## **John Macmurray:**

**John Macmurray's Religious Philosophy** Esther McIntosh, 2016-05-06 Recent dissatisfaction with individualism and the problems of religious pluralism make this an opportune time to reassess the way in which we define ourselves and conduct our relationships with others The philosophical writings of John Macmurray are a useful resource for performing this examination and recent interest in Macmurray's work has been growing steadily A full scale critical examination of Macmurray's religious philosophy has not been published and this work fills this gap sharing his insistence that we define ourselves through action and through person to person relationships while critiquing his account of the ensuing political and religious issues The key themes in this work are the concept of the person and the ethics of personal relations **John Macmurray's Religious Philosophy** Esther McIntosh, 2011 A full scale critical examination of Macmurray's religious philosophy has not been published and this work fills this gap sharing his insistence that we define ourselves through action and through person to person relationships while critiquing his account of the ensuing political and religious issues The key themes in this work are the concept of the person and the ethics of personal relations John Macmurray John Macmurray, 2004 No further information has been provided for this title **John Macmurray in a Nutshell** David Fergusson, 1992-01-01 An overview of the life and thought of influential Scottish thinker and Christian practitioner John MacMurray **Learning to be Human: The Educational Legacy of John MacMurray** Michael Fielding, 2016-04-14 The educational writings of John Macmurray one of the finest 20th century philosophers of his generation have a special relevance for us today In similar circumstances of international crisis he argued for the central importance of education addressing fundamental issues of human purpose how we lead good lives together the emphasis on wisdom rather than knowledge alone the advancement of a truly democratic culture and the overriding importance of community in human flourishing This remarkable collection of articles from leading international scholars includes the hitherto unpublished John Macmurray lecture Learning to be Human and brings together invited contributions from a range of fields and disciplines e g philosophy of education moral philosophy care ethics history of education theology religious education future studies and learning technologies and a number of countries across the world e g Australia the UK and the USA Countering overemphasis on technique and its typical separation from wider human purposes emblematic of much of our current malaise this book asks what it might mean to take the education of persons seriously and how such a perspective helps us to form judgments about the nature and worth of contemporary education policy and practice This book was originally published as a special issue of the Oxford Review of Education John Macmurray Frank G. Kirkpatrick, 2005 In this long overdue analysis of Scottish political philosopher John Macmurray Frank G Kirkpatrick traces the influences and development of Macmurray's thought Through his study Kirkpatrick explores the extraordinary resonances of Macmurray's political thought in modern philosophers and comments on his enduring significance **John Macmurray** John E. Costello, 2002 **The Social Self in**

**Zen and American Pragmatism** Steve Odin,1996-01-01 The thesis of this work is that in both modern Japanese philosophy and American pragmatism there has been a paradigm shift from a monological concept of self as an isolated I to a dialogical concept of the social self as an I Thou relation including a communication model of self as individual society interaction It is also shown for both traditions all aesthetic moral and religious values are a function of the social self arising through communicative interaction between the individual and society However at the same time this work critically examines major ideological conflicts arising between the social self theories of modern Japanese philosophy and American pragmatism with respect to such problems as individualism versus collectivism freedom versus determinism liberalism versus communitarianism and relativism versus objectivism      Scottish Philosophy in the Nineteenth and Twentieth Centuries

**Becoming a Human Engineer** Alan Cheville,2023-11-25 Despite the importance of engineering and technology in economic social and other aspects of our lives what it means to develop as an engineer and how this is to occur is not widely discussed Becoming a Human Engineer explores the moral and ethical challenges of educating engineers through the philosophical lens of personalism a branch of philosophy that puts the person first seeing human growth and development as central to good Building from the philosophy of the 20th century philosopher John Macmurray this book explores how ethics and education intersect through a continuous cycle of action and reflection By pulling together disparate and wide ranging topics across engineering education several promising areas of future work are identified Engineering methods and ways of reflection are deeply embedded in engineering education to the extent that they may interfere with becoming a person A focus on specific knowledges must complement rather than distract from developing the habits of mind necessary for

engineers to adapt to a changing world Providing meaningful experiences and explicitly focusing on developing multiple ways to reflect on these experiences are shown to be critical for the holistic development of engineers as persons Not so New Labour Simon Prideaux,2005-03-23 New Labour has concentrated many of its social policy initiatives in reinvigorating the family community and work in the paid labour market But just how new are the ideas driving New Labour s policy and practice In this book Simon Prideaux shows how New Labour has drawn on the ideas and premises of functionalism which dominated British and American sociological thought during the 1940s 1950s and 1960s The book provides an accessible overview of the theories that underpin the policies of New Labour including the often labyrinthine theories of Talcott Parsons Amitai Etzioni and Anthony Giddens examines the ideas of Charles Murray and John Macmurray philosophers publicly admired by Tony Blair looks at the sociological origin of debates and controversies that surround the provision of welfare in both the US and UK and considers the alienating effects that New Deal schemes may have in Britain today Not so New Labour s innovative approach to the analysis of social policy under New Labour will be invaluable to academics students and researchers in social policy sociology politics and applied social studies **Socialism and Religion** Vincent

Geoghegan,2012-03-29 In the past decade philosophers and political theorists have increasingly pondered the role of religion in a modern secular society and of the possible value of religion as a resource for contemporary thinking The global resurgence of a new religious politics graphically symbolised by 9 11 has added a new urgency to this project how is religion to be integrated and if necessary contested in such a time As this study shows the desire to integrate religion into a progressive politics is not new Providing a comprehensive analysis of the Common Wealth movement this work seeks to bring together for the first time the religious and political commitments of four of the leading thinkers in the movement bringing to light the significance of the relationships between them This study examines at four interwar British radicals the philosopher John Macmurray the novelist and sexual theorist Kenneth Ingram the Science Fiction writer Olaf Stapledon and the Liberal M P Richard Acland and examines their attempts to develop a socialism that whilst defending the achievements of the secular age was also sensitive to the virtues of religious traditions Thus it considers Macmurray s attempt to draw on the seemingly antagonistic traditions of Marxism and Christianity Ingram s long struggle to develop a Christian response to deviant sexual behaviour Stapledon s exploration of a non Christian religious spirit and Acland s journey from liberal atheist to Christian socialist It then follows the activities of all four in the radical political movement founded by Acland in the midst of the Second World War Common Wealth particularly focusing on the positions they took in the serious battles over the function of religion that convulsed the leadership of this body This work will be of great interest to scholars of political theory religious studies social and political thought Mission, Communion and Relationship Peter Addai-Mensah,2009 Mission Communion and Relationship addresses the urgent need for the churches in Africa to positively respond to the crisis confronting the continent s young men It calls for the church to commit itself to providing alternatives to the various crises confronting male

youths in Africa dislocation illiteracy streetism unemployment emigration crime imitation of foreign cultures consumerism drug abuse promiscuity and HIV AIDS Mission Communion and Relationship argues that communion and solidarity with male youths is a missiological imperative of the Roman Catholic Church in Africa which must work in concert with other Christian denominations as well as Muslim and African Traditional Religion leaders This interdisciplinary book brings together insights from ecclesiology church history theological anthropology and the social sciences as well as African and Western philosophy with concrete ecclesial and human experiences Mission Communion and Relationship sets forth a framework for dealing with the cultural formation and religious development of male youths in ways that are authentically African and Christian socially oriented and pastorally engaged

**Scottish Philosophical Theology** David Fergusson, 2012-10-05 This volume concentrates on the period from the beginning of the 18th century to the latter part of the 20th It is impossible to depict a single school of philosophical theology in Scotland across three centuries yet several strains have been identified that suggest some recurrent themes or intellectual habits These include the following the mutually beneficial cross fertilisation of the disciplines of philosophy and theology the tendency to eschew powerful philosophical systems that might threaten to imprison theological ideas a stress on both the providential limitations and reliability of human reason a suspicion of reductive theories of a materialist inclination and a determination to inspect critically the proposals of theology and to place these in positive relation to other disciplines

*A Philosophy of Schooling* Julian Stern, 2018-02-19 This book provides an optimistic account of the value and role of schooling Schooling is a common but not universal approach to education and has need of its own distinctive justification in contrast to other approaches such as home based or work based education The book tackles and rejects the various large scale functional theories of schooling which continue to dominate current debates and policies such as schooling supporting employment and the economy or developing citizenship Instead it argues that schooling and schools should be viewed as places to learn community within and through community The lived reality of relationships within schools based on care and curiosity is as strong as ever and upon this foundation is built an original philosophy of schooling This reflective book will appeal to students and scholars of philosophy of education and to all professionals concerned with schools

*German Idealism's Trinitarian Legacy* Dale M. Schlitt, 2016-10-20 Dale M Schlitt presents a study of trinitarian thought as it was understood and debated by the German

Idealists broadly engaging Schelling's philosophical interpretations of Trinity as well as Hegel's and analyzing how these Idealist interpretations influenced later philosophers and theologians. Divided into different sections one considers nineteenth century central Europeans Philipp Marheineke, Isaak August Dorner and Vladimir Sergeyevich Solovyov under the rubric testimonials. Another section studies twentieth century Germans Karl Barth, Karl Rahner and Wolfhart Pannenberg who share family resemblances with the Idealists and a third addresses the work of twentieth and twenty first century Americans Robert W. Jenson, Catherine Mowry LaCugna, Joseph A. Bracken and Schlitt himself whose work reverberates with what Schlitt terms transatlantic Idealist echoes. The book concludes with reflection on the overall German Idealist trinitarian legacy noting several challenges it offers to those who will pursue creative trinitarian reflection in the future.

*The History of Scottish Theology, Volume III* David Fergusson, Mark Elliott, 2019-10-31. This three volume work comprises over eighty essays surveying the history of Scottish theology from the early middle ages onwards. Written by an international team of scholars the collection provides the most comprehensive review yet of the theological movements, figures and themes that have shaped Scottish culture and exercised a significant influence in other parts of the world. Attention is given to different traditions and to the dispersion of Scottish theology through exile, migration and missionary activity. The volumes present in diachronic perspective the theologies that have flourished in Scotland from early monasticism until the end of the twentieth century. The History of Scottish Theology Volume I covers the period from the appearance of Christianity around the time of Columba to the era of Reformed Orthodoxy in the seventeenth century. Volume II begins with the early Enlightenment and concludes in late Victorian Scotland. Volume III explores the long twentieth century. Recurrent themes and challenges are assessed but also new currents and theological movements that arose through Renaissance humanism, Reformation teaching, federal theology, the Scottish Enlightenment, evangelicalism, mission, biblical criticism, idealist philosophy, dialectical theology and existentialism. Chapters also consider the Scots Catholic colleges in Europe, Gaelic women writers, philosophical scepticism, the dialogue with science and the reception of theology in liturgy, hymnody, art, literature, architecture and stained glass. Contributors also discuss the treatment of theological themes in Scottish literature.

*The Spirit of the School* Julian Stern, 2009-02-25. Recent interest in personalized learning and the issues raised by Every Child Matters have led to renewed enthusiasm for the more personal and holistic aspects of schooling. This fascinating monograph draws on empirical evidence from schools across the world to answer key questions such as: What is the spirit of the school? How does it differ from school ethos? What can teachers and pupils do to contribute to the spirit of the school? Drawing heavily on research into learning theories from the social constructivist tradition, community from the philosophy of John Macmurray and dialogue from the philosophy of Martin Buber, Julian Stern's unique and illuminating book will stimulate fresh thinking about spiritual education.
