**New Educational Technology** Riko Kobayashi, 2008 Educational technology is a creative blending of idea and product technologies with subject matter content in order to engender and improve teaching and learning processes Educational technology is often associated with the terms instructional technology or learning technology Product technologies are tangible for example computer hardware or software Idea technologies are cognitive frameworks or schemes for example the Multiple Intelligence Theory proposed by Howard Gardner When products are thoughtfully blended with subject matter content such as mathematics or science concepts for a specific audience in a specific educational context such as a school one is using educational technology The words educational and technology in the term educational technology have the general meaning Educational technology is not restricted to the education of children nor to the use of high technology

**The Perfect Online Course** Michael Simonson, Terry L. Hudgins, Anymir Orellana, 2009-05-01 The Perfect Online Course Best Practices for Designing and Teaching was edited under the assumption that a perfect online course can be delivered following different instructional methods and models for design and for instruction and by implementing different teaching or instructional strategies Such methods models and strategies are framed within quality educational guidelines and must be aimed towards

attaining the online course's learning goals. The book seeks to make a contribution to the existing body of literature related to best practices and guidelines for designing and teaching distance courses specifically online education. The process of selecting works suitable for this compilation included an extensive review of the journals *Quarterly Review of Distance Education* and *Distance Learning*. The book begins by covering literature related to general approaches and guidelines, continues with proposed methods and models for designing and instruction, and ends with instructional strategies to achieve engagement through interaction. The book is divided into four independent yet interrelated parts and a concluding section: Part I Introduction, Part II Best Guidelines and Standards, Part III Best Instructional Methods and Models, Part IV Best Engagement Strategies, and the concluding section. And finally, with words from Simonson who delineates the structure of a perfect online course.
