It Only Takes A Second Preventing Childhood Traumatic Injuries:

It Only Takes a Second Children's Hospital of Los Angeles, 2001 Accidents can be preventable injuries Parents and celebrities recount their real life experiences with childhood accidents both the most common accidents and unusual events are discussed The authors intend to teach readers to be more proactive in preventing childhood injuries sustained at home in vehicles at play or school day care accidents Extensive statistics on accidents are included while the psychological emotional and economic impacts of accidents are discussed **Childhood Accidents and Injuries** United States. Congress. Senate. Committee on Labor and Human Resources. Subcommittee on Children, Family, Drugs and Alcoholism, 1989 **World Report on Child Injury Prevention** M. M. Peden, 2008 Child injuries are largely absent from child survival initiatives presently on the global agenda Through this report the World Health Organization the United Nations Children's Fund and many partners have set out to elevate child injury to a priority for the global public health and development communities It should be seen as a complement to the UN Secretary General's study on violence against children released in late 2006 that report addressed violence related or intentional injuries Both reports suggest that child injury and violence prevention programs need to be integrated into child survival and other broad strategies focused on improving the lives of children Evidence demonstrates the dramatic successes in child injury prevention in countries which have made a concerted effort These results make a case for increasing investments in human resources and institutional capacities Implementing proven interventions could save more than a thousand children's lives a day p vii **Trauma Nursing E-Book** Karen A.
