Non-payment in the Electricity Sector in Eastern Europe and the Former Soviet Union, 1999-01-01
 In Albania, consumers with guns stolen from the government threatened to shoot the utility officials who attempted to disconnect defaulting customers. This situation and others less dramatic but every bit as corrupt aggravated the utility non-payment issue and pushed it into the foreground. This study reviews the non-payment problem in the electricity sector in Eastern Europe and the former Soviet Union during 1990-1997. In addition to non-payment, the review also covers the problem of low cash collections and the preference in some countries for the use of cash substitutes such as barter, offsets and promissory notes. The objective of the study is to identify which policies and measures addressing the problem of non-payment in the electricity sector worked in practice and which did not. Therefore, it includes stories of both success and failure. It is aimed at equipping bank staff and decision makers with a set of practical tools that can be of use when the political will exists to tackle the problem.

Democratization Christian W. Haerpfer, Patrick Bernhagen, Christian Welzel, Ronald Inglehart, 2019
 Democratization is the first textbook to focus on the global wave of democratization that has been occurring since around 1970. Bringing together leading authors from diverse international backgrounds, it introduces students to the theoretical and practical dimensions of the subject in an authoritative, accessible and systematic way. The book takes into account the international factors that affect politics at the level of the nation-state, showing students the direction in which the discipline is moving. It is accompanied by an innovative companion website that provides numerous resources for students and instructors. Democratization covers several key themes including:

1. Theories of democratization and their relation to democratic theory
2. Critical prerequisites and driving social forces of democratic transition
3. Pivotal actors and institutions involved in democratization
4. Conditions for democratic survival: the consolidation of newly democratized countries and the analysis of failed democratization
5. Demonstrations of how these factors have played a role in the different regions in which the global wave of democratization has transplanted authoritarian and communist systems
6. Possible futures of democratization worldwide
