Empire in the Air Chandra D. Bhimull, 2017-12-12 Honorable Mention 2019 Victor Turner Prize in Ethnographic Writing given by the Society for Humanistic Anthropology Honorable Mention 2019 Sharon Stephens Prize given by the American Ethnological Society Examines the role that race played in the inception of the airline industry Empire in the Air is at once a history of aviation and an examination of how air travel changed lives along the transatlantic corridor of the African diaspora Focusing on Britain and its Caribbean colonies Chandra Bhimull reveals how the black West Indies shaped the development of British Airways Bhimull offers a unique analysis of early airline travel illuminating the links among empire aviation and diaspora and in doing so provides insights into how racially oppressed people experienced air travel The emergence of artificial flight revolutionized the movement of people and power and Bhimull makes the connection between airplanes and the other vessels that have helped make and maintain the African diaspora the slave ships of the Middle Passage the tracks of the Underground Railroad and Marcus Garvey's black owned ocean liner As a new technology airline travel retained the racist ideas and practices that were embedded in British imperialism and these ideas shaped every aspect of how commercial aviation developed from how airline routes were set to who could travel easily and who could not The author concludes with a look at airline travel today suggesting that racism is still enmeshed in the banalities of contemporary flight

Air Pollution XVIII C.A. Brebbia, J.W.S. Longhurst, 2010-05-26 Bringing together recent results and state of the art contributions from researchers around the world this text contains papers first presented at the 18th International Conference on the Modelling Monitoring and Management of Air Pollution *Annual Statement of the Foreign Sea and Air-Borne Trade of India* India. Department of Commercial Intelligence and Statistics, 1919 **Global Air Power** John Andreas Olsen, 2011 What influences have shaped air power since human flight became a reality more than a hundred years ago Global Air Power provides insight into the evolution of air power theory and practice by examining the experience of six of the world's largest air forces those of the United Kingdom the United States Israel Russia India and China and of representative smaller air forces in Pacific Asia Latin America and continental Europe The chapters written by highly regarded scholars and military leaders explore how various nations have integrated air power into their armed forces and how they have applied air power in both regular and irregular warfare and in peacetime operations They cover the organizational professional and doctrinal issues that air forces confronted in the past the lessons learned from victory and defeat and emerging challenges and opportunities Further Global Air Power supplements the traditional military perspective with examinations of the ideological economic and cultural factors that give air forces their distinctive characters Chapters

show how the interplay among these internal factors together with external challenges determines the structure role and effectiveness of air forces Together these chapters illuminate universal trends as well as similarities and differences among the world s air forces Its combination of military history and sociopolitical analysis makes Global Air Power especially valuable to a broad range of historians air power specialists and general readers interested in national defense and international relations

The Geographies of Air Transport Andrew R. Goetz,Lucy Budd,2016-03-09 Making a detailed contribution to geographies of air transport and aeromobility this book examines the practices and processes that produce particular patterns of air transport provision both regionally and globally In so doing it updates the seminal contributions of Eva Taylor 1945 Kenneth Sealy 1957 Brian Graham 1995 and others to the study of air transport geography Leading scholars in the field offer a unique insight into the key developments that have occurred in the field and the implications that these developments have had for geography geographers and global patterns of past present

and future air transport Although globalization and liberalization processes have greatly expanded the demand for air transport over the last two decades the industry has experienced several major setbacks due to economic security and environmental concerns Many of these impacts have been much more pronounced in some regions such as North America and Europe while others such as Asia Pacific have not been as adversely affected Accordingly there is a clear need to examine these recent economic and geopolitical changes from a geographical perspective given the differentiated pattern of effects from global processes Addressing this need this volume opens with thematic chapters covering key topics such as the historical geographies socio cultural mobilities environmental externalities urban geographies and sustainability of the global air transport industry followed by regional analysis of the industry in Asia Pacific Latin America Greater Middle East and Africa as well as North America and Europe *Modern Refrigeration and Air Conditioning* ,1920 *Signal* ,1991
