Formal Design in Renaissance Architecture Michele Furnari, 1995. Analyses 100 important buildings of the Italian Renaissance focusing on each building's outstanding characteristics and the origin and evolution of its design.

Italian Renaissance Architecture Marco Bussagli, 2013-06-16. The development of Italian Renaissance architecture was one of the most relevant cultural phenomena of the 15th and 16th centuries not only for the environment that gave birth to it and for centuries followed its course but also for the reverberations it caused outside of Italy and in the epochs that followed. In fact it became the reference model for most European courts which were inspired as much by the decorative elements (take for example France's palace at Fontainebleau or Scotland's Stirling Castle) as by the architectonic system and stylistic conventions. This extraordinary flowering theorized and implemented by people of absolute genius such as Filippo Brunelleschi and Leon Battista Alberti to limit ourselves to the most prominent figures encompasses masterpieces such as the dome of Santa Maria del Fiore in Florence or that of Saint Peter's in Rome as well as perfectly harmonious structures such as Maser's Villa Barbaro, Vicenza Basilica and Venice's Biblioteca Marciana. This comprehensive compilation of Italian Renaissance architecture richly documented, illustrated and organized by type of construction, major architects and geographical location reveals and celebrates a unique artistic period that lasted for almost two centuries from the early 1400s through the end of the 1500s, two points in time perfectly reflected in the figures of Brunelleschi and Bramante.

Architecture in Italy, 1500-1600 Wolfgang Lotz, 1995. This work presents a survey of Italian Renaissance architecture in the Cinquecento. A Renaissance Architecture of Power, 2016-04-08. The growth of princely states in early Renaissance Italy brought a thorough renewal to the old seats of power. One of the most conspicuous outcomes of this process was the building or rebuilding of new court palaces erected as prestigious residences in accord with the new classical principles of Renaissance architecture. The novelties however went far beyond architectural forms: they involved the reorganisation of courtly interiors and their functions, new uses for the buildings and the relationship between the palaces and their surroundings. The whole urban setting was affected by these processes and therefore the social, residential and political customs of its inhabitants. This is the focus of *A Renaissance Architecture of Power* which aims to analyse from a comparative perspective the evolution of Italian court palaces in the Renaissance in their entirety. Contributors are Silvia Beltramo, Flavia Cantatore, Bianca de Divitiis, Emanuela Ferretti, Marco Folini, Giulio Gironi, Andrea Longhi, Marco Rosario Nobile, Aurora Scotti, Elena Svalduz and Stefano Zaggia.

Architecture and the Senses in the Italian Renaissance David Karmon, 2021-05-27 This is the first study of Renaissance architecture as an immersive multisensory experience that combines historical analysis with the evidence of first hand accounts Questioning the universalizing claims of contemporary architectural phenomenologists David Karmon emphasizes the infinite variety of meanings produced through human interactions with the built environment His book draws upon the close study of literary and visual sources to prove that early modern audiences paid sustained attention to the multisensory experience of the buildings and cities in which they lived Through reconstructing the Renaissance understanding of the senses we can better gauge how constant interaction with the built environment shaped daily practices and contributed to new forms of understanding

Architecture and the Senses in the Italian Renaissance offers a stimulating new approach to the study of Renaissance architecture and urbanism as a kind of experiential trigger that shaped ways of both thinking and being in the world
