Restivo,1985-09-30 Sal Restivo s book is a major achievement in the sociology of science and mathematics It is exciting to read and constitutes a creative wide ranging exploration of the connections between physics and mysticism between the natural science and the humanities Of particular interest is his attempt to show the emergence of abstraction and of formal disciplines in science by relating them to the structure of social interests in society All told this book challenges the separation of C P Snow s two cultures and is an original attempt to overcome the chasms between the natural sciences the humanities and the social sciences The implications of the book s content certainly go far beyond its title Prof W Heydebrand New York University *Social Exchange in Developing Relationships* Robert L.

Burgess, Ted L. Huston, 2013-09-11 *Social Exchange in Developing Relationships* is a collection of papers that deals with the systematic study of the development of relationships. The papers discuss several theoretical perspectives such as evolutionary theory, personality theory, cognitive developmental theory, equity theory, role theory, and attribution theory. One paper discusses romantic relationships, the evolution of first acquaintance to close or intimate commitment. Another paper presents the hypothesis that the factors causing a relationship to begin will also probably steer intermediate cognitive processes, eventually influencing the nature of the relationship. Commitment requires specific concepts such as input levels contributed to the relationship, duration of these inputs, and their consistency of occurrence. The equity theory suggests that equity principles determine the selection of one's mate and how they, the partners, will get along in the future. One paper analyzes the dynamic theories of social relationships and the resulting research strategies that the conceptualization of a parameter of a social relationship can affect the choice of data collection techniques and other matters. Sociologists, psychologists, historians, students, and academicians doing sociological research can benefit greatly from this collection. **Social**

Relations and the Cuban Health Miracle Elizabeth Kath, 2017-09-08 For Cuba's supporters, health is the most commonly cited evidence of the socialist system's success. Even critics often concede that this is the country's saving grace. Cuba's health statistics are indeed extraordinary. This small island outperforms virtually all of its neighboring countries and all countries of the same level of economic development. Some of its health statistics rival wealthy industrialized countries. Moreover, these health outcomes have resulted against all odds. Setting out to unravel this puzzle, the author finds that Cuba possesses an unusually high level of popular participation and cooperation in the implementation of health policy. This has been achieved with the help of a longstanding government that prioritizes public health and has enough political influence to compel the rest of the community to do the same. On the other hand, popular participation in decision making regarding health policy is minimal, which contrasts with the image of popular participation often promoted. Political elites design and impose health policy, allowing little room for other health sector groups to meaningfully contribute to or protest official decisions. This is a problem because aspects of health care that are important to those who use the system or work within it can be neglected if they do not fit within official priorities. The author remains overall supportive of health achievement in Cuba. The country's preventive arrangements, its collective prioritization of key health areas, the improvements in public access to health services through the expansion of health facilities, and the provision of free universal care are among the accomplishments that set it apart. The sustainability and progress of these achievements, however, must involve open recognition and public discussion of weaker aspects of the health system.
