Authoritarianism and Class in American Political Fiction David Smit, 2022-05-31 This book analyzes what many critics consider to be the three best examples of modern American political fiction Robert Penn Warren's All the King's Men Edwin O'Connor's The Last Hurrah and Billy Lee Brammer's The Gay Place to address a specific problem in American governance how the intense competition for power among elite factions often results in their ignoring major groups of their constituents thereby providing political bosses with a rationale to seize authoritarian control of the government in the name of constituent groups who feel ignored or neglected promising them more democratic rule but in the process excluding other groups so that the bosses themselves become elitist ruling only for the sake of some constituents and not others

Climate Fiction and Cultural Analysis Gregers Andersen, 2019-09-25 Climate Fiction and Cultural Analysis argues that the popularity of the term climate fiction has paradoxically exhausted the term's descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots this book sets out to salvage the term's speculative quality It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated Focusing primarily on English and German language fictions Climate Fiction and Cultural Analysis shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms This book will be of great interest to students and scholars of ecocriticism the environmental humanities and literary and culture studies more generally
