## **In Search Of An East Asian Development Model:**

**In Search of an East Asian Development Model** Peter L. Berger, Hsiao Hsin-Huang Michael, 2024-11-01 The papers collected in this volume were presented at a conference sponsored by the Carnegie Council on Ethics and International Affairs formerly the Council on Religion and International Affairs The conference In Search of an East Asian Development Model was held at the Carnegie Council's headquarters in New York in June 1985 The purpose was to discover if there is any such thing as an East Asian development model Was it rooted in common cultural characteristics which arose only in Asia and therefore had no relevance elsewhere or did the cultural and social characteristics thus revealed have transcendent features applicable at all times and in all places Was the recognition of general Asian economic success a post facto situation an attempt at later rationalizations to fit a logic and inevitability into a process that essentially lurched along without any particular direction

**In Search of East Asian Development** Peter L. Berger, Hsin Huang Michael Hsiao, The relevance of East Asian development experience to the less developed world crucially depends on whether an identifiable economic model underlies largely explains the unquestionable economic success of the five nations of East Asia Japan Korea Taiwan Hong Kong Singapore which are the subject of extensive analysis in this volume If there is a model is it transferable There are two schools of thought on this question Some believe that the explanation for East Asian economic success lies largely in the cultural realm in values institutional structures social relations Others maintain that economic success can largely be explained by the economic strategy these countries have adopted

*East Asian Development Model* Shiping Hua, Ruihua Hu, 2014-12-17 Given the impressive growth in East Asia after World War II initially led by Japan the region's development models have been scrutinized since the 1980s The shared Confucian cultural heritage strong government guidance and export led economies were often cited as contributors to the impressive growth However major changes have taken place in Asia on and around the turn of the century Japan experienced two decades of economic slow down while World Bank figures reveal that China is poised to become the largest economy in the world in 2014 overtaking the United States Bearing this in mind is it even possible to formulate an East Asian development model in the context of a shifting twenty first century And if so what is it This book addresses this issue by looking at the economic political and cultural perspectives of China Japan and South Korea focusing on dynamism and potential consensus regarding an East Asian development model The chapters offer a historical background to the East Asian development model as well as in depth case studies of each of the countries concerned to show that whilst the East Asian development model does have distinct characteristics as compared with other areas and other countries may draw some insights from the East Asian experience it is not a panacea that fits all circumstances and fits all times This book will be welcomed by students and scholars of Asian economics Asian politics international political economy and development studies

*East Asian Development Model* Shiping Hua, Ruihua Hu, 2014-12-17 Given the impressive growth in East Asia after World War II initially led by Japan the region's development

models have been scrutinized since the 1980s. The shared Confucian cultural heritage, strong government guidance and export led economies were often cited as contributors to the impressive growth. However, major changes have taken place in Asia on and around the turn of the century. Japan experienced two decades of economic slow down while World Bank figures reveal that China is poised to become the largest economy in the world in 2014 overtaking the United States. Bearing this in mind, is it even possible to formulate an East Asian development model in the context of a shifting twenty first century? And if so, what is it? This book addresses this issue by looking at the economic, political and cultural perspectives of China, Japan and South Korea, focusing on dynamism and potential consensus regarding an East Asian development model. The chapters offer a historical background to the East Asian development model as well as in depth case studies of each of the countries concerned to show that whilst the East Asian development model does have distinct characteristics as compared with other areas, and other countries may draw some insights from the East Asian experience, it is not a panacea that fits all circumstances and fits all times. This book will be welcomed by students and scholars of Asian economics, Asian politics, international political economy and development studies.

**The East Asian Development Experience** Ha-Joon Chang, 2006. East Asia's development experience at least until its crisis in 1997 has been a source of hope for other countries in the South. And in modern economic theory it has been at the centre of the debate about how the role of the state relates to processes of intentional economic progress.

*The East Asian Development Model* P. Banerjee, Frank-Jürgen Richter, 2000-06-21. At the turn of the millennium there is much discussion about the failure of East Asian capitalism. The East Asian development model which built the institutional framework of growth in the region is blamed along with what once was called the Asian miracle. Along with experts with in depth knowledge of East Asian economies, Frank J. Richter presents a book that analyzes the East Asian development model. The contributors identify the causes and consequences of the Asian economic crisis, describe the features of economic development throughout the region and discuss the strategic responses of Asian firms to newly emerging economic environments. The East Asian Development Model is an essential resource for managers, academics and politicians.

**Foundations of Entrepreneurship and Economic Development** David A. Harper, 2003-03-13. This well written book is the first to deal with entrepreneurship in all its aspects. It considers the economic, psychological, political, legal and cultural dimensions of entrepreneurship from a market process perspective. David A. Harper has produced a volume that analyses why some people are quicker than others in discovering profit opportunities.

**Korea's Economic Miracle** Robert Castley, 2016-07-27. Very few developing countries have successfully industrialised. Many are under pressure from international organisations to achieve self sustainable industrialisation. This is why Korea's case is particularly interesting. There have been many attempts to explain the causes of Korea's economic miracle. These have focused mainly on the internal factors such as the discipline of the Korean workforce and export promotion policies. The present study however shows that these factors contributed to Korea's impressive growth but do not explain the reasons for

her success External factors have been more important the Japanese economy in particular This book examines therefore in detail the impact of Japan s economic growth on the Korean economy in particular the stimulating effects of trade sub contracting relocation of industry investment loans and technology transfer It demonstrates how Japan provided a range of goods services and capitals which were precisely what the newly industrialising country needed *East Asian Dynamism* Steve Chan,2019-03-08 East Asian Dynamism continues to offer a succinct account of Pacific regional political economy from the dawn of the modern world system to projections of alternative futures Steve Chan is a master at demystifying the geography history and culture of the region while bringing to life the current policy choices and dilemmas facing its people

**Culture and Privilege in Capitalist Asia** Michael Pinches,2005-06-23 Culture and Privilege in Capitalist Asia shows that the cultural reconfiguration of domestic and international relations around Asias new rich has often been characterised by tension and division Financial Reporting In The Pacific Asia Region Ronald Ma,1997-10-13 There is a dearth of good books on accounting in China East Asia and Southeast Asia This book makes a valuable contribution towards filling the gap The chapters in Part I of the book deal with the cultural influence and economic significance of East and Southeast Asia and the interrelationships between these matters and accounting in Pacific Asia Part II comprises chapters on accounting in individual countries comprising China Japan Korea Taiwan and Southeast Asia written by academics who work and research in these countries In particular the authors focus on the extent of the harmonisation of domestic standards with international accounting standards and on the development of the accounting profession Part III deals with the problems of and prospects for accounting harmonisation in the region **East Asian Business Systems in Evolutionary Perspective** Fu-Lai Tony Yu,2003 Economic studies on East Asia economies in general and Chinese economies are not lacking However most studies hitherto adopt the conventional neo classical economic approach In particular the Cobb Douglas production function and or theory of comparative advantage are often applied to explain economic growth of an Asian economy In international business Dunning s eclectic theory is also widely adopted to understand the pattern of foreign direct investments in East Asian economies Yet it is generally agreed that the mainstream neo classical approach has severe drawbacks and limitations In particular it does not consider the role of knowledge and uncertainty Entrepreneurship which is the true engine of growth is largely missing in neo classical economics This book uses the evolutionary approach to analyse economic and business activities in East Asian economies Specifically the book focuses on knowledge and coordination problems and examines the role of entrepreneurship in economic affairs *Exporting the American Gospel* Steve Brouwer,Paul Gifford,Susan D. Rose,2013-12-16 As the pressures of globalization are crushing local traditions millions of uprooted people are buying into a new American salvation product This fundamentalist Christianity a fusion of American popular religion and politics is one of the most significant cultural influences exported from the United States With illuminating case studies based on extensive field research Exporting the American Gospel demonstrates how Christian fundamentalism has taken hold in many nations in
