In Search Of New Public Domain:

In Search of New Public Domain Maarten A. Hajer,Arnold Reijndorp,2001 In search of new public domain is a report of an intensive quest to establish the preconditions for the design of new public spaces On the basis of an analysis of the cultural geography of the network city the authors develop a new perspective of cultural exchange as a typical urban quality They are critical of the laments about the decline of the city and public space as much as of a naive faith in architecture and urbanism as saving graces A critical investigation of the new collective spaces that are popping up across the whole of the urban field offers an insight into the factors that facilitate the development of new public domain Through their clarification of the theoretical background and analysis of topical issues such as public safety and social segregation the authors offer insights and instruments for policy makers and designers who are confronted with the new task of the design of public domain in the network city

Malland,2019-01-04 This volume was first published by Inter Disciplinary Press in 2016 Concerns about the human body and soul and their relationship to the world around us are as old as Western Culture itself Beyond philosophy and theology these sorts of preoccupations have also marked the arts literature and poetry and to be sure they have influenced Western culture and have marked westerners imaginations and our everyday understanding of human nature This book considers various ways in which the body is and has been addressed and depicted over time and it is also a reflection on the ways in which the very spaces that we design and inhabit likewise reflect perceived ideas and misconceptions about the human body

In the rapidly expanding public space debate of the past few years a recurring theme is the loss of publicness of contemporary urban public places This book takes up the challenge to find an objective way to prove or disprove this phenomenon By taking the reader through a systematic and multi disciplinary literature review it asks the deceptively simple question What is publicness It answers this by first developing a new theoretical approach The dual nature of public space and secondly a new analytical tool for measuring it The Star Model of Publicness This pragmatic approach to analysing public space is tested then on three new public places recently created on the post industrial waterfront of the River Clyde in the city of Glasgow UK By seeing where and why certain public places fail direct and informed interventions can be made to improve them and through this contribute to the building of more attractive and sustainable cities By adopting a multi disciplinary approach to shed light on this slippery concept this book shows how urban design can complement other disciplines when tackling the complex task of understanding and improving the built environment s public realm It also bridges the gap between theory and practice as it draws from empirical research to suggest more quantitative approaches towards auditing and improving public places *Cities as Multiple Landscapes* Christina Antenhofer, Günter Bischof, Robert L. Dupont, Ulrich Leitner, 2016-10-13

Cities are composed of a combination of urban and rural spaces buildings and boundaries and human bodies engaged in political social and cultural discourses Together these combine to create what the contributors to this volume call multiple landscapes Developing a new theoretical conceptualization of cities this book unites American and European approaches to comparative urban studies by investigating the concept of multiple landscapes in two sister cities New Orleans and Innsbruck As the essays reveal both New Orleans and Innsbruck have long been centers of multicultural exchange have strong senses of historical heritage and profit from the
