Field Experiments And Measurement Programs In Geomorphology:

Field Experiments and Measurement Programs in Geomorphology Olav Slaymaker, 1991-01-01 A typology of experimentation in the field of geomorphology This typology is then applied to problems of total drainage basin change and subsets of processes of change associated with slopes and channels Contents Introduction The nature of geomorphic field experiments Drainage basin studies Rapid mass movement Surface wash Fluvial geomorphology **Geomorphological Fieldwork**, 2014-12-06 Geomorphological Fieldwork addresses a topic that always remains popular within the geosciences and environmental science More specifically the volume conveys a growing legacy of field based learning for young geomorphologists that can be used as a student book for field based university courses and postgraduate research requiring fieldwork or field schools The editors have much experience of field based learning within geomorphology and extend this to physical geography The topics covered are relevant to basic geomorphology as well as applied approaches in environmental and cultural geomorphology The book integrates a physical human approach to geography but focuses on physical geography and geomorphology from an integrated field based geoscience perspective Addresses fluvial and karst landscapes in depth Focuses on field based learning as well as educational geomorphology Conveys experiential knowledge in international contexts *GEOGRAPHY - Volume I* Maria Sala ,2009-07-17 Geography is a component of Encyclopedia of Earth and Atmospheric Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Geographical perceptions can be traced from very ancient cultures although geography as a science started its development during the eighteen century it was firmly established after the Darwinian revolution and many of its fundamentals appeared during the nineteenth century The history of geography is closely connected with the history of human society Geography embraces both the physical and human worlds and aims to bridge natural and human sciences For a geographer although the environment and its conservation is a crucial item it is also fundamentally concerned with the living standards of humankind Although its wide embrace may be seen as a weakness diversification is also strength and an attraction Approaches are multidisciplinary exploring the complex linkages between the cultural and the natural These favor cross cultural communication and mutual understanding at a global scale There is a geographical basis to most of the outstanding political problems and geographical reasons to explain them The subject matter of the geography theme is presented basically on how the subject matter is taught presently at the universities and following the many paths its practitioners are following in doing research It introduces modern subject matters and goes much further than a simple description of places and travels The theme has been divided into four main topics Foundations Physical Geography Human Geography and Technical matters The scope of the foundation topic is to present an overview of the basis of the geographical field its scope history methods and its importance in education The chapters included are Main Stages of the Development Theory and Methods and Geographical Education The Physical Geography topic includes the historical background of the

geographical study of the Earth natural environment and the main fields cultivated by geographers It consists of eight chapters on basic research fields which are Geomorphology Climatology Hydrology Biogeography Soil Geography Coastal Systems Ocean Geography Mountain Geocology and two chapters on environmental issues Natural Hazards and Land Degradation and Desertification In the Human Geography topic six chapters discuss the more current fields that is Population Cultural and Social Agricultural and Rural Industries and Transport Economic Activities and Urban Geography Three chapters present subjects developed more recently Medical Political and Tourism geographies Finally the Regional approach is presented as the most traditional and integrative field These volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

Experiments in Reduced Gravity Nikolaus Kuhn,2014-09-06 Experiments in Reduced Gravity Sediment Settling on Mars is the first book to be published that reflects experiments conducted on Martian geomorphology in reduced gravity This brief yet important book on sediment experiments assesses the theoretical and empirical foundation of the models used to analyze the increasing information we have on the past geography on Mars The book also evaluates the need to develop new methods for analyzing new information by providing a conceptual outline and a case study on how experiments can be used to test current theoretical considerations The conceptual approach to identifying the need for and role of experiments will be of interest to planetary scientists and geoscientists not necessarily involved with Mars but those using experiments in their research who can apply the book s concepts Includes figures diagrams illustrations and photographs to vividly explore experiments and outcomes in reduced gravity Provides an outline of planned experiments and questions related to Martian geomorphology Features results from the MarsSedEx 1 Experiment in 2012

Environmental Management of River Basin Ecosystems Mu. Ramkumar,K Kumaraswamy,R. Mohanraj,2015-02-18 This book offers a unique collection of inter and multidisciplinary studies on river systems Rivers have been the prime source of sustenance since the advent of civilization and river systems often form the basis for agriculture transport water and land for domestic commercial and industrial activities fostering economic prosperity A river basin is a basic geographical and climatological unit within which the vagaries of natural processes act and manifest themselves at different spatio temporal scales Even if compared side by side no two river basins respond to natural processes in the same way and thus it has long been recognized that each river basin is unique Hence any developmental activity or conservation effort has to be designed and implemented to match each unique river basin With the burgeoning population and increasing dependency on natural resources understanding and maintaining river systems has become increasingly important This book provides a varied reference work on and unprecedented guidelines for conducting and implementing research on river basins and for managing their ecological development

Biogeomorphology, Terrestrial and Freshwater Systems C.R. Hupp, Waite Osterkamp, A.D. Howard, 2012-12-02 Biogeomorphology a relatively new term refers to relations between the biota and geomorphic form and process Ecology is the study of organisms in relation to their physical and biotic environment Thus ecogeomorphology could have been an equally acceptable name for this publication which stresses the ecological aspects of the larger field of biology Most of the articles relate vegetation to fluvial geomorphology erosion and sedimentation However articles showing the significance of animal ecological studies and their bearing on geomorphic form and process are also included Geographically the papers range from arid areas in the American Southwest and Israel to the new world tropics Most articles however are concerned with temperate areas of North America and Western Europe This is among the first books to approach the role that biota and ecology play in geomorphic processes and should be on the shelf of every landscape ecologist
