David Bruns, J. R. Olson, 2020-09-15 With The Pandora Deception Bruns and Olson return with a captivating portrayal of modern day combat that compares with the best of the timeless classics by Tom Clancy Dale Brown and Stephen Coonts Mark Greaney To effectively combat the rise of global terrorism the U S military must now rely on more than traditional weapons and tactics Don Riley of the U S Cyber Command is given charge of a brand new effort a new team in the CIA Operations Directorate called Emerging Threats To establish this team he recruits three talented recent commissioned naval officers Janet Everett Michael Goodwin and Andrea Ramirez and together they uncover a new terrorist group The group is going under the name of the Mahdi a messiah figure of Islamic mythology and is operating in the geopolitical tinderbox that is the Nile River basin But the Mahdi is no ordinary terrorist group Their stock in trade is not the usual suicide bombings and surprise attacks In fact the Mahdi has created and is about to release the worst kind of weapon a hugely destructive bioweapon known as Pandora with a devastating fatality rate And it will take all the resources that the U S can bring to bear intelligence assets cyber warfare and military assaults to not only find out who is really behind the Mahdi but to stop them before they successfully destroy the balance of power in the Middle East An American Health Dilemma W. Michael Byrd, Linda A. Clayton, 2012-10-02 At times mirroring and at times shockingly disparate to the rise of traditional white American medicine the history of African American health care is a story of traditional healers root doctors granny midwives underappreciated and overworked African American physicians scrupulous and unscrupulous white doctors and scientists governmental support and neglect epidemics and poverty Virtually every part of this story revolves around race More than 50 years after the publication of An American Dilemma Gunnar Myrdal's 1944 classic about race relations in the USA An American Health Dilemma presents a comprehensive and groundbreaking history and social analysis of race race relations and the African American medical and public health experience Beginning with the origins of western medicine and science in Egypt Greece and Rome the authors explore the relationship between race medicine and health care from the precursors of American science and medicine through the days of the slave trade with the harrowing middle passage and equally deadly breaking in period through the Civil War and the gains of reconstruction and the reversals caused by Jim Crow laws It offers an extensive examination of the history of intellectual and scientific racism that evolved to give sanction to the mistreatment medical abuse and neglect of African Americans and other non white people Also included are biographical portraits of black medical pioneers like James McCune Smith the first African American to earn a degree from a European university and anecdotal vignettes like the tragic story of the Hottentot Venus which illustrate larger themes An American Health Dilemma promises to become an irreplaceable and essential look at African American and medical history and will provide an invaluable baseline for future exploration of race and racism in the American health system Video Source Book Gale Group, 1999-10-28 A guide to programs currently available on video in the areas of movies entertainment general interest education sports recreation fine arts health science business industry children juvenile how to instruction **Biblical**

Counsel ,1993 *Demystifying Power, Crime and Social Harm* David Gordon Scott,Joe Sim,2023-12-29 This collection revisits Steven Box's book *Power Crime and Mystification* published in 1983 and considers its relevance forty years on. It introduces the critical analysis developed by Box which examined corporate crime, police crime, rape and sexual assault and female crime and analyses the continuities and discontinuities since 1983 in relation to crime, the state and the exercise of power. The book explores the ways in which we can see his influence nationally and internationally on critical criminological, sociological and abolitionist writings today. It asks how can these perspectives be applied to a critical analysis of contemporary state authoritarianism and the criminal injustice that this authoritarianism generates. Additionally, how can Box's concepts shine a critical light on contemporary social harms that were not covered in the original book. The collection provides a toolkit for students and academics to critically analyse the issues around crime, social harm, power, powerlessness, truth, mystification, criminal injustice, social justice as well as historical and contemporary sites of resistance confronting the exercise of state power. Narrative Ethics in Public Health: The Value of Stories Drue H. Barrett, Leonard W.

Ortmann, Stephanie A. Larson, 2022-04-12 This Open Access book illustrates the power of stories to illuminate ethical concerns that arise in public health. It complements epidemiological or surveillance evidence and reveals stakeholder perspectives crucial for public health practitioners to develop effective and ethical public health interventions. Because it relies on the natural and universal appeal of stories, the book also serves to introduce the field of public health to students considering a career in public health. The opening section of the book also serves as a more didactic introduction to public health ethics and the field of narrative ethics. It describes the field of public health ethics including ethical principles relevant to public health practice and research and the advantages of a narrative ethics approach. That approach explores the problems and the ethical challenges of public health from the inside from the perspective of those experiencing health problems to the challenges of those who must address these problems. The later sections consist of 14 chapters that present the actual stories of these public health problems and challenges. In narrative style they range from first person narratives of both practitioners and citizens to analysis of published short stories. The problems and challenges they address include issues relating to justice, concerns, surveillance and stigma, community values and the value of community, trust and the value of information and freedom and responsibility. Specific public health topics include resource allocation, restricting liberty to protect the community from health threats and the health impact of trauma, addiction, obesity and health disparities. **AB**
