**In Search of Meaning and Purpose Through Living, Structure and Function** Edy P. Pierre,2012-05-09 Is a story about the humanity living with a natural mind that possess by endless needs wants and desires The book explains how we become so intimately connected with life through our mind and by which we are conscious of all of life's pain suffering and disappointments it brings In the process we become a problem oriented world as we individually intertwine with a time perception world construed with the notion of future opportunities and hope for better tomorrows As our living continue to revolve around our desires and perceptions the least of all the choices we will make or want is to become free

from fear free from pain and sufferings and pursuit unhappiness Fear that if we are not happy this will mean we have lost ourselves in emptiness and eventually become hopeless To be hopeful is to feeding the never ending desire for a better future from the past In clear straightforward language complemented by well designed mental functioning desire for peace love joy and happiness every aspect of this integrative is systematically address the perception that life will get better From strategies to family conveys this powerful message of empathy hope for individuals struggling with ongoing persistent to keep on working as a manager of time to facilitate history of endless expectation All of us enthralled in this behavior even with obsession trying to reverse what is perceived negative relationships life and time Yet history indicates that the very aspect of empathic is not hopeful beginning or ending all that does it to continuous integrating toxic relationships while promoting positive attitude toward an unsuccessful outcome Richard Hooker 1554 1600 English theologian once say Change is not made without inconvenience even from worse to better Also another historian Alvin Toffler a U S writer 1928 once says Even the best strategies seldom take into account more than a few of the consequences that flow from them The book went on to explains how the appearance that time and the human mind are seemingly inseparable but biologically speaking that is not entirely conclusive Nonetheless as far as being aware of existence is concerned this is one of the inter social complexities This tragic interactive relation is evident in many different aspects for every person living today While progressive technology has provided the contemporary world with countless time saving devices and options to managing our time most people complain and suffering with anxiety about not having enough time to do all the things they want or have to do
