La2 What Moves Fast:

P=la2 - Where P Is Pain Judith Roberts, 2008-03-27 This stylish psychological thriller is set in a sleepy English seaside town in 1981 Susan is searching for a haven to recover from her stormy past and as she settles beside the cosy fire with her books she feels she has found the perfect home Her apartment has stunning views of the ever changing sea and shore seagulls circling overhead and the purple brooding Scottish mountains in the distance There is even an intriguing mystery Who is the woman upstairs softly pacing behind lace shrouded windows And who is the captivatingly attractive man who often visits her Susan is enraptured when she finally meets him unaware of the maelstrom of passion and deceit that he will draw her into pushing her to the very edge of insanity Eventually she is driven to desperate measures to break free of her obsessive infatuation This vivid tale combines frightening realism with a dark comic element Ponder its chilling formula put it down if you can

Heavy Weather Avoidance and Route Design Mike Ma-Li Chen, Lee S. Chesneau, 2008-10 In Heavy Weather Avoidance Chen and Chesneau merge the seamanship of a master mariner and the forecast expertise of a senior meteorologist providing readers with double barrel exposure to what actually goes on in the atmosphere and on the sea's surface Mariners and recreational sailors are more concerned about the implications of volatile weather rather than its fluid dynamics From start to finish the authors have cut to the chase creating a readable text brimming with useful graphics It's focused on the root cause of how and why bad weather develops and where it's likely to go There's enough theory provided for a reader to get a feel for how air mass energy transfer works but just as the theoretical aspect takes on a mission of its own there's a shift to more practical self forecasting and storm avoidance wisdom Captain Ma Li Chen shares his well tested routing strategy and describes how it factors in the use of the 500 Mb chart *International Commerce*, 1966

Searching for 2D Superconductivity in La2-xSrxCuO4 Single Crystals Itzik Kapon, 2019-07-11 A new experimental method the Stiffnessometer is developed to measure elementary properties of a superconductor including the superconducting stiffness and the critical current This technique has many advantages over existing methods such as the ability to measure these properties while minimally disturbing the system the ability to measure large penetration depths comparable to sample size as necessary when approaching the critical temperature and the ability to measure critical currents without attaching contacts and heating the sample The power of this method is demonstrated in a study of the penetration depth of LSCO where striking evidence is found for two separate critical temperatures for the in plane and out of plane directions The results in the thesis are novel important and currently have no theoretical explanation The stiffnessometer is a tool with great potential to explore new grounds in condensed matter physics **JJAP**, 2007

Babylonian Mathematical Astronomy: Procedure Texts Mathieu Ossendrijver, 2012-04-24 This book contains new translations and a new analysis of the procedure texts of Babylonian mathematical astronomy the earliest known form of mathematical astronomy of the ancient world The translations are based on a modern approach incorporating recent insights

from Assyriology and translation science The work contains updated and expanded interpretations of the astronomical algorithms and investigations of previously ignored linguistic mathematical and other aspects of the procedure texts Special attention is paid to issues of mathematical representation and over 100 photos of cuneiform tablets dating from 350 50 BCE are presented In 2 3 years the author intends to continue his study of Babylonian mathematical astronomy with a new publication which will contain new editions and reconstructions of approx 250 tabular texts and a new philological astronomical and mathematical analysis of these texts Tabular texts are end products of Babylonian math astronomy computed with algorithms that are formulated in the present volume Procedure Texts
