In The Tradition Of Ahlfors And Bers:

In the Tradition of Ahlfors-Bers, V Mario Bonk, 2010 The Ahlfors Bers Colloquia commemorate the mathematical legacy of Lars Ahlfors and Lipman Bers The core of this legacy lies in the fields of geometric function theory Teichmüller theory hyperbolic geometry and partial differential equations However the work of Ahlfors and Bers has impacted and created interactions with many other fields of mathematics such as algebraic geometry dynamical systems topology geometric group theory mathematical physics and number theory Recent years have seen a flowering of this legacy with an increased interest in their work This current volume contains articles on a wide variety of subjects that are central to this legacy These include papers in Kleinian groups classical Riemann surface theory translation surfaces algebraic geometry and dynamics The majority of the papers present new research but there are survey articles as well

In the Tradition of Thurston Ken'ichi Ohshika, Athanase Papadopoulos, 2020-12-07 This book consists of 16 surveys on Thurston's work and its later development The authors are mathematicians who were strongly influenced by Thurston's publications and ideas The subjects discussed include among others knot theory the topology of 3 manifolds circle packings complex projective structures hyperbolic geometry Kleinian groups foliations mapping class groups Teichmüller theory anti de Sitter geometry and co Minkowski geometry The book is addressed to researchers and students who want to learn about Thurston's wide ranging mathematical ideas and their impact At the same time it is a tribute to Thurston one of the greatest geometers of all time whose work extended over many fields in mathematics and who had a unique way of perceiving forms and patterns and of communicating and writing mathematics

In the Tradition of Ahlfors-Bers, IV Richard Douglas Canary, 2007 The Ahlfors Bers Colloquia commemorate the mathematical legacy of Lars Ahlfors and Lipman Bers The core of this legacy lies in the fields of geometric function theory Teichmüller theory hyperbolic manifolds and partial differential equations However the work of Ahlfors and Bers has impacted and created interactions with many other fields such as algebraic geometry mathematical physics

dynamics geometric group theory number theory and topology The triannual Ahlfors Bers colloquia serve as a venue to disseminate the relevant work to the wider mathematical community and bring the key participants together to ponder future directions in the field The present volume includes a wide range of articles in the fields central to this legacy The majority of articles present new results but there are expository articles as well

In the Tradition of Ahlfors and Bers, 2000 *In the Tradition of Thurston III* Ken'ichi Ohshika, Athanase Papadopoulos, 2024-03-19 William Thurston's ideas have altered the course of twentieth century mathematics and they continue to have a significant influence on succeeding generations of mathematicians The purpose of the present volume and of the other volumes in the same series is to provide a collection of articles that allows the reader to learn the important aspects of Thurston's heritage The topics covered in this volume include Kleinian groups holomorphic motions earthquakes from the Anti de Sitter point of view the Thurston and Weil-Petersson metrics on Teichmüller space 3-manifolds geometric structures dynamics on surfaces homeomorphism groups of 2-manifolds and the theory of orbifolds

A Century of Mathematical Meetings Bettye Anne Case, 1996 This book features contributions by and about some of the luminaries of American mathematics. Included here are essays based on presentations made during the symposium Celebration of 100 Years of Annual Meetings held at the AMS meeting in Cincinnati in January 1994. In addition, a number of contributions were solicited after the symposium. The papers in this collection form a vibrant collage of mathematical personalities, a collage that makes being a member of the community of mathematicians rich and rewarding. This book weaves a tapestry of mathematical life in the United States with emphasis on the past seventy years. Photographs, old and recent, further decorate that tapestry. This volume complements three earlier AMS volumes of collected papers about mathematics in America: *A Century of Mathematics in America: Parts I, II, and III*. There are many stories to be told about the making of mathematics and the personalities of those who meet to share it. This collection offers a celebration in words and pictures of a century of American mathematical life.

Lectures on Kähler Groups Pierre Py, 2025-03-25 An introduction to the state of the art in the study of Kähler groups This book gives an authoritative and up to date introduction to the study of fundamental groups of compact Kähler manifolds known as Kähler groups Approaching the subject from the perspective of a geometric group theorist Pierre Py equips readers with the necessary background in both geometric group theory and Kähler geometry covering topics such as the actions of Kähler groups on spaces of nonpositive curvature the large scale geometry of infinite covering spaces of compact Kähler manifolds and the topology of level sets of pluriharmonic functions Presenting the most important results from the past three decades the book provides graduate students and researchers with detailed original proofs of several central theorems including Gromov and Schoen's description of Kähler group actions on trees the study of solvable quotients of Kähler groups following the works of Arapura Beauville Campana Delzant and Nori and Napier and Ramachandran's work characterizing covering spaces of compact Kähler manifolds having many ends It also describes without proof many of the recent breakthroughs in the field Lectures on Kähler Groups also gives in eight appendixes detailed introductions to such topics as the study of ends of groups and spaces groups acting on trees and Hilbert spaces potential theory and L^2 cohomology on Riemannian manifolds

The Geometrical Study of Differential Equations Joshua Allensworth Leslie, Thierry P. Robart, 2001 This volume contains papers based on some of the talks given at the NSF CBMS conference on The Geometrical Study of Differential Equations held at Howard University Washington DC The collected papers present important recent developments in this area including the treatment of nontransversal group actions in the theory of group invariant solutions of PDEs a method for obtaining discrete symmetries of differential equations the establishment of a group invariant version of the variational complex based on a general moving frame construction the introduction of a new variational complex for the calculus of difference equations and an original structural investigation of Lie Backlund transformations The book opens with a modern and illuminating overview of Lie's line sphere correspondence and concludes with several interesting open problems arising from symmetry analysis of PDEs It offers a rich source of inspiration for new or established researchers in the field This book can serve nicely as a companion volume to a forthcoming book written by the principle speaker at the conference Professor Niky Kamran to be published in
