International Conference on Rotor Dynamics - IFToMM Katia Lucchesi Cavalca,Hans Ingo Weber,2018-08-20 IFToMM

conferences have a history of success due to the various advances achieved in the field of rotor dynamics over the past three decades. These meetings have since become a leading global event bringing together specialists from industry and academia to promote the exchange of knowledge, ideas and information on the latest developments in the dynamics of rotating machinery. The scope of the conference is broad, including e.g. active components and vibration control, balancing, bearings, condition monitoring, dynamic analysis and stability, wind turbines and generators, electromechanical interactions in rotor dynamics and turbochargers. The proceedings are divided into four volumes. This fourth volume covers the following main topics: aero engines, turbochargers, eolian wind generators, automotive rotating systems and hydro power plants.

Mechanical Sciences - Mashinovedeniye, 1981 Applied Mechanics Reviews, 1973 **Dynamics of Vehicles on Roads and Tracks Vol 2** Maksym Spiriyagin, Timothy Gordon, Colin Cole, Tim McSweeney, 2017-12-06. The International Symposium on Dynamics of Vehicles on Roads and Tracks is the leading international gathering of scientists and engineers from academia and industry in the field of ground vehicle dynamics to present and exchange their latest innovations and breakthroughs. Established in Vienna in 1977, the International Association of Vehicle System Dynamics (IAVSD) has since held its biennial symposia throughout Europe and in the USA, Canada, Japan, South Africa and China. The main objectives of IAVSD are to promote the development of the science of vehicle dynamics and to encourage engineering applications of this field of science to inform scientists and engineers on the current state of the art in the field of vehicle dynamics and to broaden contacts among persons and organisations of the various countries engaged in scientific research and development in the field of vehicle dynamics and related areas. IAVSD 2017, the 25th Symposium of the International Association of Vehicle System Dynamics, was hosted by the Centre for Railway Engineering at Central Queensland University, Rockhampton, Australia, in August 2017. The symposium focused on the following topics related to road and rail vehicles and trains: dynamics and stability, vibration and comfort, suspension, steering, traction and braking, active safety systems, advanced driver assistance systems, autonomous road and rail vehicles, adhesion and friction, wheel-rail contact, tyre-road interaction, aerodynamics and crosswind, pantograph-catenary dynamics, modelling and simulation, driver-vehicle interaction, field and laboratory testing, vehicle control and mechatronics, performance and optimization, instrumentation and condition monitoring and environmental considerations. Providing a comprehensive review of the latest innovative developments and practical applications in road and rail vehicle dynamics, the 213 papers now published in these proceedings will contribute greatly to a better understanding of related problems and will serve as a reference for researchers and engineers active in this specialised field. Volume 2 contains 135 papers under the subject heading Rail. **Mechcomp2** Antonio J.M. Ferreira, Ana M.A. Neves, Erasmo Viola, Francesco Tornabene, Nicholas Fantuzzi, 2016-05-20. Composites materials have aroused a great interest over the last few decades. Several applications of fibrous composites, functionally graded materials, laminated composites, nano-structured reinforcements, morphing structures can be found in many engineering fields such as aerospace, mechanical,

naval and civil engineering The necessity of lightweight structures smart and adaptive systems high level strength have led both the academic research and the manufacturing development to a recurring employment of these materials Many journal papers and technical notes have been published extensively over the last seventy years in international scientific journals of different engineering fields For this reason the establishment of this second edition of Mechanics of Composites International Conference has appeared appropriate to continue what has been begun during the first edition occurred in 2014 at Stony Brook University USA MECHCOMP wants to be an occasion for many researchers from each part of the globe to meet and discuss about the recent advancements regarding the use of composite structures As a proof of this event which has taken place in Porto Portugal selected plenary and key note lectures have been collected in the present book [NASA Tech Briefs](#),1990
