Demythologizing Pure Land Buddhism Paul B. Watt, 2016-01-31 The True Pure Land sect of Japanese Buddhism or Shin Buddhism grew out of the teachings of Shinran 1173-1262 a Tendai trained monk who came to doubt the efficacy of that tradition in what he viewed as a degenerate age Shinran held that even those unable to fulfill the requirements of the traditional Buddhist path could attain enlightenment through the experience of *shinjin* the entrusting mind an expression of the profound realization that the Buddha Amida who promises birth in his Pure Land to all who trust in him was nothing other than the true basis of all existence and the sustaining nature of human beings Over the centuries the subtleties of Shinran's teachings were often lost Elaborate rituals developed to focus one's mind at the moment of death so one might travel to the Pure Land unimpeded and a rich artistic tradition celebrated the moment when Amida and his retinue of bodhisattvas welcome the dying believer What is more many Western interpreters tended to reinforce this view of Pure Land Buddhism seeing in it certain parallels to Christianity This volume introduces the thought and selected writings of Yasuda Rjin 1900-1982 a modern Shin Buddhist thinker affiliated with the Otani or Higashi Honganji branch of Shin Buddhism

Yasuda sought to restate the teachings of Shinran within a modern tradition that began with the work of Kiyozawa Manshi 1863 1903 and extended through the writings of Yasuda's teachers Kaneko Daiei 1881 1976 and Soga Ry jin 1875 1971. These men lived through the period of Japan's rapid modernization and viewed the Shin tradition as possessing existential significance for modern men and women. For them and Yasuda in particular Amida did not exist in some other worldly paradise but rather Amida and his Pure Land were to be experienced as lived realities in the present. In the writings and lectures presented here Yasuda draws on not only classical Shin and Mahayana Buddhist sources but also the thought of Nishida Kitar 1870 1945 the founder of the Kyoto School of philosophy and modern Western philosophers such as Heidegger Nietzsche and Buber.

It's Fun Finding Out Bernard Black Wicksteed, 1947 **Math from Three to Seven** Aleksandr K. Zvonkin, 2011 This book is a captivating account of a professional mathematician's experiences conducting a math circle for preschoolers in his apartment in Moscow in the 1980s. As anyone who has taught or raised young children knows mathematical education for little kids is a real mystery. What are they capable of? What should they learn first? How hard should they work? Should they even work at all? Should we push them or just let them be? There are no correct answers to these questions and the author deals with them in classic math circle style: he doesn't ask and then answer a question but shows us a problem, be it mathematical or pedagogical, and describes to us what happened. His book is a narrative about what he did, what he tried, what worked, what failed, but most important, what the kids experienced. This book does not purport to show you how to create precocious high achievers. It is just one person's story about things he tried with a half dozen young children. Mathematicians, psychologists, educators, parents, and everybody interested in the intellectual development in young children will find this book to be an invaluable inspiring resource. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents, and teachers, and the mathematics profession. Titles in this series are co-published with the Mathematical Sciences Research Institute, MSRI.
