**Nature's Temples** Joan Maloof, 2023-04-04 An impassioned case for the importance of ancient forests and their preservation Standing in an old

growth forest you can instinctively sense the ways it is different from forests shaped by humans These ancient undisturbed ecosystems are increasingly rare and largely misunderstood Nature s Temples explores the science and alchemy of old growth forests and makes a compelling case for their protection Many foresters are proponents of forest management while ecologists and conservation biologists believe that the healthiest forests are those we leave alone Joan Maloof brings together the scientific data we have about old growth forests drawing on diverse fields of study to explain the ecological differences among forests of various ages She describes the life forms and relationships that make old growth forests unique from salamanders and micro snails to plants that communicate through fungi and reveals why human attempts to manage forests can never replicate nature s sublime handiwork This revised and expanded edition also sheds new light on the special role forests play in removing carbon from the atmosphere and shares what we know about the interplay between wildfires and ancient forests With drawings by Andrew Joslin that illustrate scientific concepts and capture the remarkable beauty of ancient trees Nature s Temples invites you to discover the power of these fragile realms that are so inextricably connected to our planet our fellow species and our spirits *Philosophy of Theism* Alexander Campbell Fraser,1899

**Indigenous Education and the Metaphysics of Presence** Carl Mika,2017-03-16 Indigenous Education and the Metaphysics of Presence A worlded philosophy explores a notion of education called worldedness that sits at the core of indigenous philosophy This is the idea that any one thing is constituted by all others and is therefore educational to the extent that it is formational A suggested opposite of this indigenous philosophy is the metaphysics of presence which describes the tendency in dominant Western philosophy to privilege presence over absence This book compares these competing philosophies and argues that even though the metaphysics of presence and the formational notion of education are at odds with each other they also constitute each other from an indigenous worlded philosophical viewpoint Drawing on both Maori and Western philosophies this book demonstrates how the metaphysics of presence is both related and opposed to the indigenous notion of worldedness Mika explains that presence seeks to fragment things in the world underpins how indigenous peoples can represent things and prevents indigenous students critics and scholars from reflecting on philosophical colonisation However the metaphysics of presence from an indigenous perspective is constituted by all other things in the world and Mika argues that the indigenous student and critic can re emphasise worldedness and destabilise presence through creative responses humour and speculative thinking This book concludes by positioning well being within education because education comprises acts of worldedness and presence This book will be of key interest to indigenous as well as non indigenous academics researchers and postgraduate students in the fields of philosophy of education indigenous and Western philosophy political strategy and post colonial studies It will also be relevant for those who are interested in philosophies of language ontology metaphysics and knowledge *Natural Dyes : Scope and Challenges* M.
