Threads of Empire Dorothy Armstrong, 2025-06-17 Carpet specialist Dorothy Armstrong tells the stories surrounding twelve of the world's most fascinating carpets Dorothy Armstrong's *Threads of Empire* is a spellbinding look at the history of the world through the stories of twelve carpets Beautiful sensuous and enigmatic great carpets follow power Emperors shahs sultans and samurai crave them as symbols of earthly domination Shamans and priests desire them to evoke the spiritual realm The world's 1% hunger after them as displays of extreme status And yet these seductive objects are made by poor and illiterate weavers using the most basic materials and crafts hedgerow plants for dyes fibers from domestic animals and the millennia old skills of interweaving warps wefts and knots In *Threads of Empire* Armstrong tells the histories of some of the world's most fascinating carpets exploring how these textiles came into being then were transformed as they moved across geography and time in the slipstream of the great She shows why the world's powerful were drawn to them but also asks what was happening in the weavers' lives and how they were affected by events in the world outside their tent village or workshop In its wide ranging examination of these dazzling objects from the 5th century BCE contents of the tombs of Scythian chieftains to the carpets under the boots of Stalin Roosevelt and Churchill at the 1945 Yalta Peace Conference *Threads of Empire* uncovers a new hitherto hidden past right beneath our feet 1635: Music and Murder David

Carrico, Eric Flint, 2013-09-16 *1635: Murder and Music* Music It's been said that musicians live for the next new sound _ Well the musicians of Europe were presented with the biggest new sound ever when the Ring of Fire brought the future back to 1631 _ What will the court musicians think when they hear Bach Stravinsky and the Beatles _ What will the street and tavern musicians think when faced with Johnny Cash Metallica and Nirvana _ Things don't go smoothly for Marla Linder and her friends And Murder The Thirty Years War was an interesting time to be alive in the proverbial Chinese curse sense of the word _ Then Grantville arrived from the future bringing technology and philosophies that set European civilization on its ear _ But that's not all that came back with Grantville _ Imagine trying to establish modern police procedures in a time where neither the powers that be nor the people underneath them provide much support _ Up timer Byron Chieske and his down timer partner Gotthilf Hoch walk some mean streets and lonely roads At the publisher's request this title is sold without DRM

was not until the reign of Friedrich II in the first half of the 13th century that reliable data began to be obtained. From then on the data base grew rapidly. Systematic studies of bird migration were introduced when the Vogelwarte Rossitten was founded as the first ornithological biological observation station in the world (see first chapter). In Memory of Vogelwarte Rossitten. This area later received enormous impetus when experimental research on the subject was begun: the large scale bird ringing experiment initiated in Rossitten in 1903 by Johannes Thienemann who was inspired by the pioneering studies of C. C. M. Mortensen; the experiments on photoperiodicity carried out by William Rowan in the 1920s in Canada; and retention and release experiments performed by Thienemann in the 1930s in Rossitten; the first experimental study on the orientation of migratory birds. After the Second World War migration research while continuing in the previous areas also expanded into new directions such as radar ornithology, ecophysiology and hormonal control mechanisms, studies of evolution, genetics, telemetry and others.

Death Rituals, Social Order and the Archaeology of Immortality in the Ancient World Colin Renfrew, Michael J. Boyd, Iain Morley, 2015-11-19. Modern archaeology has amassed considerable evidence for the disposal of the dead through burials, cemeteries and other monuments. Drawing on this body of evidence, this book offers fresh insight into how early human societies conceived of death and the afterlife. The twenty-seven essays in this volume consider the rituals and responses to death in prehistoric societies across the world from eastern Asia through Europe to the Americas and from the very earliest times before developed religious beliefs offered scriptural answers to these questions. Compiled and written by leading prehistorians and archaeologists, this volume traces the emergence of death as a concept in early times as well as a contributing factor to the formation of communities and social hierarchies and sometimes the creation of divinities.

The Socio-Economic Causes and Consequences of Desertification in Central Asia Roy Behnke, 2008-08-19. This book contains a selection of papers presented at the Advanced Research Workshop on The Socio-economic causes and consequences of desertification in Central Asia held in Bishkek, Kyrgyzstan in June 2006. The meeting provided a forum for twenty-six scientists from Central Asia and NATO countries to discuss the human dimensions of the desertification process. Papers presented to the meeting examined recent scientific evidence on the impact of desertification on livestock production, public health and biodiversity and contributed to the formulation of coherent national and regional policies for the management of watersheds, rangelands and irrigated agriculture. The meeting was co-directed by Roy Behnke of the Macaulay Institute, UK and by Lapas Alibekov of the Samarkand State University, Uzbekistan. Both the workshop and this subsequent publication have been financed by the NATO Scientific Affairs Division and we gratefully acknowledge this support. The Bishkek meeting was ably hosted by the Kyrgyz Sheep Breeders Association under the direction of Akylbek Rakaev who contributed substantially to the successful running of the workshop. Deliberations at the workshop emphasized that policy failures at national level had promoted desertification within the region.
