Hybrid Communities Charles Stépanoff, Jean-Denis Vigne, 2018-08-06 Domestication challenges our understanding of human environment relationships because it blurs the dichotomy between what is artificial and what is natural In domestication biological evolution environmental change techniques and practices anthropological trajectories and sociocultural choices are inextricably interconnected Domestication is essentially a hybrid phenomenon that needs to be explored with hybrid scientific approaches Hybrid Communities Biosocial Approaches to Domestication and Other Trans species Relationships attempts for the first time to explore domestication viewed from across disciplines both in its origins and as an ongoing process This edited collection proposes new biosocial approaches and concepts which integrate the methods of social sciences archaeology and biology to shed new light on domestication in diachrony and in synchrony This book will be of great interest to all scholars working on human environment relationships and should also attract readers from the fields of social anthropology archaeology genetics ecology botany zoology history and philosophy

Incidents from an Elephant Hunter's Diary W. D.M. Bell, 2016-12-01 Once again the legendary Karamojo Bell marches through the wilds of Africa traversing a land virtually untouched by modern civilization in search of adventure and ivory The Africa Bell knew is now long gone and seemingly very far away but in reality his travels took place only about a century ago Join us as Bell takes us to a land with vast herds of wildlife living in rough equilibrium with the native human populations Through his earlier books Bell gained the reputation for being an excellent marksman who shot small caliber guns at giant elephants with deadly precision Bell was best known for his exploits in Karamoja in what is now largely Uganda and in these newly unearthed short stories we again find him in familiar terrain and with his faithful retinue of trackers and camp followers We also find Bell in unfamiliar terrain Travel with Bell to the French Congo where he encounters a man eating leopard and go along with him to West Africa when he ventures into the rain forest with the Pygmies to test his luck

against elephants in dense vegetation Then there are some wonderfully descriptive stories of an elephant camp and its social life crocodiles that menace a village several hunts for elephants on islands in the Ubangi River not for the faint of heart and a trip from Kano to Khartoum via motor car

Moving from the Inside Out Lesley McLennan, Julie Peck, 2020-07-28 Seven powerful principles for better more easeful movement a Feldenkrais approach More often than not we move through life focused on results or where we're going rarely paying attention to how we move until we experience pain or need to learn a new skill or perform at an elite level But movement isn't just about getting things done or getting from here to there at its essence it's an integration of thinking sensing and feeling with action such that to change one part changes the whole This book is written for those times when we don't need quick fixes bandaids or shortcuts to solve an immediate problem but can instead dedicate time and attention to explore laying the foundation to become experts in our own body and movement patterns for long lasting positive growth Moving from the Inside Out shows us how to resolve complex movement issues balance stability and instability increase power and precision and explore our own movement using innate learning strategies Written for practitioners movement therapists and somatic teachers and students the curious athlete or casual learner will also find much to gain in learning the practical and accessible fundamentals of movement Authors Lesley McLennan and Julie Peck introduce seven core principles that address The dynamic balance between instability and stability How to move with ease and grace The secrets of flexibility and support embedded in every musculo skeletal system How anxiety and curiosity shape our individual developmental sequence How qualities of movement are clues for your investigation The special role of intra abdominal pressure in our physical and emotional worlds How moving and learning are entwined Elephant meat trade in Central Africa : Cameroon case study, *Face2face Pre-intermediate Student's Book with DVD-ROM* Chris Redston, Gillie Cunningham, 2012-02-23 face2face is the flexible easy to teach General English course that helps adults and young adults to speak and listen with confidence face2face is informed by Cambridge English Corpus and its vocabulary syllabus has been mapped to the English Vocabulary Profile meaning students learn the language they really need at each CEFR level The course improves students listening skills by drawing their attention to the elements of spoken English that are difficult to understand The free DVD ROM in the Student's Book includes consolidation activities and electronic portfolio for learners to track their progress with customisable tests and grammar and vocabulary reference sections

Communicating in the Anthropocene C. Vail Fletcher, Alexa M. Dare, 2021-02-04 The purpose of *Communicating in the Anthropocene Intimate Relations* is to tell a different story about the world Humans especially those raised in Western traditions have long told stories about themselves as individual protagonists who act with varying degrees of free will against a background of mute supporting characters and inert landscapes Humans can be either saviors or destroyers but our actions are explained and judged again and again as emanating from the individual And yet as the coronavirus pandemic has made clear humans are unavoidably interconnected not only with other humans but with nonhuman and more than human

others with whom we share space and time Why do so many of us humans avoid deny or resist a view of the world where our lives are made possible maybe even made richer through connection In this volume we suggest a view of communication as intimacy We use this concept as a provocation for thinking about how we humans are in an always already state of being in relation with other humans nonhumans and the land
