Stop the Violence in Latin America Laura Chioda, 2017-06-19 The Latin America and Caribbean LAC region has the undesirable distinction of being the world's most violent region with 24.7 homicides per 100 000 inhabitants The magnitude of the problem is staggering and persistent Of the top 50 most violent cities in the world 42 are in LAC In 2010 alone 142 302 people in LAC fell victim to homicide representing 390 homicides per day and 4.06 homicides every 15 minutes Crime disproportionately affects young men aged 20 to 24 whose homicide rate of 92 per 100 000 nearly quadruples that of the region The focus of Crime Prevention in Latin America and the Caribbean is to identify policy interventions that whether by design or indirect effect have been shown to affect antisocial behavior early in life and patterns of criminal offending in youth and adults Particular attention is devoted to recent studies that rigorously establish a causal link between the interventions in question and outcomes This publication adopts a lifecycle perspective and argues that as individuals progress through different stages of the lifecycle not only do different sets of risk factors arise and take more prominence but their interactions and interdependencies shape human behavior These interactions and the relative importance of different sets of risk factors identify relevant margins that can effectively be targeted by prevention policies not only early in life but throughout the lifecycle Indeed prevention can never start too early nor start too late nor be too comprehensive

The Oxford Handbook of the Economics of Gambling Leighton Vaughan Williams, Donald S. Siegel, 2013-11-12 There is growing interest among academics and policymakers in the economics of gambling which has been stimulated by major regulatory and tax changes in the U S U K Continental Europe Asia Australia and elsewhere Unfortunately there is no comprehensive source of path breaking research on this topic To fill this gap we commissioned chapters from leading economists on all aspects of gambling research Topics covered include the optimal taxation structure for various forms of gambling factors influencing the demand and supply of gambling services forecasting of gambling trends regulation of gambling the efficiency of racetrack and sports betting markets gambling prevalence and behavior modeling the demand for gambling services the economic impact of gambling substitution and complementarities among different types of gambling activity and the relationship between gambling and other sectors of the economy These are all important issues with significant global implications Specifically we divide the Handbook into sections on casinos sports betting horserace betting betting strategy motivation behavior and decision making in betting markets prediction markets and political betting and lotteries and gambling machines

Exploiting Hope Jeremy Snyder, 2020-09-03 We often hear stories of people in terrible and seemingly intractable situations who are preyed upon by someone offering promises of help Frequently these cases are condemned in terms of exploiting hope These accusations are made in a range of contexts human smuggling employment relationships unproven medical cures We hear this concept so often and in so many contexts that with all its heavy lifting in public discourse its actual meaning tends to lose focus Despite its common use it can be hard to

understand precisely what is wrong about exploiting hope what can accurately be captured under this concept and what should be done In this book philosopher Jeremy Snyder offers an in depth study of hope s exploitation First he examines the concept in the abstract including a close look at how this term is used in the popular press and analysis of the concepts of exploitation and hope This theory based section culminates in a definitive account of what it is to exploit hope and when and why doing so is morally problematic The second section of the book examines the particularly dangerous cases in which unproven medical interventions target the most vulnerable for example participants in clinical trials purchasing unproven stem cell interventions right to try legislation and crowdfunding for unproven medical interventions This book is essential reading for ethical theorists policymakers and health researchers on a topic of growing visibility and importance **Cheat**
