Extraordinary Objects:

Objects Daniel Z. Korman, 2015 One of the central questions of material object metaphysics is which highly visible objects there are right before our eyes Daniel Z Korman defends a conservative view according to which our ordinary natural judgments about which objects there are are more or less correct He begins with an overview of the arguments that have led people away from the conservative view into revisionary views according to which there are far more objects than we ordinarily take there to be permissivism or far fewer eliminativism Korman criticizes a variety of compatibilist strategies according to which these revisionary views are actually compatible with our ordinary beliefs and responds to debunking arguments according to which these beliefs are the products of arbitrary biological and cultural influences He goes on to respond to objections that the conservative verdicts about which objects that are and aren't are objectionably arbitrary and to the argument from vagueness which purports to show that the sort of restriction that conservatives want to impose on which composites there are is bound to give rise to vagueness about what exists something that is ruled out by widely accepted theories of vagueness Finally Korman responds to the overdetermination argument the argument from material constitution and the problem of the many all of which are meant to motivate eliminativism by showing that accepting ordinary objects commits one to one or another absurdity

Ordinary Things and Their Extraordinary Meanings

Giuseppina Marsico, Luca Tateo, 2019-05-01 The book provides a new look at the everyday relationship between psychological processes and extraordinary aspects of ordinary phenomena Why should we deal with ordinary things People's life is made of everyday practical taken for granted things such as driving a car using money listening music etc When you drive from home to workplace you are migrating between contexts Is this an empty space you are crossing or the time you spend into the car is something meaningful In psychological terms things have at least three levels of existence a material a symbolic and an affective one The underlying idea is that the symbolic elaboration of everyday things is characterized by the transcendence of the particular object sign leading to the creation of more and more complex sign fields These fields expand according to an inclusive logic up to dialogically and dialectically incorporate opposites i.e. clean dirty transparent opaque hide show join divide slow fast etc Even the meaning of ordinary and extraordinary follow such an inclusive logic if you give a positive value to ordinary extraordinary is rule breaking otherwise if ordinary means trivial extraordinary assumes a positive value Besides things are cultural artifacts mediating the experience of the world the psychological processes and the construction of mind Reflecting upon things is thus a more meaningful pathway to understand Psyche

Concerning the Nature of Existence N.H. Thomas-Brown, 2018-03-25 This exposition aims at sketching a systematic philosophy which will include solutions to questions found within disciplines ranging from metaphysics and epistemology to psychology and theology Of all the philosophic problems answered within this book the most important is that of the relationship between consciousness and the body Herein I solve the aforesaid problem through an endorsement and defense of ontological idealism Specifically I expound upon a position of personalistic absolute idealism It is a viewpoint which is much in line with that of Mary Calkins and its demonstration is inspired by the work of the 19th century philosopher J F Ferrier

Blind Obedience Meredith Williams, 2009-12-21 There is considerable debate amongst philosophers as to the basic philosophical problem Wittgenstein is attempting to solve in *Philosophical Investigations* In this bold and original work Meredith Williams argues that it is the problem of normative similarity In *Blind Obedience* Williams demonstrates how Wittgenstein criticizes traditional representationalist theories of language by employing the master novice distinction of the learner arguing that this distinction is often overlooked but fundamental to understanding philosophical problems about mind and language The book not only provides revealing discussions of Wittgenstein's corpus but also intricate analyses of the work of Brandom Dummett Frege Sellars Davidson Cavell and others These are usefully compared in a bid to better situate Wittgenstein's non intellectualist non theoretical approach and to highlight its unique features

Husserl and Intentionality D.W Smith, R. McIntyre, 2012-12-06 This book has roots in our respective doctoral dissertations both completed in 1970 at Stanford under the tutelage of Professors Dagfinn Føllesdal John D Goheen and Jaakko Hintikka In the fall of 1970 we wrote a joint article that proved to be a prolegomenon to the present work our *Intentionality via Intentions* *The Journal of Philosophy* 68 1971 Professor Hintikka then suggested we write a joint book and in the spring of 1971 we began writing the present work The project was to last ten years as our conception

of the project continued to grow at each stage Our intellectual debts follow the history of our project During our dissertation days at Stanford we joined with fellow doctoral candidates John Lad and Michael Sukale and Professors Flesdal Goheen and Hintikka in an informal seminar on phenomenology that met weekly from June of 1969 through March of 1970 During the summers of 1973 and 1974 we regrouped in another informal seminar on phenomenology meeting weekly at Stanford and sometimes Berkeley the regular participants being ourselves Hubert Dreyfus Dagfinn Flesdal Jane Lipsky McIntyre Izchak Miller and in 1974 John Haugeland
