Kasperson, Paul Slovic, 2003-07-10 This volume edited by three of the world s leading analysts of risk and its communication brings together contributions from a group of international experts working in the field of risk perception and risk communication Key conceptual issues are discussed as well as a range of recent case studies spanning BSE and food safety AIDS HIV nuclear power child protection Y2K electromagnetic fields and waste incineration that take forward the state of the art in risk amplification theory The volume also draws attention to lessons for public policy risk management and risk communication practice **Risk Governance** Ortwin Renn, 2017-12-04 Risk Governance is a tour de force Every risk manager every risk analyst every risk researcher must read this book it is the demarcation point for all further advances in risk policy and risk research Renn provides authoritative guidance on how to manage risks based on a definitive synthesis of the research literature The skill with which he builds practical recommendations from solid science is unprecedented Thomas Dietz Director Environmental Science and Policy Program Michigan State University USA A masterpiece of new knowledge and wisdom with illustrative examples of tested applications to realworld cases The book is recommendable also to interested students in different disciplines as a timely textbook on risk beyond risk Norio Okada Full Professor and Director at the Disaster Prevention Research Institute DPRI Kyoto University Japan There are classic environmental works such as The Tragedy of the Commons by Hardin Risk Society by Beck The Theory of Communicative Action by Habermas and the seminal volumes by Ostrom on governing the commons Renns book fits right into this series of important milestones of environmental studies Jochen Jaeger Professor at Concordia University Montreal Canada Risk

Governance provides a valuable survey of the whole field of risk and demonstrates how scientific economic political and civil society actors can participate in inclusive risk governance Jobst Conrad Senior Scientist Social Science Research Center Berlin Germany Renn offers a remarkably fair minded and systematic approach to bringing together the diverse fields that have something to say about risk Risk Governance moves us along the path from the noisy formative stage of thinking about risk to one with a stronger empirical theoretical and analytical foundation Baruch Fischhoff PhD Howard Heinz University Professor Carnegie Mellon University Pittsburgh USA I cannot describe how impressed I am at the breadth and coherence of Renn s career s work Written with remarkable clarity and minimal technical jargon this should be required reading in risk courses John Graham former director of the Harvard Risk Center and former deputy director of the Office of Budget and Management of the United States Administration This book for the first time brings together and updates the groundbreaking work of renowned risk theorist and researcher Ortwin Renn integrating the major disciplinary concepts of risk in the social engineering and natural sciences The book opens with the context of risk handling before flowing through the core topics of assessment evaluation perception management and communication culminating in a look at the transition from risk management to risk governance and a glimpse at a new understanding of risk in post modern societies

Encyclopedia of Environmental Health ,2008-09-01 Environmental health has evolved over time into a complex multidisciplinary field Many of the key determinants and solutions to environmental health problems lie outside the direct realm of health and are strongly dependent on environmental changes water and sanitation industrial development education employment trade tourism agriculture urbanization energy housing and national security Environmental risks vulnerability and variability manifest themselves in different ways and at different time scales While there are shared global and transnational problems each community country or region faces its own unique environmental health problems the solution of which depends on circumstances surrounding the resources customs institutions values and environmental vulnerability This work contains critical reviews and assessments of environmental health practices and research that have worked in places and thus can guide programs and economic development in other countries or regions The Encyclopedia of Environmental Health Five Volume Set seeks to conceptualize the subject more clearly to describe the best available scientific methods that can be used in characterizing and managing environmental health risks to extend the field of environmental health through new theoretical perspectives and heightened appreciation of social economic and political contexts and to encourage a richer analysis in the field through examples of diverse experiences in dealing with the health environment interface The Encyclopedia of Environmental Health contains numerous examples of policy options and environmental health practices that have worked and thus can guide programs in other countries or regions It includes a wide range of tools and strategies that can assist communities and countries in assessing environmental health conditions monitoring progress of intervention implementation and evaluating outcomes Provides a comprehensive overview of existing knowledge in this emerging field

Articles contain summaries and assessments of environmental health practices and research providing a framework for further research Places environmental health in the broader context of environmental change and related ecological political economic social and cultural issues

The Doom Loop in the Financial Sector William Leiss, 2011-02-01 In the past two years the world has experienced how unsound economic practices can disrupt global economic and social order Today's volatile global financial situation highlights the importance of managing risk and the consequences of poor decision making The Doom Loop in the Financial Sector reveals an underlying paradox of risk management the better we become at assessing risks the more we feel comfortable taking them Using the current financial crisis as a case study renowned risk expert William Leiss engages with the new concept of black hole risk risk so great that estimating the potential downsides is impossible His risk centred analysis of the lead up to the crisis reveals the practices that brought it about and how it became common practice to use limited risk assessments as a justification to gamble huge sums of money on unsound economic policies In order to limit future catastrophes Leiss recommends international cooperation to manage black hole risks He believes that failing this humanity could be susceptible to a dangerous nexus of global disasters that would threaten human civilization as we know it

First World Petro-Politics Laurie Adkin, 2016-08-04 First World Petro Politics examines the vital yet understudied case of a first world petro state facing related social ecological and economic crises in the context of recent critical work on fossil capitalism A wide ranging and richly documented study of Alberta's political ecology the relationship between the province's political and economic institutions and its natural environment the volume tackles questions about the nature of the political regime how it has governed and where its primary fractures have emerged Its authors examine Alberta's neo liberal environmental regulation institutional adaptation to petro state imperatives social movement organizing Indigenous responses to extractive development media framing of issues and corporate strategies to secure social license to operate Importantly they also discuss policy alternatives for political democratization and for a transition to a low carbon economy The volume's conclusions offer a critical examination of petro state theory arguing for a comparative and contextual approach to understanding the relationships between dependence on carbon extraction and the nature of political regimes

Deliberative Democracy for the Future Genevieve Fuji Johnson, 2008-06-13 In today s world public policies are increasingly associated with social and environmental risk and scientific uncertainty Given such potential impacts on the moral freedom and equality for existing and future generations policies should reflect decision making standards beyond those of economic efficiency and technical safety They should reflect the imperatives of social justice and democratic legitimacy now and into the future *Deliberative Democracy for the Future* identifies an approach to ethical policy analysis that promises to serve the ends of justice and legitimacy in areas of public policy such as hazardous waste management energy generation and regulation climate change control and genomics research and commercialization Based on a wide reading of ethical approaches to policy analysis found in contemporary political theory moral philosophy and public policy literatures it evaluates these three central approaches to ethical policy analysis in light of moral dilemmas arising in a particularly timely case Canadian nuclear waste management policy The volume s central argument is that the most desirable approach to ethical policy analysis contains the philosophical tools necessary to address problems of understanding risk and safety identifying obligations to both existing and future generations and conceptualizing legitimacy conferring decision making processes Genevieve Fuji Johnson argues that neither welfare utilitarianism nor modern deontology is sufficiently equipped for these tasks She proposes that only deliberative democracy contains convincing conceptions of the good justice and legitimacy that provide for the justifiable resolution of debates about the moral foundations of public policy Responding to challenges in nuclear waste management in ways more comprehensive and more tenable than both utilitarianism and deontology deliberative policy analysis promises to be an effective approach to other cases associated with

risk uncertainty and futurity *Making and Moving Knowledge* John Sutton Lutz, Barbara Neis, 2008 It has long been acknowledged that research does not directly translate into knowledge nor does knowledge necessarily or even often translate into wisdom Whether the immediate challenge is global warming epidemic disease poverty environmental degradation or social fragmentation our research efforts are all wasted if we cannot devise processes to create and transfer knowledge to policy makers interested groups and ordinary people in a manner that is efficient and understandable How we maximize the impact of the research that scholars do and how to combine that with knowledge already extant in lay or local communities are key issues in a world with scarce research resources and numerous social and scientific conflicts *Making and Moving Knowledge* focuses directly on how knowledge is created transferred and used and perhaps most important how it is blocked and atrophies It treats knowledge generated by universities and governments alongside traditional and practical knowledge generated in coastal aboriginal and non aboriginal communities and looks at how the different kinds flow in different directions The chapters are theoretical methodological and applied as the authors model their commitment to knowledge transfer in their work with community academics and policy makers *Innovation and Its Enemies* Calestous Juma, 2016-06-06 It is a curious situation that technologies we now take for granted have when first introduced so often stoked public controversy and concern for public welfare At the root of this tension is the perception that the benefits of new technologies will accrue only to small sections of society while the risks will be more widely distributed Drawing from nearly 600 years of technology history Calestous Juma identifies the tension between the need for innovation and the pressure to maintain continuity social order and stability as one of today's biggest policy challenges He reveals the extent to which modern technological controversies grow out of distrust in public and private institutions and shows how new technologies emerge take root and create new institutional ecologies that favor their establishment in the marketplace *Innovation and Its Enemies* calls upon public leaders to work with scientists engineers and entrepreneurs to manage technological change and expand public engagement on scientific and technological matters *The Governance of Knowledge* Nico Stehr, 2017-07-05 Social surveillance and regulation of knowledge will be one of the most important issues in the near future one that will give rise to unending controversy In *The Governance of Knowledge* Nico Stehr predicts that such concerns will create a new political field namely knowledge policy which will entail regulating dissemination of the anticipated results of rapidly increasing knowledge The number and range of institutionalized standards for monitoring new knowledge has hitherto been relatively small Only in cases of technological applications has social control in the form of political regulation so far intervened All modern societies today have complex regulations and extensive concerns with the registration licensing testing and monitoring of pharmaceutical products The increasingly important and extensive area of intellectual property legislation and administration is an example of social control in which certain measures selectively determine the use of scientific finds and technical knowledge *The Governance of Knowledge* assembles a range of essays that attempt to explore

the new field of knowledge politics for the first time It is divided into four parts The Emergence of Knowledge Politics Origins Context and Consequences Major Social Institutions and Knowledge Politics Case Studies on the Governance of Knowledge and Issues in Knowledge Politics as a New Political Field Individual chapters concern the emergence of knowledge policy the embeddedness of such regulations in major social institutions and offer case studies of the governance of knowledge and discuss controversial issues that are bound to accompany efforts to regulate new knowledge Professionals and graduate students in the fields of sociology political science social science and law including policymakers and natural scientists will find this book extremely informative

Unnatural Law David R. Boyd, 2011-11-01 While governments assert that Canada is a world leader in sustainability Unnatural Law provides extensive evidence to refute this claim A comprehensive assessment of the strengths and weaknesses of Canadian environmental law the book provides a balanced critical examination of Canada's record focusing on laws and policies intended to protect water air land and biodiversity Three decades of environmental laws have produced progress in a number of important areas such as ozone depletion protected areas and some kinds of air and water pollution However Canada's overall record remains poor In this vital and timely study David Boyd explores the reasons why some laws and policies foster progress while others fail He ultimately concludes that the root cause of environmental degradation in industrialized nations is excessive consumption of resources Unnatural Law outlines the innovative changes in laws and policies that Canada must implement in order to respond to the ecological imperative of living within the Earth's limits The struggle for a sustainable future is one of the most daunting challenges facing humanity in the 21st century Everyone academics lawyers students policy makers and concerned citizens interested in the health of the Canadian and global environments will find Unnatural Law an invaluable source of information and insight For more information on Unnatural Law visit David Boyd's site www.unnaturallaw.com

Trade, Health and the Environment Marjolein van Asselt, Michelle Everson, Ellen Vos, 2013-10-30 The trade conflicts that the EU has faced within the EU or WTO context demonstrate that the question of how to balance trade and other societal values in situations of uncertainty has not been solved by the regulatory model evolved by the EU in the aftermath of the BSE crisis one which privileges processes of depoliticisation and scientification This book addresses the current key dilemmas around science law and the regulation of trade both on a regime level and in the context of particular industrial sectors e.g. pharmaceuticals climate change and nanotechnology It will present possible future research avenues by looking at both theory and practice and learning from various disciplines law and social sciences legal realities WTO USA and EU and actors regulators stakeholders courts

Improving Disaster Resilience and Mitigation - IT Means and Tools Horia-Nicolai Teodorescu, Alan Kirschenbaum, Svetlana Cojocaru, Claude Bruderlein, 2014-09-08 The focus of this volume is comprised of the fundamentals models and information technologies IT methods and tools for disaster prediction and mitigation A more detailed list of topics includes mathematical and computational modeling of processes leading to or producing disasters modeling of disaster

effects IT means for disaster mitigation including data mining tools knowledge based and expert systems for use in disaster circumstances GIS based systems for disaster prevention and mitigation and equipment for disaster prone areas A specific type or class of disasters natural or human made however will not be part of the main focus of this work Instead this book was conceived to offer a comprehensive integrative view on disasters seeking to determine what various disasters have in common Because disaster resilience and mitigation involve humans societies and cultures not only technologies and economic models special attention was paid in this volume to gain a comprehensive view on these issues as a foundation of the IT tool design

SARS Unmasked Michael G. Tyshenko, Cathy Paterson, 2010-03-19 Will SARS or another pandemic influenza reoccur and if it does have we learned how to manage pandemics more effectively In SARS Unmasked risk communication expert Michael Tyshenko offers answers to this and other questions Cathy Paterson who worked as a nurse clinician during the Toronto SARS crisis adds an important view from the frontlines Their analysis reveals an out of control situation with mixed risk communication messages a lack of leadership and an overwhelmed health care system that was unable to both cope with the crisis in Toronto and provide adequate support for their most valuable employees at the time health care workers
