Necrographies Anastasios Panagiotopoulos, Diana Espírito Santo, 2019-07-16 Going beyond the frameworks of the anthropology of death Articulate Necrographies offers a dramatic new way of studying the dead and their interactions with the living Traditional anthropology has tended to dichotomize societies where death speaks from those where death is silent the latter is deemed scientific and the former religious or magical The collection introduces the concept of necrography to describe the way death and the dead create their own kinds of biographies in and among the living and asks what kinds of articulations and silences this in turn produces in the lives of those affected **A Cop Doc's Guide to Public Safety**

Complex Trauma Syndrome Daniel Rudofossi, Dale Lund, 2017-07-05 Cop Doc's Guide to Public Safety Complex Trauma Syndrome is written in response to the need for an advanced specialized guide for clinicians to operationally define understand and responsibly treat complex post traumatic stress and grief syndromes in the context of the unique varieties of police personality styles The book continues where Rudofossi's first book Working with Traumatized Police Officer Patients left off Theory is wed to practice and practice to effective interventions with police officer patients The how and why of a clinician's approach is made highly effective by understanding the distinct personality styles of officer patients Rudofossi's theoretical approach segues into difficult examples that highlight each officer patient's eco-ethological field experience of loss in trauma with a focus on enhancing resilience and motivation to otherwise left disenfranchised Thus this original work expands the ecological ethological existential analysis of complex PTSD into the context of personality styles with an emphasis on resilience without ignoring the pathological aspects of loss that often envelop officer patient trauma syndromes

Persons, Animals, Ourselves Paul F. Snowdon, 2014-10-09 The starting point for this book is a particular answer to a question that grips many of us what kind of thing are we The particular answer is that we are animals of a certain sort a view nowadays called animalism This answer will appear obvious to many but on the whole philosophers have rejected it Paul F Snowdon proposes contrary to that attitude that there are strong reasons to believe animalism and that when properly analysed the objections against it that philosophers have given are not convincing One way to put the idea is that we should not think of ourselves as things that need psychological states or capacities to exist any more that other animals do The initial chapters analyse the content and general philosophical implications of animalism including the so called problem of personal identity and that of the unity of consciousness and they provide a framework which categorises the standard philosophical objections Snowdon then argues that animalism is consistent with a perfectly plausible account of the central notion of a person and he criticises the accounts offered by John Locke and by David Wiggins of that notion In the two next chapters Snowdon argues that there are very strong reasons to think animalism is true and proposes some central claims about animal which are relevant to the argument In the rest of the book the task is to formulate and to persuade the reader of the lack of cogency of the standard philosophical objections including the conviction that it is possible for the animal that I would be if animalism were true to continue in existence after I have ceased to exist and the argument that it is possible for us to remain in existence even when the animal has ceased to exist In considering these types of objections the views of various philosophers including Nagel Shoemaker Johnston Wilkes and Olson are also explored Snowdon concludes that animalism represents a highly commonsensical and defensible way of thinking about ourselves and that its rejection by philosophers rests on the tendency when doing philosophy to mistake fantasy for reality

Freedom: The End of the Human Condition Jeremy Griffith, 2016-05-24 FREEDOM has its own very informative website visit www.humancondition.com The fastest growing realization everywhere is that humanity can't go on the way it is going Indeed the great fear is we're entering endgame where we appear to have lost the race between self destruction and self discovery the race to find the psychologically relieving understanding of our good and evil afflicted human condition Well astonishing as it is this book by

biologist Jeremy Griffith presents the 11th hour breakthrough biological explanation of the human condition necessary for the psychological rehabilitation and transformation of our species The culmination of 40 years of studying and writing about our species psychosis FREEDOM delivers nothing less than the holy grail of insight we have needed to free ourselves from the human condition It is in short as Professor Harry Prosen a former president of the Canadian Psychiatric Association asserts in his Introduction The book that saves the world Griffith has been able to venture right to the bottom of the dark depths of what it is to be human and return with the fully accountable true explanation of our seemingly imperfect lives At long last we have the redeeming and thus transforming understanding of human behaviour And with that explanation found all the other great outstanding scientific mysteries about our existence are now also able to be truthfully explained of the meaning of our existence of the origin of our unconditionally selfless moral instincts and of why we humans became conscious when other animals haven't Yes the full story of life on Earth can finally be told and all of these incredible breakthroughs and insights are presented here in this greatest of all books *The Freud Encyclopedia* Edward Erwin, 2002 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company Psychological Aspects of Women's Health Care Nada L. Stotland, Donna E. Stewart, 2008-11-01 In the decade since the first edition of this work was published an incredible array of reproductive technologies and associated issues has emerged Obstetricians and gynecologists are hard pressed to deal with the startling breadth and depth of these issues which require mastery over a daunting combination of ever increasing scientific knowledge technical skills long hours legal liability and exposure to clinical situations of overwhelming emotional intensity Psychiatrists have a vital role to play in helping obstetricians and gynecologists cope with a host of problems whose resolutions require not just technical skill but also knowledge of biology psychology sociology anthropology ethics and law For example to design and implement strategies to reduce the transmission of HIV psychiatrists could work with public health workers to incorporate the psychology sociology and anthropology of female reproductive behavior Psychiatrists could likewise improve the diagnosis and treatment of breast and pelvic malignancies by elucidating the factors that deter women from self examination and regular medical screening and enhance treatment compliance Divided into three sections this clinical and theoretical sourcebook addresses every major area of contemporary concern Pregnancy covers topics from the psychology of normal gestation to physical and psychiatric complications during and after pregnancy including new prenatal diagnostic techniques and the dynamic issues that emerge when abnormalities are detected and the use of psychotropic drugs and electroconvulsive therapy in pregnant and lactating patients Gynecology discusses not only common gynecologic problems but also more controversial issues such as induced abortion and the new reproductive technologies including the role of the menstrual cycle in exacerbating and precipitating psychologic symptoms the psychiatric aspects of menopause the assessment and management of chronic pelvic pain the psychosocial concomitants of gynecologic malignancies and the emotional demands on the oncology team and the special implications of HIV AIDS

General Issues offers a broad balanced view of topics rarely found in the literature such as men's reactions to women's reproductive events substance abuse and eating disorders sexual and physical abuse often part of the histories of patients with personality disorders and posttraumatic stress disorders ethical and legal issues and health care for lesbian patients Of special significance is Dr Stotland's chapter on how consultation liaison services are provided to obstetrics and gynecology services This practical and scholarly volume is exceptionally useful as a teaching reference for medical and other health care students and residents in psychiatry and obstetrics and gynecology It also provides a valuable resource for the clinician working to improve the psychological well being of women patients *Coping with Physical Illness* Rudolf Moos, 2012-12-06 This book provides new ideas about how patients and their families cope with serious health crises Biomedical knowledge has expanded abruptly in the past decade during which time diagnostic and treatment procedures have become unusually specific and effective Similarly important advances have taken place in our understanding of the central role of psychosocial factors in health and illness Recent trends have sparked the formulation of useful concepts of coping skills and social resources and have emphasized the value of an active assertive role for patients in the process of obtaining health care The emergence of subspecialties such as behavioral medicine and health psychology has stimulated renewed interest in these areas Moreover the growth of holistic medicine and a biopsychosocial orientation highlights the contribution of a psychosocial perspective in an integrated framework for providing health care To cover these diverse trends I offer a unified conceptual approach for understanding the process of coping with the crisis of physical illness and identifying the underlying adaptive tasks and domains of coping skills involved in this process The first half of the book covers coping with selected health crises such as birth defects and perinatal death childhood and adult cancer and chronic physical disabilities

Drums In The Distance Joe Mulhall, 2021-07-08 Mulhall watches the extreme right revival from the inside as an anti fascist infiltrator criss crossing the global networks of modern fascism but he brings a deep analytical focus By the end of it we understand one thing the threat of a second fascist era is real Paul Mason author of Postcapitalism An urgent missive from the global frontlines of the fight against fascism Nima Elbagir CNN Senior International Correspondent A terrifying and timely look at the spread of far right movements across the globe Joe Mulhall knows what it's like to stare fascism in the face For a decade often undercover at significant personal risk he has investigated hate groups He infiltrated a US white supremacist militia set up a fake Ku Klux Klan branch has been on countless street marches with violent far right groups across Europe and got inside some of the most important alt right meetings ever held Brazil India and the US are still in thrall to authoritarian populism and far right views have become steadily normalised in mainstream politics Mulhall's dramatic experiences on the front line of anti fascist activism coupled with his academic research clearly explain the roots of both elected and non elected far right movements across the globe Above all he concludes the far right should not be dehumanised they are normal people but with dangerous beliefs that can be defeated Joe has had a unique view of the far

right over the past decade as it transformed from a marginal subculture into one of the defining political currents of our time. He understands how these groups think and operate and is perfectly placed to guide readers through this disturbing but vital story. Daniel Trilling, journalist and author of *Lights In The Distance*, *Exile and Refuge at the Borders of Europe*. Few if any are better placed to write a book of this breadth and scale than Joe Mulhall, Mark Townsend, Home Affairs editor of the Observer.
