Paperbound Books in Print, 1984 **Quasi-Experimentation** Charles S. Reichardt, 2019-07-29 Featuring engaging examples from diverse disciplines this book explains how to use modern approaches to quasi experimentation to derive

credible estimates of treatment effects under the demanding constraints of field settings. Foremost expert Charles S. Reichardt provides an in-depth examination of the design and statistical analysis of pretest posttest nonequivalent groups regression discontinuity and interrupted time series designs. He details their relative strengths and weaknesses and offers practical advice about their use. Comparing quasi-experiments to randomized experiments, Reichardt discusses when and why the former might be a better choice than the latter in the face of the contingencies that are likely to arise in practice. Modern methods for elaborating a research design to remove bias from estimates of treatment effects are described as are tactics for dealing with missing data and noncompliance with treatment assignment. Throughout, mathematical equations are translated into words to enhance accessibility. Adding to its discussion of prototypical quasi-experiments, the book also provides a complete typology of quasi-experimental design options to help the reader craft the best research design to fit the circumstances of a given study.

Social Cognitive Psychology David F. Barone, James E. Maddux, C. R. Snyder, 2012-11-19. A pragmatic social cognitive psychology covers a lot of territory mostly in personality and social psychology but also in clinical counseling and school psychologies. It spans a topic construed as an experimental study of mechanisms by its natural science wing and as a study of cultural interactions by its social science wing. To learn about it, one should visit laboratories, field study settings, and clinics, and one should read widely. If one adds the fourth dimension, time, one should visit the archives too. To survey such a diverse field, it is common to offer an edited book with a resulting loss in integration. This book is coauthored by a social personality psychologist with historical interests. DFB Parts I, II, and IV in collaboration with two social clinical psychologists, CRS and JEM. Parts III and V. We frequently cross-reference between chapters to aid integration without duplication. To achieve the kind of diversity our subject matter represents, we build each chapter anew to reflect the emphasis of its content area. Some chapters are more historical, some more theoretical, some more empirical, and some more applied. All the chapters reflect the following positions.

Illusions of Reality James H. Korn, 1997-03-20. Examines the origins and the development of the use of deception in psychological research to create illusions of reality. *The Experimenting Society* William N. Dunn, Offers a collection of essays probing, evaluating, and augmenting the work of Donald T. Campbell on experimental societies. A basic assumption is that Campbell's perspective supplies a useful way to address increasingly complex and seemingly unmanageable problems facing the US and other postindustrial countries. Of interest to policy studies scholars, sociologists, and social scientists. Annotation c by Book News, Inc. Portland, Or.
