Thakali identity is like the Kali Gandaki river that flows through the putative Thakali homeland of Thaksatsae: made up of several ever-changing, interlinked strands of various breadth and strength, which appear differently depending on the season and the subjective perspective of the observer. William Fisher's long-awaited monograph both begins and ends with this metaphor, which provides the conceptual framework for his richly-textured discussions of the cultural, religious, economic, and political strands that come together in the historical process of Thakali identity formation. Even the book's structure itself echoes Fisher's metaphor of choice, with each of nine chapters forming a current in the narrative river, better approached as a multi-faceted set of essays which complement and in some cases overlap (or even contradict each other), rather than a linear argument which builds to a unified crescendo. Each chapter engages in detail with a different aspect of Himalayan anthropology's history, taking an important step away from the single-village/single-culture approach to offer an incisive yet respectful critique of the sub-discipline's founding assumptions. As a whole, the book constitutes a valuable ethnographic contribution to the broader anthropological study of ethnicity, reaffirming Nepal's traditional image as a prime location for the study of such issues, but for new reasons.

Fisher's central propositions, as articulated in the introductory chapter, are that past scholarly approaches to the diverse array of peoples who call themselves 'Thakali' have overemphasized (1) the homogeneity of the group; (2) their economic success; and (3) their dramatic cultural metamorphosis. To counter these misrepresentations, he argues that the Thakali are actually a heterogeneous collection of people more divided than united by descent, residence and religion; belonging to several different class and social strata; and in touch with their past as much as they are transformed by the present. "My aim is to account for both change and continuity" (p. 7) Fisher writes, which he does by refocusing on ethnicity as process rather than product, or to put it more precisely, as a "social construction" forged by indigenous agents through historical processes. Fisher admits openly that this theoretical perspective was not always welcomed by his Thakali friends, and one of the most laudable aspects of the book is Fisher's honest

Fluid Boundaries William F. Fisher, 2001-12-24 More than an ethnography this book clarifies one of the most important current debates in anthropology How should anthropologists regard culture history and the power process Since the 1980s the Thakali of Nepal have searched for an identity and a clarification of their true culture and history in the wake of their rise to political power and achievement of economic success Although united in this search the Thakali are divided as to the answers that have been proposed the Hinduization of religious practices the promotion of Tibetan Buddhism the revival of practices associated with the Thakali shamans and secularization Ironically the attempts by the Thakali to define their identity reveal that to return to tradition they must first re create it but this process of re creation establishes it in a way in which it has never existed To return to tradition to become Thakali again is in a way to become Thakali for the very first time
