F4 Phantom:

USAF McDonnell Douglas F-4 Phantom II Peter E. Davies, 2013-04-20 A definitive technical guide to the USAF and foreign variants of the McDonnell Douglas F4 Phantom In many respects the most successful versatile and widely used combat aircraft of the post war era the F 4 Phantom II was quickly adopted by the USAF after its spectacular US Navy introduction Its introduction to USAF squadrons happened just in time for the Vietnam conflict where USAF F 4Cs took over MiG fighting duties from the F 100 Super Sabre Although the F 4 was never intended as a dog fighter to tangle with light nimble gun armed MiGs it was responsible for destroying 109 MiGs in aerial combat At the end of their careers many of the survivors from the 3 380 land based Phantoms were converted into target drones for training purposes New aircraft were also built for West Germany Iran and Israel As Peter Davies outlines in this illustrated history the USAF s experience with the Phantom showed clearly that the air to air fighter was still a necessity Its decision to fund its successor the McDonnell Douglas F 15 Eagle as well as the F 16 Fighting Falcon and F 22A Raptor was heavily influenced by the lessons of US and other Phantom pilots in combat *F-4 Phantom II Society*, 2001

The Economics of Made-to-Order Production Thomas R. Gullledge,Norman K. Womer,2012-12-06 The airframe industry is usually recognized as being different from most manufacturing industries These differences which are characterized by the number of units produced and the frequency of design changes have been evident for many years This uniqueness and the corresponding implications for cost estimation became particularly evident during World War II The aircraft industry generally has been considered unique in that it differs from other manufacturing in the quantity of units manufactured and with the frequency with which changes are made during the course of manufacturing operations In mass production industries manufacturing thousands or hundreds of thousands of identical units methods and cost of production tend to remain fairly constant after production has been stabilized whereas in the aircraft industry method improvements are constantly being made and cost is a variable depending on the number of airplanes being manufactured Berghell 1944 These differences coupled with political considerations place unusual demands on cost modelers This has been particularly true in recent years where large cost overruns have generated Congressional demands for better cost estimates Traditionally cost estimators in the airframe industry have used one or more of the following estimating techniques 1 industrial engineering time standards 2 parametric cost estimating models 3 learning curves All of the methods have been used with mixed results

in specific situations The general emphasis of all three approaches is cost estimation for planning purposes prior to beginning production although some of the techniques may be used during the production phase of a program **Naval Air Station JRB Ft Worth Carswell Field History in Photos** Ken Hankins, 2009-12-29 This book has over 100 unique and never before seen black and white photos of NAS Ft Worth Joint Reserve Base formally Carswell Air Force Base All known information about each picture is listed These photos came from Federal and State archives as well as personnel collections A page detailed timeline covering the 70 year history is located in the back of the book A great book for a Military buff or anyone who was stationed or worked at the Ft Worth base Own a great piece of History
