Reservoir which receives its water supply from aerial precipitation and stores it in various component lakes and springs. Some of these lakes include Hernando de Soto, the Triplets, Whipple, Morrison, and Floating Moss; the streams that proceed from them include the beginnings of the Nicolet, as well as the Mississippi. From Nicolet's middle lake, the main river proceeds in an unbroken channel to the Gulf. After lobbying successfully to have this headwater region preserved as Itasca State Park in 1891, Brower served as its first commissioner. The appendix includes an historical account of how the Mississippi and the Lake of the Woods came to form part of the northwestern boundary of the United States. Its author was Albert James Hill (1823-1895), who was also instrumental in the creation of Brower's report.
