*Narrative and Freedom* Gary Saul Morson, 1994-01-01 In this important and controversial book one of our leading literary theorists presents a major philosophical statement about the meaning of literature and the shape of literary texts Drawing on works by the Russian writers Dostoevsky Tolstoy and Chekhov by other writers as diverse as Sophocles Cervantes and George Eliot by thinkers as varied as William James Mikhail Bakhtin and Stephen Jay Gould and from philosophy the Bible television and much more Gary Saul Morson examines the relation of time to narrative form and to an ethical dimension of the literary experience Morson asserts that the way we think about the world and narrate events is often in contradiction to the truly eventful and open nature of daily life Literature history and the sciences frequently present experience as if contingency chance and the possibility of diverse futures were all illusory As a result people draw conclusions or accept ideologies without sufficiently examining their consequences or alternatives However says Morson there is another way to read and construct texts He explains that most narratives are developed through foreshadowing and backshadowing foreshadowing ascribed after the fact which tend to reduce the multiplicity of possibilities in each moment But other literary

works try to convey temporal openness through a device he calls sideshadowing Sideshadowing suggests that to understand an event is to grasp what else might have happened Time is not a line but a shifting set of fields of possibility Morson argues that this view of time and narrative encourages intellectual pluralism helps to liberate us from the false certainties of dogmatism creates a healthy skepticism of present orthodoxies and makes us aware that there are moral choices available to us

Nigro Sansonese, 1994 Long ago the ancestors of the Greeks Romans and Hindus were one people living on the Eurasian steppes At the core of their religion was the shamanic trance a natural state but one in which consciousness achieves a profound level of inner awareness Over the course of millennia the Indo Europeans divided and migrated into Europe and the Indian subcontinent The knowledge of shamanic trance retreated from everyday awareness and was carried on in the form of myths and distilled into spiritual practices most notably in the Indian tradition of yoga J Nigro Sansonese compares the myths of Greece as well as those of the Judeo Christian tradition with the yogic practices of India and concludes that myths are esoteric descriptions of what occurs within the human body especially the human nervous system during trance In this light the myths provide a detailed map of the shamanic state of consciousness that is our natural heritage This book carries on from the works of Carl Jung and Joseph Campbell to show how the portrayal of consciousness embodied in myth can be extended to a reappraisal of the laws of physics before they are descriptions of the world these laws like myths are descriptions of the human nervous system
