Peckerar, J.M. Schnur, 2013-11-11 The Third International Conference on Synthetic Microstructures in Biological Research SMIBR was held in Williamsburg Virginia September 9 12 1991 This book represents the compilation of many of the papers and posters presented at the meeting Publications resulting from previous SMIBR meetings held at Airlie House Airlie Virginia March 24 26 1986 and March 20 23 1988 can be obtained from the Institute of Electrical and Electronic Engineers Inc IEEE Service Center 908 562 5418 The purpose of these conferences is to provide an interface between the engineering community and those at the cutting edge of biological and related material science The overriding motive for assembling representatives from these diverse disciplines is clear Engineers even in 1986 could manipulate materials over dimensional scales on the

order of those critical to biological systems The devices that emerge from these manipulations could then be tailored to monitor system function more directly with significantly more localization than ever before Thus one important goal of the meetings is to provide the detailed specifications required for effective interfacing of devices with biological systems under investigation
