Electronic Architectures for Digital Processing G. D. Bergman,1992 Practical Digital Image Processing Rhys Lewis,1990 Aims to bridge a gap between introductory texts on image processing and more specialist works which contain considerable amounts of complex mathematics Emphasis is placed on the selection and use of techniques rather than their implementation **Electronic Architectures for Digital Processing** G. D. Bergman,A. Bergman,1992-01-01 This volume is concerned with the choice between computer hardware and software in the implementation of functions in real time digital processing equipment The functions of interest range in complexity from simple digital or analogue data transformations to the management of large amounts of recursive data in high speed signal processing installations Security systems image processing digital control systems microprocessor based instrumentation and electrical power supply are all application areas in which this choice is of importance to the success of the project **Human and Machine Vision** James D.
