Flood Disaster:

Washed Away by Floods Charles Hofer, 2017-12-15 When thinking about natural disasters floods probably aren't the first thing that come to mind. However, a sudden rise in water level can cause great destruction and even death. This book explores where and why floods occur and features photographs of the incredible damage they can cause. Readers will learn how people survived some of the worst floods in recent history as well as new prediction methods to help avoid the damage and destruction floods can cause. This book was designed to support the elementary earth science curricula and STEM topics are covered throughout.

Floods Michael Woods, Mary B. Woods, 2007-01-01 A flood can occur instantly from ocean waves that wash over land. Or it can begin slowly with a rainfall lasting many hours. Regardless, terrible disasters can occur whenever too much water rushes into or slowly gathers in the wrong place. Rushing water can sweep buildings off foundations. People must quickly leave their homes and possessions to seek safety. Some drown before they can escape. With dramatic images and firsthand survivor stories plus the latest facts and figures, this book shows you flood disasters up close.

Floods Dennis J. Parker, 2000 A comprehensive collection of new research. An extensive range of case studies covering major floods and regions prone to flooding worldwide.

The contributors present guidelines for assessing the affected population's health care needs, establishing priorities, allocating resources, and treating individuals. Coverage encompasses a wide range of natural, industrial, technologic, transportation-related, and conflict-related disasters with examples from around the world. This edition has more illustrations and more information on weapons of mass destruction and explosions.

Floods Joanne Mattern, 2019-03-27 Most of the time water is a good thing. However, too much water can be a very dangerous thing. Floods are deadly. Every year, thousands of people around the world are killed or injured in floods. Some people drown when they are swept away by the water. Others are killed by debris in the water. It is important to learn all you can about floods so you will know how to deal with this devastating disaster. This title will allow students to describe the overall structure, e.g., chronology, comparison, cause-effect, problem-solution, of events, ideas, concepts, or information in a text or part of a text. **Bolded keywords** Text-based questions Content Sidebars Disaster guide
