The Tudor Occupation of Boulogne Neil Murphy, 2019-02-07 In 1544 Henry VIII led the largest army then ever raised by an English monarch to invade France This book investigates the consequences of this action by examining the devastating impact of warfare on the native population the methods the English used to impose their rule on the region from the use of cartography to the construction of fortifications and the development of English of colonial rule in France As Murphy explores the significance of this major financial and military commitment by the Tudor monarchy he situates the developments within the wider context of English actions in Ireland and Scotland during the mid sixteenth century Rather than consider the plantations established in the mid sixteenth century Ireland as the laboratory for a new form of empire this book argues that they should be viewed along with the Boulogne venture as the English crown s final attempt to establish colonies through the use of state resources alone

Manors and Maps in Rural England, from the Tenth Century to the Seventeenth P.D.A. Harvey, 2023-05-31 P D A Harvey is a historian of medieval rural England with a wide interest in the history of cartography this collection of his essays brings together both these strands It first looks at the English countryside from the 10th century to the 15th investigating problems in particular documents in the village community and in underlying long term changes How landlords drew profits from their property in the eleventh and twelfth centuries how and why there followed changes in the way landed estates were run and in the written records they produced what new light their personal seals can throw on medieval peasants are all among the topics discussed while the local management of large estates and the development of the peasant land market are themes that recur throughout There follow essays on the way maps were brought into the management of landed estates in the 16th and 17th centuries starting with the introduction of consistent scale into mapping a new concept crucially important in the general history of topographical maps The collection closes by looking at some of the traps that both documents and maps set for the historian of the English countryside **Gabriel**

Britain and the Netherlands A. C. Duke, 2012-12-06 War has ever exercised a great appeal on men's minds Oscar Wilde's witticism notwithstanding this fascination cannot be attributed simply to the wicked character of war The demonic forces released by war have caught the artistic imagination while sages have reflected on the enigmatic readiness of each new generation to wage war despite the destruction disillusion and exhaustion that war is known to bring in its train If there never was a good war and a bad peace why did armed conflicts recur with such distressing regularity Was large scale violence an intrinsic condition of Man The answers given to such questions have differed widely it has even been suggested

that the states of war and peace are not as far removed from one another as is usually supposed The causes of war and the interaction between war and society have long been the subject of philosophical enquiry and historical analysis According to Thucydides no one was ever compelled to go to war Cicero remarked how dumb were the laws in time of war while Clausewitz's profound observation concerning the affinity between war and politics has become almost a commonplace War being the severest test a society or state can experience historians have naturally been concerned to investigate their relationship
