**In the News** William Wray Carney, 2002-02 This book introduces the concepts surrounding media relations and explains current media and communications practices from both theoretical and practical perspectives Midwest [The Audience in the News](#) Dwight DeWerth-Pallmeyer, 2013-11-05 In recent years communication scholars have taken a renewed interest in analyzing the audience and its impact on the communication process Similarly news editors and producers have often turned toward a marketing orientation which seeks to give new readers and viewers what they want or at least what they say they want Yet there has still been little written about just how the audience factors into the news which is produced Seeking to fill that niche this book argues that audience images are quite important in the construction of news but not easily detected That is because journalists are not principally interested in their audience they are interested in the news USE THIS PARAGRAPH ONLY FOR GENERAL CATALOGS This volume argues that although journalistic images of the audience may be incomplete they do exist and powerfully help shape the work of journalists in producing journalistic texts Using a case study of news workers and news texts at two Chicago newsgathering organizations the Chicago Tribune and WGN TV this book examines notions of audience and how they have been treated by academicians presents a detailed description of the ways in which audience is embedded within the news construction process presents a very representative set of journalistic news values presents differing ideas of audience at three key levels of the news organizations reporters and news gatherers editors and producers and senior editors producers and news directors and seeks to summarize and position this study within the larger body of mass communication research [The Sixties in the News](#) William J. Ryczek, 2020-11-10 The 1960s were one of the most tumultuous periods in American history Perceptions of race gender and age changed dramatically ripping away beliefs that had endured for generations Newspapers the primary source of information at the time broadcasted all of these events from important national news such as President Nixon's efforts to end the Vietnam war to more light hearted affairs such as a topless dancer's pursuit of the Stanford University student government presidency Included in this book are examinations of newspaper articles from 1959 to 1973 to which the author provides background and often an epilogue showing what happened to some of the dramatic players The subjects of sex drugs rock and roll marriage politics entertainment and more are discussed in both a serious and humorous vein with the perspective of more than 50 years For those who lived through the 1960s this book will bring back memories For those too young to remember the era this is an opportunity to learn more about why parents are the way they are [The Language of Inequality in the News](#) Michael Toolan, 2018-12-06 Why in the early 1970s does The Times reject the idea of a national lottery as rewarding luck not merit and effort but warmly welcome one by the 1990s Why in the 1970s do the Daily Mail's TV reviews address serious contemporary themes such as class and race relations whereas forty years later they are largely concerned with celebrities talent shows and nostalgia Why does the Conservative Chancellor in the 2010s mention Britain so very often when the Conservative Chancellor in the 1970s scarcely

does at all Covering news stories spanning fort five years Michael Toolan explores how wealth inequality has been presented in centre right British newspapers focusing on changes in the representation may have helped present day inequality seem justifiable Toolan employs corpus linguistic and critical discourse analytic methods to identify changing lexis and verbal patterns and gaps all of which contribute to the way wealth inequality was represented in each of the decades from the 1970s to the present

**Making the News Popular** Anthony M Nadler, 2016-06-15 The professional judgment of gatekeepers defined the American news agenda for decades Making the News Popular examines how subsequent events brought on a post professional period that opened the door for imagining that consumer preferences should drive news production and unleashed both crisis and opportunity on journalistic institutions Anthony Nadler charts a paradigm shift from market research's reach into the editorial suite in the 1970s through contemporary experiments in collaborative filtering and social news sites like Reddit and Digg As Nadler shows the transition was and is a rocky one It also goes back much further than many experts suppose Idealized visions of demand driven news face obstacles with each iteration Furthermore the post professional philosophy fails to recognize how organizations mobilize interest in news and public life Nadler argues that this civic function of news organizations has been neglected in debates on the future of journalism Only with a critical grasp of news outlets role in stirring broad interest in democratic life he says might journalism's digital crisis push us toward building a more robust and democratic news media Wide ranging and original Making the News Popular offers a critical examination of an important and still evolving media phenomenon

**Presidential Polls And The News Media** Paul J Lavrakas, Michael Traugott, Peter V Miller, 2019-06-26 Most news media are data rich but analysis poor when it comes to election polling Since election polls clearly have the power to influence campaigns and election post mortems it is important that spin not take precedence over significance in the reporting of poll results In this volume experts in the media and in academe challenge the conventional approaches that most news media take in their poll based campaign coverage The book reports new research findings on news coverage of recent presidential elections and provides a myriad of examples of how journalists and news media executives can improve their analysis of poll data thereby better serving our political processes

**The Commercialization of News in the Nineteenth Century** Gerald J. Baldasty, 1992-11-15 The Commercialization of News in the Nineteenth Century traces the major transformation of newspapers from a politically based press to a commercially based press in the nineteenth century Gerald J Baldasty argues that broad changes in American society the national economy and the newspaper industry brought about this dramatic shift Increasingly in the nineteenth century news became a commodity valued more for its profitability than for its role in informing or persuading the public on political issues Newspapers started out as highly partisan adjuncts of political parties As advertisers replaced political parties as the chief financial support of the press they influenced newspapers in directing their content toward consumers especially women The results were recipes fiction contests and features on everything from sports to fashion alongside more standard
