## **Inequality Power And Development:**

**Inequality, Power, and Development** Jerry Kloby, 2004 Presents data on the increase of wealth and income inequality and argues that many of the policies pursued by the developed nations and transnational corporations have led to a deterioration of both living standards and the environment in many parts of the world Back cover *Inequality, Power, and Development* Jerry Kloby, 1997-12 The growth of transnational corporations the dominance of worldwide financial and political institutions and the extensive influence of media that are nearly monopolized by corporate interests are key factors shaping our global society today What are the consequences of these developments for the great masses of people throughout the world One clearly emerging pattern is the growing disparity between the developed nations and the rest of the world In this excellent analysis of power distribution and its effects sociologist Jerry Kloby presents data on the increase of wealth and income inequality and argues that many of the policies pursued by the developed nations and international corporations have led to a deterioration of living standards and the environment in many parts of the world He also discusses a power shift in the United States that has weakened the working class One of the great strengths of Kloby's work is the comprehensive picture he creates from many diverse events and trends local and international contemporary and historical The many graphs and tables containing supporting data add a visual element that guides the reader to a clear understanding of the complex forces underlying contemporary developments He also clearly explains the meaning and relevance of such sophisticated but important terms as neoliberalism dependency civil society and social capital This fully revised and updated edition will have enduring value for students and scholars of sociology political science economics and international relations Jerry Kloby Upper Montclair NJ is the coordinator of the Institute for Community Studies at Montclair State University

**Human Development and Social Power** Ananya Mukherjee Reed, 2008-06-17 In South Asia and beyond human development continues to be in a state of crisis Each successive Human Development Report HDR and the pervasive global failure to achieve the Millennium Development Goals are constant reminders of this crisis An equally and even more distressing dimension of human development is its great unevenness Even in countries where development has been rapid Development, Power, and the Environment Md Saidul Islam, 2013-06-07 Unmasking the neoliberal paradox this book provides a robust conceptual and theoretical synthesis of development power and the environment With seven case studies on global challenges such as underdevelopment food regime climate change dam building identity politics and security vulnerability the book offers a new framework of a double risk society for the Global South With apparent ecological and social limits to neoliberal globalization and development the current levels of consumption are unsustainable inequitable and inaccessible to the majority of humans Power has a great role to play in this global trajectory Though power is one of most pervasive phenomena of human society it is probably one of the least understood concepts The growth of transnational corporations the dominance of world wide financial and political institutions and the extensive influence of media that are nearly monopolized by corporate interests are

key factors shaping our global society today In the growing concentration of power in few hands what is apparent is a non apparent nature of power Understanding the interplay of power in the discourse of development is a crucial matter at a time when our planet is in peril both environmentally and socially This book addresses this current crucial need

**Cooperatives, the State, and Corporate Power in African Export Agriculture** Karin Wedig, 2019-02-22 Agriculture is a major contributor to Africa's GDP the region's biggest source of employment and its largest food producer However agricultural productivity remains low and buyer driven global value chains offer few opportunities for small producers to upgrade into higher value added activities In recent years the revival of Africa's cooperatives has been celebrated by governments and international donors as a pathway towards inclusive agricultural development and this book explores the strengths but also the issues which surround these cooperatives The book scrutinizes the neoliberal ideal of economic prosperity arising through the operation of liberalized labor markets by illuminating the discriminatory nature of Uganda's informal labor relations It points to the role of cooperatives as a potential instrument of progressive change in African export agriculture where large numbers of small producers depend on casual wage work in addition to farming In contrast to the portrayal advanced by some governments and rarely questioned by donors of an unproblematic co existence of small producers collective action and big capital interests the author calls for a re politicized debate on the Social and Solidarity Economy As part of this she highlights the adverse political and economic conditions faced by African cooperatives including intense international competition in agricultural processing inadequate access to infrastructure and services and at times antagonistic state cooperative relations Supported by wide ranging interdisciplinary evidence including new ethnographic survey and interview data this book shows how cooperatives may be co opted by both the state and corporations in a discourse that ignores structural inequalities in value chains and emphasizes poverty reduction over economic and political empowerment It provides a critique of New Institutional Economics as a framework for understanding how institutions shape redistribution and develops a political economy approach to explore the conditions for structural change in African export agriculture

**The Institutional Foundation of Economic Development** Shiping Tang, 2022-09-06 A systemic account of how institutions shape economic development Institutions matter for economic development Yet despite this accepted wisdom new institutional economics NIE has yet to provide a comprehensive look at what constitutes the institutional foundation of economic development IFED Bringing together findings from a range of fields from development economics and development studies to political science and sociology The Institutional Foundation of Economic Development explores the precise mechanisms through which institutions affect growth Shiping Tang contends that institutions shape economic development through four Big Things possibility incentive capability and opportunity From this perspective IFED has six major dimensions political hierarchy property rights social mobility redistribution innovation protection and equal opportunity Tang further argues that IFED is only one pillar within the New Development Triangle NDT sustained economic

development also requires strong state capacity and sound socioeconomic policies Arguing for an evolutionary approach tied to a country's stage of development The Institutional Foundation of Economic Development advances an understanding of institutions and economic development through a holistic interdisciplinary lens Technology and Sustainable Development Henrik Skaug Sætra, 2023-04-14 Technological change is at the core of all major disruptions in human history and revolutions wars and general development are regularly connected to some sort of technological change However not all development is beneficial While technology has fueled great innovations and rapid development the notion of sustainable development has gained prominence as we now experience serious social economic and environmental challenges This book examines whether technology can be used to fix the very problems caused by technology as the various chapters examine different aspects related to how technology has brought us where we are today which some will say is the best place humanity's been at according to a range of metrics and whether technology helps or hinders us in our efforts to solve the challenges we currently face The issues discussed cover the three sustainability dimensions and include topics such as the materiality of AI technology in education AI for gender equality innovation and the digital divide and how technology relates to power the political system and capitalism The chapters all build on the theoretical backdrop of technological change sustainable development and the UN's Sustainable Development Goals are actively used throughout this book both to examine how these goals capture or overlook central elements of sustainable development and also to facilitate and create a common framework of engagement between the chapters This book provides a novel combination of traditional theories that are explored through different case studies providing the ground for a better understanding of how and when technology can and cannot be the enabler of sustainable development It is thus an important resource for students of all disciplines technologists and those developing and applying new technologies It is also a valuable resource for politicians and regulators attempting to harness the power of technology for good while limiting its negative potential The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license Funded by stfold University College

addressing the specific problems of the knowledge systems being targeted for support After reviewing the evidence the book recommends that international organisations governments and practitioners move away from the belief that information intermediaries can employ progressive correctives to tinker at the edges and thus resolve the shortcomings of on going attempts to use knowledge alone as a driver of development Gender Power and Knowledge for Development will be of great interest to researchers students in development studies gender studies and communication studies as well as INGOs donor agencies and groups engaged in information for development i4D ICT for development ICT4D Tech4Dev knowledge mobilization and knowledge for development K4D **Speaking Justice to Power** Kim Forss,2017-09-08 Efficiency economy and equity are policy goals pursued by governments around the world but analysts and evaluators have devoted more effort to measuring and evaluating the first two In Speaking Justice to Power contributors examine the concept of equity the role it plays and its application in policy evaluation Here some of the most valuable thinkers in the area of policy studies address key questions How should evaluators develop criteria for measuring equity as they analyze both program and policy implementation as well as their impacts What distinctions among people should be taken into account when measuring and valuing impacts What sorts of data should be used to analyze processes and impacts in different settings How might such data be validated The contributors employ grounded theory thinking as they translate key ethical principles into their work and draw important lessons from their experiences The work discusses equity in interventions addressing a variety of social and environmental problems This volume continues the fine tradition of Transaction s Comparative Policy Evaluation series
