Major,2011-04-13 In Grounded Vision William Major puts contemporary agrarian thinking into a conciliatory and productive dialogue with academic criticism He argues that the lack of participation in academic discussions means a loss to both agrarians and academics since agrarian thought can enrich other ongoing discussions on topics such as ecocriticism postmodernism feminism work studies and politics especially in light of the recent upsurge in grassroots cultural and environmental activities critical of modernity such as the sustainable agriculture and slow food movements     American Georgics Edwin C. Hagenstein,Sara M. Gregg,Brian Donahue,2011-01-01 From Thomas Jefferson s Monticello to Michelle Obama s White House organic garden the image of America as a nation of farmers has persisted from the beginnings of the American experiment In this rich and evocative collection of agrarian writing from the past two centuries writers from

Hector St Jean de Crevecoeur to Wendell Berry reveal not only the great reach and durability of the American agrarian ideal but also the ways in which society has contested and confronted its relationship to agriculture over the course of generations. Drawing inspiration from Virgil's agrarian epic poem *Georgics*, this collection presents a complex historical portrait of the American character through its relationship to the land. From the first European settlers eager to cultivate new soil to the Transcendentalist utopian and religious thinkers of the nineteenth century, American society has drawn upon the vision of a pure rural life for inspiration. Back to the land movements have surged and retreated in the past centuries yet provided the agrarian roots for the environmental movement of the past forty years. Interpretative essays and a sprinkling of illustrations accompany excerpts from each of these periods of American agrarian thought, providing a framework for understanding the sweeping changes that have confronted the nation's landscape.
