overview of this renewable platform chemical with growing commercial applications Use of fossil fuels and their derivatives has been one of the major drivers of climate change This ongoing crisis has driven a global search for biofuels and biomass derived chemicals which can serve as the basis for sustainable and renewable industry One such platform molecule is levulinic acid whose derivatives are increasingly replacing traditional fossil derived chemicals The importance of levulinic acid for renewable industry is therefore only growing Levulinic Acid A Sustainable Platform Chemical for Value Added Products provides a book length introduction to this chemical and its derivatives like the levulinates for which applications include fuel additives food and cosmetic preservatives flavors solvents and more The book surveys the production routes and necessary technologies involved in the production of levulinic acid as well as its current and potential applications and typical chemical reactions It provides a critical introduction to a potentially rich source of alternative industrial material Levulinic Acid readers will also find Production routes from different biomass materials Treatment of both organic and inorganic levulinates Extensive discussion of levulinic acid hydrogenation Other derivatives formed upon reaction at the keto functionality Levulinic Acid is the first book on this subject ideal for researchers and industry professionals in green chemistry and sustainable renewable production as well as regulators and policymakers with a focus on the relevant industries

Conservative Politics in France Malcolm Anderson, 2023-10-13 First published in 1974 Conservative Politics in France gives a scholarly account of politics in France from 1880 to the present and explains the way in which the Right has evolved from a collection of weak and transitory political associations to the relatively well organised Gaullist coalition Exciting patterns of interaction between personal careers political events and party organisation have characterised this period War and colonial conflict have brought an end not only to regimes but also to political parties The lingering influences of an aristocracy and bourgeoisie de tradition and the survival of a large peasantry and local social systems preserved peculiar styles of politics The first great wave of party building at the beginning of the twentieth century produced organisations ranging from the doctrinaire anti parliamentary league to the loose electoral association The Fourth Republic saw another wave of party building but only since 1958 has a party emerged which can attract most of the moderate and conservative electorate No other book has attempted to cover this historical period and to give detail accounts of local as well as national political structures This is an interesting read for scholars and researchers of French political history French politics and European politics

Family Law in Action Emilie Biland, 2023-02-01 The right to divorce is a symbol of individual liberty and gender equality under the law but in practice it is anything but equitable Family Law in Action reveals the class and gender inequalities embedded in the process of separation and its aftermath in Quebec and France Drawing on empirical research conducted on their respective court and welfare systems Emilie Biland analyzes how men and women in both places encounter the law and its representatives in ways that affect their personal and professional lives While gender inequality is less pronounced in

Quebec than in France and class inequality is starker in both national contexts inequalities after breakups are driven by the same three mechanisms access to the law and justice interactions with legal professionals and the ways these two factors shape lifestyle and standard of living Family Law in Action is a rigorous but compassionate study that encourages governments to make good on the emancipatory promise enshrined in divorce law
