomas Kuhn is about the unexpected in science While it eventually generates a new paradigm it often starts out with an unexplained fact The problem for the scientific community is how to deal with unexpected facts in a truly scientific manner Sometimes we have to wait for a genius to come along and fix the problem This book is about an extraordinary fact established by Stephen Phillips about a correlation between known facts about the elements of the periodic table and the clairvoyant observations made by Annie Besant and Charles Leadbeater who claimed to be able to see atoms You are not asked to believe this seemingly bizarre fact No Instead you are asked consider how the scientific community should deal with it Obviously the correlation should be examined to see if it is reasonable You can do that by reading Phillips book But what if the correlation turns out to be reasonable What then Do we take a what if it is true approach and look for more evidence that it is valid or invalid Do we look at the paradigm suggested by Phillips You decide and post your answer on my blog if you wish     **The Path of Love** Ronald D. Cowen, 2015-02-06 The Buddha was a scientist Instead of using a microscope or a particle accelerator the Buddha used ESP He had several psychic powers that allowed him to perceive in detail the psychology of karma the evolution of consciousness and subatomic particles He discovered love and self love to be organizing principles that evolved early in the history of intelligent consciousness especially with regard to feelings and emotions Every person has the deepest need to love and be loved He solved the mind body problem by perceiving the physical basis of intelligent consciousness These psychic powers are acknowledged in Hindu

and Buddhist scriptures but extremely few people have them This book is essentially a meditation report written by someone who has them While this sounds like an invitation to return this book to the shelf in a bookstore it also documents in depth another report by a physicist Stephen Phillips who relates in comprehensive detail the relationship between modern superstring theory and extrasensory observation of the elements of the periodic table by Annie Besant and Charles Leadbeater of the Theosophical Society This strong connection between modern physics and psychic powers of the Buddha is a real challenge to both the modern scientist and the modern Buddhist

**The Future of the Body** Michael Murphy,1993-04-21 In the oral and written histories of every culture there are countless records of men and women who have displayed extraordinary physical mental and spiritual capacities In modern times those records have been supplemented by scientific studies of exceptional functioning Are the limits of human growth fixed Are extraordinary abilities latent within everyone Is there evidence that humanity has unrealized capacities for self transcendence Are there specific practices through which ordinary people can develop these abilities Michael Murphy has studied these questions for over thirty years In The Future of the Body he presents evidence for metanormal perception cognition movement vitality and spiritual development from more than 3 000 sources Surveying ancient and modern records in medical science sports anthropology the arts psychical research comparative religious studies and dozens of other disciplines Murphy has created an encyclopedia of exceptional functioning of body mind and spirit He paints a broad and convincing picture of the possibilities of further evolutionary development of human attributes By studying metanormal abilities under a wide range of conditions Murphy suggests that we can identify those activities that typically evoke these capacities and assemble them into a coherent program of transformative practice A few of Murphy s central observations and proposal include The observation that cultural conditioning powerfully shapes or extinguishes metanormal capacities The proposition that we cannot comprehend our potentials for extraordinary life without an empirical approach that involves many fields of inquiry and different kinds of knowing The notion that a widespread realization of extraordinary capacities would constitute an evolutionary transcendence analogous to the rise of humankind from its primal ancestry The proposal that all or most instances of significant human development are produced by a limited number of identifiable activities such as disciplined self observation visualization of desired capacities and caring for others The idea that a balanced development of our various capacities is possible through integrated practices In The Future Of The

Body Murphy states that such practices can carry forward Earth's evolutionary adventure and lead humanity to the next step in its development

**The New Science of Consciousness Survival and the Metaparadigm Shift to a Conscious Universe** Dr. Alan Ross Hugenot, 2016-06-30 Alan Hugenot lectures on the Leading Edge Science of the Afterlife he concluded that the entire universe is conscious and that this explains both near death experiences and certain paradoxes of quantum theory As someone with a physics degree I know that Hugenot's basic idea of a conscious universe is neither crazy nor new Erwin Schrödinger one of the fathers of quantum physics was an avid student of Hindu philosophy and believed something similar Gideon Lichfield April 2015 Atlantic Monthly The existence of a hidden field Bohm's implicate order of non physical consciousness occupying as yet undiscerned additional dimensions which are outside the visible reality Bohm's explicate order as defined by 3 D plus time has now been proven scientifically by the following collated data Recent repeated replication of John Bell's theory of non locality Studies of the Near Death experience and After death communications demonstrated in triple blind laboratory experiments testing evidential mediumship This hidden field implicate order of non physical consciousness also provides the matrix upon which the explicate order of observed reality is continually manifested Alan Hugenot Our challenge is to discover through careful science how we can interface with this matrix of consciousness Viewing psi phenomena as belonging to aspects of reality about which we as yet simply know very little is the only honest way for any scientist to proceed Healthy scientific skepticism must be open to new discoveries and so allow open examination of the scientific data developed by rigorous para normal research Honest open minded inquiry will bring both new discoveries of truth and new laws of physics beyond the limits of the Newtonian paradigm Alan Hugenot
