La Tentation Dexister:

La Tentation D'exister E. M. q (Emile M.) Cioran (d),1956 **The Temptation to Exist** E. M. Cioran,2013-02-01 This collection of eleven essays originally appeared in France thirty years ago and created a literary whirlwind on the Left Bank Cioran writes incisively about Western civilizations the writer the novel mystics apostles and philosophers The Temptation to Exist first introduced this brilliant European thinker twenty years ago to American readers in a superb translation by Richard Howard This literary mystique around Cioran continues to grow and The Temptation to Exist has become an underground classic In this work Cioran writes about Western civilizations the writer the novel about mystics apostles philosophers For those to whom the very word philosophy brings visions of arduous reading be assured Cioran is crystal clear his style quotable and aphoristic A sort of final philosopher of the Western world His statements have the compression of poetry and the audacity of cosmic clowning The Washington Post , **The Preparation of the Novel** Roland Barthes,2011 Completed just weeks before his death the lectures in this volume mark a critical juncture in the career of Roland Barthes in which he declared the intention deeply felt to write a novel Unfolding over the course of two years Barthes engaged in a unique pedagogical experiment he combined teaching and writing to simulate the trial of novel writing exploring every step of the creative process along the way Barthes s lectures move from the desire to write to the actual decision making planning and material act of producing a novel He meets the difficulty of transitioning from short concise notations exemplified by his favorite literary form haiku to longer uninterrupted flows of narrative and he encounters a number of setbacks Barthes takes solace in a diverse group of writers including Dante whose La Vita Nuova was similarly inspired by the death of a loved one and he turns to classical philosophy Taoism and the works of Fran ois Ren Chateaubriand Gustave Flaubert Franz Kafka and Marcel Proust This book uniquely includes eight elliptical plans for Barthes s unwritten novel which he titled Vita Nova and lecture notes that sketch the critic s views on photography Following on The Neutral Lecture Course at the Coll ge de France 1977 1978 and a third forthcoming collection of Barthes lectures this volume provides an intensely personal account of the labor and love of writing *The Age of Rights* Norberto Bobbio,2017-06-12 This book presents a valuable clarification and defence of human rights by Italy s leading political theorist Thought as Experience in Bataille, Cioran, and Rosset Joseph Acquisto,2024-06-13 Examines how postwar French writers constitute the thinking subject and reshape its relation to the external social world Joseph Acquisto analyzes the writings of three thinkers during and shortly after the Second World War who address the question of what it means to think and what it means to constitute oneself as a thinking subject at a time that seems to come after everything with the ruins of attacked cities echoing the remains of a philosophical tradition that was confident in its establishment of human beings as rational of reason leading to progress and of both the self and the world as knowable What Georges Bataille calls inner experience and Emil Cioran labels thinking against oneself is something akin to a drama not a mere representation of the self in relation to the world but a process of remapping the relation of subject to

object of thought dialectically Acquisto argues that both writers adopt an anti systematic approach to thinking that implicates fragmentary writing as a way of turning answers about subject object relations into questions Acquisto contends that this stands in contrast to the approach of Clement Rosset whose affirmation of the inaccessibility of the real leads to an anti intellectual grace filled affirmation of life as it is given under the guise of what he calls the tragic Bringing together thinkers that have seldom been discussed in a comparative light Thought as Experience in Bataille Cioran and Rosset examines the affective dimensions of thought as experience and considers the political stakes of postwar thought as out of order with the world from which it springs

Inventing the Jew Andrei Oisteanu, 2009-05-01 Inventing the Jew follows the evolution of stereotypes of Jews from the level of traditional Romanian and other Central East European cultures their legends fairy tales ballads carols anecdotes superstitions and iconographic representations to that of high cultures including literature essays journalism and sociopolitical writings showing how motifs specific to folkloric antisemitism migrated to intellectual antisemitism This comparative perspective also highlights how the images of Jews have differed from that of other strangers such as Hungarians Germans Roma Turks

Lawrence Durrell, Postmodernism and the Ethics of Alterity Stefan Herbrechter, 1999 This book is of interest for any reader wishing to explore the interface between literature and critical and cultural theory It investigates the notions of alterity which underlie the work of Lawrence Durrell and postmodernist theory Grass Irmgard Elsner Hunt

Complexity of the Self V. F. Guidano, 1987-05-09 In this profound work Vittorio Guidano expands upon his earlier seminal contributions on the application of cognitive and developmental principles to individuals struggling with various forms of psychopathology Here he fully develops the idea that individuals experience both positive and negative are powerfully influenced by their personal psychological organizations Focusing primarily on the eating disorders the phobias with agoraphobia as the prototype obsessive compulsive patterns and depression Guidano illustrates how early developmental experiences and ongoing psychological processes may collude to perpetuate dysfunctional patterns and personal distress The central and perhaps most exciting thesis in this new expression of Guidano's thinking is that the deep structure or core organizing processes that constrain human psychological experience may be at the heart of successful intervention as well as the classical problems of resistance relapse and refractory behaviors Guidano's contention is at once simple and powerful those psychological processes involved in the development and maintenance of personal identity or self that should be the primary foci of research and intervention in psychological disorders The meaning of Guidano's perspective for clinical practice is perhaps best expressed in the author's own words Knowing the basic elements of the personal cognitive organization that underlie the pattern of disturbed behavior and emotions the therapist can behave from the beginning in such a way as to build a relationship as effective as possible for that particular client In other words the therapist should be able to establish a relationship that respects the client's personal identity and systemic coherence and that at the same time does not confirm the basic pathogenic assumptions For example in working with agoraphobics the

therapist has to respect their self images centered on the need to be in control He she can do this by avoiding any direct attack on their controlling attitudes and by leaving them a wide margin of control in the relationship At the same time the therapist should avoid confirming their assumptions about the somatic origin of their emotional disturbances or about their inborn fragility In short the therapist who can anticipate the models of self and reality tacitly entertained by the client is surely better able to help the development of a cooperative and secure therapeutic relationship than the therapist who cannot make such anticipations This timely and provocative volume offers exciting new ideas about how to conceptualize and facilitate change in the self system With the rare combination of his Renaissance intellect and integrative practical expertise Guidano has been able to draw together many disparate themes from object relations theory ego psychology attachment theory constructivist models of human cognition and lifespan developmental psychology It is must reading for the practicing professional the helping apprentice and anyone interested in glimpsing the cutting edge at the growing interface between cognitive and clinical science

Beckett and Cioran Steven Matthews,2024-05-08 This Element discusses the association between Samuel Beckett and the Romanian born philosopher E M Cioran It draws upon the known biographical detail but more substantially upon the terms of Beckett s engagement with Cioran s writings from the 1950s to the 1970s Certain of Cioran s key conceptualisations such as that of the metequ and his version of philosophical scepticism resonate with aspects of Beckett s writing as it evolved beyond the siege in the room More particularly aspects of Cioran s conclusion about the formal nature that philosophy must assume chime with some of the formal decisions taken by Beckett in the mid late prose Through close reading of some of Beckett s key works such as *Texts for Nothing* and *How It Is* and through consideration of Beckett s choices when translating between English and French the issues of identity and understanding shared by these two settlers in Paris are mutually illuminated

J.M. Coetzee and Neoliberal Culture Andrew Gibson,2022-08-11 This book presents J M Coetzee s work as a complex nuanced counterblast to contemporary global neoliberal economics and its societies Not surprisingly given his many years in South Africa and Australia Coetzee writes from a global Southern perspective Drawing on a wealth of literature philosophy and theory the book reads Coetzee s writings as a discreet oblique but devastating engagement with neoliberal presumptions It identifies and focuses on various key features of neoliberal culture its obsession with self enrichment mastery growth its belief in plenitude endless resources its hubris and obsession with self promotion its desire for ease and easiness well being euphoria its fetishization of managerial reason and the culture of security its unrelenting positivity its belief in illusory goods and trivial progressivisms By contrast Coetzee s writings explore the virtues of irony and self reduction He commits himself to difficulty discomfort patient and austere if bleak inquiry rigorous questioning and radical doubt Destitution and failure come to look like a serious dignified form of life and thought The very tones of Coetzee s books run counter to those of our neoliberal democracies They point in a different direction to an age that has gone astray

Heidegger and the Political Miguel de Beistegui, 2002-09-11 Recent studies of Heidegger's involvement with National Socialism have often presented Heidegger's philosophy as a forerunner to his political involvement This has occurred often to the detriment of the highly complex nature of Heidegger's relation to the political Heidegger and the Political redresses this imbalance and is one of the first books to critically assess Heidegger's relation to politics and his conception of the political Miguel de Beistegui shows how we must question why the political is so often displaced in Heidegger's writings rather than read the political into Heidegger Exploring Heidegger's ontology where politics takes place after a forgetting of Being and his wish to think a site more originary and primordial than politics Heidegger and the Political considers what some of Heidegger's key motifs his emphasis on lost origins his discussions of Holderlin's poetry his writing on technology and the ancient Greek polis may tell us about Heidegger's relation to the political Miguel de Beistegui also engages with the very risks implicit in Heidegger's denial of the political and how this opens up the question of the risk of thinking itself Heidegger and the Political is essential reading for students of philosophy and politics and all those interested in the question of the political today
