Mogadishu Then and Now M. Dirios; I. Osman; Rasna Warah, 2012-09-04 Mogadishu was once one of the prettiest and most cosmopolitan cities in Africa The city has a long history that dates back to the 10th century when Arab and Persian traders began settling there For centuries Mogadishu was a traditional centre for Islam and an important hub for trade with communities along the Indian Ocean coastline However since the beginning of the civil war in the early 1990s Somalia's capital city has gained the reputation of being the most dangerous and violent city in the world Mogadishu Then and Now is an attempt to redeem the city's damaged reputation and restore its lost glory in the public imagination and in the Somali people's collective memory The book showcases Mogadishu in all its splendour prior to the civil war and contrasts this with the devastation and destruction that has characterised the city for more than two decades It should be of particular interest to historians urban planners architects and anthropologists

Compassion Fatigue Susan D. Moeller, 2002-09-11 From outbreaks of the flesh eating viruses Ebola and Strep A to death camps in Bosnia and massacres in Rwanda the media seem to careen from one trauma to another in a breathless tour of poverty disease and death First we're horrified but each time they turn up the pitch show us one image more hideous than the next it gets harder and harder to feel Meet compassion fatigue a modern

syndrome Susan Moeller argues that results from formulaic media coverage sensationalized language and overly Americanized metaphors In her impassioned new book *Compassion Fatigue* Moeller warns that the American media threatens our ability to understand the world around us Why do the media cover the world in the way that they do Are they simply following the marketplace demand for tabloid style international news Or are they creating an audience that as seen too much or too little to care Through a series of case studies of the Four Horsemen of the Apocalypse disease famine death and war Moeller investigates how newspapers newsmagazines and television have covered international crises over the last two decades identifying the ruts into which the media have fallen and revealing why Throughout we hear from industry insiders who tell of the chilling effect of the mega media mergers the tyranny of the bottom line hunt for profits and the decline of the American attention span as they struggle to both tell and sell a story But Moeller is insistent that the media need not and should not be run like any other business The media have a special responsibility to the public and when they abdicate this responsibility and the public lapses into a compassion fatigue stupor we become a public at great danger to ourselves

Simon Dalby: A Pioneer in International Relations Simon Dalby, Roger Boyd, 2025-06-11 This book profiles Simon Dalby's academic contributions in the fields of critical geopolitics environmental security and the intersection of international relations and the Anthropocene It includes reprints of key essays that highlight innovations in

critical thought at the intersections between geopolitics environment and security Starting with an analysis of American reconstructions of the Soviet threat in the 1970s an early contribution to the emerging field of critical geopolitics subsequent papers focus on the emergent formulations of environmental security in the aftermath of the Cold War and the environmental costs of globalization Focusing on the implicit geographical framing in discourses of globalization offered a critique that extended the ambit of critical geopolitics to grapple with the issues of environmental security and the rising concern with climate change as well as the political identities invoked in that debate In the aftermath of 9 11 similar arguments about contextualization applied to the American global war on terror and the revival of discussions of empire and its geographies both in arguments for invading Iraq as well as the wider discussions in policy discourse and popular culture Simultaneously the emergence of earth system science and the concept of the Anthropocene offered another way to highlight the dangers of fossil fueled economic activities The necessity of fundamentally rethinking the premises of security policy in light of this recontextualization is emphasized in more recent contributions on climate security and the current ecological crisis Critical geopolitics Environmental security Global war on terror Firepower in the Anthropocene **About to Die** Barbie Zelizer,2010-12-01

Due to its ability to freeze a moment in time the photo is a uniquely powerful device for ordering and understanding the world But when an image depicts complex ambiguous or controversial events terrorist attacks wars political assassinations its ability to influence perception can prove deeply unsettling Are we really seeing the world as it is or is the image a fabrication or projection How do a photo s content and form shape a viewer s impressions What do such images contribute to historical memory About to Die focuses on one emotionally charged category of news photograph depictions of individuals who are facing imminent death as a prism for addressing such vital questions Tracking events as wide ranging as the 1906 San Francisco Earthquake the Holocaust the Vietnam War and 9 11 Barbie Zelizer demonstrates that modes of journalistic depiction and the power of the image are immense cultural forces that are still far from understood Through a survey of a century of photojournalism including close analysis of over sixty photos About to Die provides a framework and vocabulary for understanding the news imagery that so profoundly shapes our view of the world **War 2.0**

Thomas Rid,Marc Hecker,2009-05-14 War 2 0 Irregular Warfare in the Information Age argues that two intimately connected grassroots trends the rise of insurgencies and the rise of the web are putting modern armies under huge pressure to adapt new forms of counterinsurgency to new forms of social war After the U S military transformed into a lean lethal computerized force faltered in Iraq after 2003 a robust insurgency arose Counterinsurgency became a social form of war indeed the U S Army calls it armed social work in which the local population was the center of gravity and public opinion at home the critical vulnerability War 2 0 traces the contrasting ways in which insurgents and counterinsurgents have adapted irregular conflict to novel media platforms It examines the public affairs policies of the U S land forces the British Army and the Israel Defense Forces Then it compares the media related counterinsurgency methods of these conventional armies with the methods

devised by their irregular adversaries showing how such organizations as al Qaeda the Taliban and Hezbollah use the web not merely to advertise their political agenda and influence public opinion but to mobilize a following and put violent ideas into action
