Effective Learning and Teaching in Mathematics and Its Applications Peter Kahn, Joseph Kyle, 2003-12-16 The Effective Learning and Teaching in Higher Education series is packed with up to date advice guidance and expert opinion on teaching in the key subjects in higher education today and is backed up by the authority of the Institute for Learning and Teaching This book covers all of the key issues surrounding the effective teaching of maths a key subject in its own right and one that forms an important part of many other disciplines The book includes contributions from a wide range of experts in the field and has a broad and international perspective *Teaching and Learning in Higher Education* Elizabeth Cleaver, Maxine Lintern, Mike McLinden, 2014-03-31 In today's higher education climate academic staff are encouraged to focus not only on the up to date content of their teaching but also to identify the most effective ways to engage students in learning often alongside other key transferrable skills This has led to a growing requirement for staff to adopt a scholarly approach to learning and teaching practice and to undertake scholarship of learning and teaching as part of ongoing professional development This text explores broad best practice approaches to undertaking enquiry into learning and teaching in higher education It provides an introduction for staff who have been educated within a range of academic disciplines often with high level but very focused knowledge about and understandings of research processes to the potentially new world of educational enquiry This is complemented by chapters exploring what educational enquiry means in the context of different academic disciplines including physical sciences mathematics engineering the life sciences the arts the humanities the health professions and law It also includes An overview of research methodology including data collection literature reviews good ethical practice and research dissemination Case studies of actual research projects to support understanding of how to carry out educational enquiry in practice Lecturers why waste time waiting for the post arrive Request and receive your e inspection copy today [Implementing Communities of Practice in Higher Education](#) Jacquie McDonald, Aileen Cater-Steel, 2016-11-23 In this edited collection the authors pick up the communities of practice CoP approach of sharing practice in their reflection on the experience of taking their CoP vision from a dream to reality Their stories articulate the vision the passion and the challenge of working within and or changing existing institutional culture and practice The book discusses strategies that worked and considers the lessons learnt to inspire future dreamers and schemers The multiple perspectives provided in the case studies will assist higher education leaders as well as academic and professional staff in establishing or assessing CoPs The book offers insights into implementation strategies practical guidelines and ideas on how CoP theoretical underpinnings can be tailored to the higher education context *Mathematicians' Reflections on Teaching* Sepideh Stewart, 2023-08-07 This book opens the case on collaboration among mathematicians and mathematics educators The authors of this book provide their research and experience based insights on collaboration to inspire the young generation of the mathematics community to engage in productive collaborations and

exchange of knowledge early in their careers These valuable collaborations are anticipated to generate innovative research questions that set new and novel paths for mathematics education research with ample possibilities yet to be realized and discovered

Mathematical Modelling in Education and Culture Q-X Ye,W Blum,S K Houston,Q-Y Jiang,2003-05-01 The mathematical modelling movement in mathematics education at school and university level has been influencing curricula for about 25 years Lecturers will find material to enhance their teaching and extracurricular activities and educators will find innovative ideas to inform their course design and focus their research while students will find interesting problems to explore Helps lecturers enhance their teaching and extracurricular activities Provides educators with innovative ideas to inform their course design and focus their research Students will find interesting problems to explore *Which Way Social Justice in Mathematics Education?* Leone Burton,2003-02-28 This contributed volume explores equity and social justice within the field of mathematics education In part one Helga Jungwirth s introductory chapter provides a strong theoretical overview that is based in actual classroom behaviors and a typology that classifies the various interpretations found within this volume Also in part one Laurie Hart discusses developments in equity research in the United States Part two focuses on results of studies about social justice and their impact on learning in mathematics classrooms in various parts of the world For example in a chapter on Peru social justice does not just encompass gender but also inequalities in opportunities to learn such as problems of resources living and social conditions communal demands and language needs And part three focuses on computers as a resource to mathematics teaching The contributors raise several important social justice issues which have previously remained unresearched Although there are a number of chapters specifically dealing with gender many of the authors use one of the following strategies their gender specific questions are set in a wider socio cultural context they challenge what have threatened to become false orthodoxies or they raise other important issues These other issues include the meaning of democratic citizenship for mathematics classrooms the links between parents and children learning mathematics and the preconceptions of some teachers of underprivileged students in Australia Other chapters explore different forms of classroom communication participation and assessment The pieces on computers state that there is still not enough research to conclude whether computers in the mathematics classrooms are supportive of or detrimental to the learning of all students The one thing on which every author in this volume does agree is that social justice in mathematics education has still not been attained but that we must strive toward it to improve educational practices and society in general

Second International Handbook of Mathematics Education Alan Bishop,M.A. (Ken) Clements,Christine Keitel-Kreidt,Jeremy Kilpatrick,Frederick Koon-Shing Leung,2012-02-02 ALAN 1 BISHOP The first International Handbook on Mathematics Education was published by Kluwer Academic Publishers in 1996 However most of the writing for that handbook was done in 1995 and generally reflected the main research and development foci prior to 1994 There were four sections 36 chapters and some 150 people contributed to the final volume either as author reviewer

editor or critical friend The task was a monumental one attempting to cover the major research and practice developments in the international field of mathematics education as it appeared to the contributors in 1995 Inevitably there were certain omissions some developments were only starting to emerge and some literatures were only sketchy and speculative However that Handbook has had to be reprinted three times so it clearly fulfilled a need and I personally hope that it lived up to what I wrote in its Introduction The Handbook thus attempts not merely to present a description of the international state of the field but also to offer synthetic and reflective overviews on the different directions being taken by the field on the gaps existing in our present knowledge on the current problems being faced and on the future possibilities for development Bishop et al 1996 Since that time there has been even more activity in our field and now seems a good time to take stock again to reflect on what has happened since 1995 and to create a second Handbook with the same overall goals
