The Challenge of Child Labour in International Law Franziska Humbert,2009-08-27 Franziska Humbert analyses how the prohibition of child labour is protected under international law and proposes an agenda for reform      The Economics of Labor Law Keith N. Hylton,2024-11-08 In terms familiar to economists this book provides a positive theory of labor law and dissects the fundamental theoretical issues that shape labor law doctrine It investigates the deep economic tensions influencing judicial opinions in labor law and how these can predict the outcomes of relevant legal doctrine and determine whether it accomplishes its regulatory goals      **Exit Polder Model?** Lei Delsen,2002-12-30 To what does the Netherlands

owe their recent economic success Will the polder model become the victim of its own success or will the threat come mainly from outside In the Netherlands polder are small communities hemmed in by dykes built to resist quickly rising tides and hence imply communal effort to mediate harmful outside forces Translated into economic terms the polder model entailed tripartite cooperation between business government and labor to protect the nation s economic and social well being Delsen evaluates recent changes in the Dutch economy brought on by globalization and American dominance and concludes that the polder model is reaching its end Delsen argues that the market forces introduced by the purple governments imply a far reaching adaptation of the unique Dutch economic order The primacy of the market has resulted in a more flexible labor market decentralization of the wage formation modernization of the social security system more competition on the goods markets and liberalization and competition in the financial markets More market forces within Dutch socioeconomic relations imply also that the aims of trade and industry have changed and have become oriented toward short term results and away from actions aimed at long term continuity and consensus      The European Private International Law of Employment

Uglješa Grušić,2015-05-28 The European Private International Law of Employment provides a descriptive and normative account of the European rules of jurisdiction and choice of law which frame international employment litigation in the courts of EU Member States The author outlines the relevant rules of the Brussels I Regulation Recast the Rome Regulations the Posted Workers Directive and the draft of the Posting of Workers Enforcement Directive and assesses those rules in light of the objective of protection of employees By using the UK as a case study he also highlights the impact of the Europeanisation of private international law on traditional perceptions and rules in this field of law in individual Member States For example the author demonstrates that the private international law of the EU is fundamentally reshaping English conflict of laws by almost completely merging the traditionally perceived contractual statutory and tortious claims into one claim for choice of

law purposes
