In The Shadow Of Mies:

In the Shadow of Mies Richard Pommer, David A. Spaeth, Kevin Harrington, 1988 *The Mereological City* Daniel Köhler, 2016-03-15 In a positive departure from modernism the work of the art critic and urbanist Ludwig Hilberseimer offers schemata towards the design for the city itself its mereological composition The resonance of parts unfolds to an alternative of a purely contrasting equation of form and content It reminds us that when the ground gr logos of the city is defined by its parts gr meros its architecture the city in turn always also is part of the architecture as its desire The Mereological City introduces a mereological methodology and contributes to an ongoing discussion about an ecological form of urban design

Landscape as Urbanism Charles Waldheim, 2016-02-16 A definitive intellectual history of landscape urbanism It has become conventional to think of urbanism and landscape as opposing one another or to think of landscape as merely providing temporary relief from urban life as shaped by buildings and infrastructure But driven in part by environmental concerns landscape has recently emerged as a model and medium for the city with some theorists arguing that landscape architects are the urbanists of our age In Landscape as Urbanism one of the field s pioneers presents a powerful case for rethinking the city through landscape Charles Waldheim traces the roots of landscape as a form of urbanism from its origins in the Renaissance through the twentieth century Growing out of progressive architectural culture and populist environmentalism the concept was further informed by the nineteenth century invention of landscape architecture as a new art charged with reconciling the design of the industrial city with its ecological and social conditions In the late twentieth and early twenty first centuries as urban planning shifted from design to social science and as urban design committed to neotraditional models of town planning landscape urbanism emerged to fill a void at the heart of the contemporary urban project Generously illustrated Landscape as Urbanism examines works from around the world by designers ranging from Ludwig Hilberseimer Andrea Branzi and Frank Lloyd Wright to James Corner Adriaan Geuze and Michael Van Valkenburgh The result is the definitive account of an emerging field that is likely to influence the design of cities for decades to come

Objects in Exile Robin Schuldenfrei, 2024-01-23 An essential examination of how emigration and resettlement defined modernism In the fraught years leading up to World War II many modern artists and architects emigrated from continental Europe to the United States and Britain The experience of exile infused their modernist ideas with new urgency and forced them to use certain materials in place of others modify existing works and reconsider their approach to design itself In *Objects in Exile* Robin Schuldenfrei reveals how the process of migration was crucial to the development of modernism charting how modern art and architecture was shaped by the need to constantly face and transcend the materiality of things Taking readers from the prewar era to the 1960s Schuldenfrei explores the objects these migr s brought with them what they left behind and the new works they completed in exile She argues that modernism could only coalesce with the abandonment of national borders in a process of emigration and resettlement and brings to life the vibrant postwar period when avant

garde ideas came together and emerged as mainstream modernism Examining works by Walter Gropius L szl Moholy Nagy Lucia Moholy Herbert Bayer Anni and Josef Albers and others Schuldenfrei demonstrates the social impact of art objects produced in exile Shedding critical light on how the pressures of dislocation irrevocably altered the course of modernism Objects in Exile shows how artists and designers forced into exile by circumstances beyond their control changed in unexpected ways to meet the needs and contexts of an uncertain world Shaping the City Rodolphe El-Khoury, Edwards Robbins, 2015-06-23 Taking on the key issues in urban design Shaping the City examines the critical ideas that have driven these themes and debates through a study of particular cities at important periods in their development As well as retaining crucial discussions about cities such as Los Angeles Atlanta Chicago Detroit Philadelphia and Brasilia at particular moments in their history that exemplified the problems and themes at hand like the mega city the post colonial city and New Urbanism in this new edition the editors have introduced new case studies critical to any study of contemporary urbanism China Dubai Tijuana and the wider issues of informal cities in the Global South The book serves as both a textbook for classes in urban design planning and theory and is also attractive to the increasing interest in urbanism by scholars in other fields Shaping the City provides an essential overview of the range and variety of urbanisms and urban issues that are critical to an understanding of contemporary urbanism *Montage and the Metropolis* Martino Stierli, 2018-01-01 Montage has been hailed as one of the key structural principles of modernity yet its importance to the history of modern thought about cities and their architecture has never been adequately explored In this groundbreaking new work Martino Stierli charts the history of montage in late 19th century urban and architectural contexts its application by the early 20th century avant gardes and its eventual appropriation in the postmodern period With chapters focusing on photomontage the film theories of Sergei Eisenstein Mies van der Rohe s spatial experiments and Rem Koolhaas s use of literary montage in his seminal manifesto Delirious New York 1978 Stierli demonstrates the centrality of montage in modern explorations of space and in conceiving and representing the contemporary city Beautifully illustrated this interdisciplinary book looks at architecture photography film literature and visual culture featuring works by artists and architects including Mies Koolhaas Paul Citroen George Grosz Hannah Hoch El Lissitzky and Le Corbusier **The Third Coast** Thomas L. Modernism and the Posthumanist Subject K. Michael Hays, 1995 Drawing on both the work of modern theorists like Georg Luk cs Walter Benjamin Theodor Adorno and Siegfried Kracauer and more recent poststructuralist thought K Michael Hays creates an entirely new method of reading architectural production Drawing both on the work of modern theorists like Georg Luk cs Walter Benjamin Theodor Adorno and Siegfried Kracauer and on more recent poststructuralist thought K Michael Hays creates an entirely new method of reading architectural production Challenging much of the traditional wisdom about modernism and the avant garde Hays argues that a rigorously articulated posthumanist position was actually developed in the modernist architecture of Hannes Meyer and Ludwig Hilberseimer He reinterprets their buildings projects and writings as constructions of this new category of subjectivity

Shadow Simon Unwin,2020-02-18 Each of these Analysing Architecture Notebooks is devoted to a particular theme in understanding the rich and varied workings of architecture They can be thought of as addenda to the foundation volume Analysing Architecture which first appeared in 1997 and has subsequently been enlarged in three further editions Examining these extra themes as a series of Notebooks rather than as additional chapters in future editions allows greater space for more detailed exploration of a wider variety of examples whilst avoiding the risk of the original book becoming unwieldy Shadows may be insubstantial but they are nevertheless an important element in architecture In prehistoric times we sought shade as a refuge from the hot sun and chilling rain Through history architects have used shadows to draw to mould form to paint pictures to orchestrate atmosphere to indicate the passing of time as well as to identify place Sometimes shadow can be the substance of architecture Mies Van Der Rohe Dietrich Neumann,2024-09-24 A landmark survey offering a nuanced and deeply researched account of the career and life of the iconic modern architect Ludwig Mies van der Rohe 1886 1969 was a German born American architect and designer whose work in Europe and North America has had an enduring influence on modern and contemporary architecture worldwide During his sixty year career he fundamentally rethought architectural types that shaped modern life including the office building apartment building and private home True to his alleged dictum less is more Mies van der Rohe s style is characterized by utmost simplicity elegance of materials and radical formal and functional innovation as exemplified by such iconic projects as the Farnsworth House in Plano Illinois and the
