Ethical Decision Making In Physical Activity Research

**Jacqueline Merchant, Barbara
Griffin, Anne Charnock**

Ethical Decision Making In Physical Activity Research:

Ethical Decision Making in Physical Activity Research John N. Drowatzky, 1996 Can scientific studies that expose subjects to potentially harmful situations be justified if the subjects are volunteers Should students be required to participate as subjects in research projects developed to benefit their professors Can a single set of ethical rules apply to all research situations These and other questions come under scrutiny in Ethical Decision Making in Physical Activity Research Written by a lawyer and physical educator this book explores the important relationship between ethics and the research process The book begins with a discussion of the scientific method and basic parameters of ethical behavior then focuses on ethical concerns that can arise in the following situations The selection and formation of the research question The work of institutional review boards Methodology including the use of human and animal subjects data collection and statistical analysis The presentation of results including publication Measures used to prevent fraud and misconduct Fifteen case studies highlight the text and help readers develop sensitivity toward ethical issues in research and how to think ethically Researchers can use the case studies to help them learn to identify the ethical dilemma in question determine the choices available for resolving the dilemma evaluate the ethics of the actual choice made to resolve the dilemma and decide on the most appropriate course of action The author encourages readers to consider potential ethical issues from the moment the research problem is contemplated until it has been studied and published The book also describes how to discipline fraudulent researchers and proposes how to improve ethical conduct

Research Methods in Physical Activity Jerry R. Thomas, Philip Martin, Jennifer L. Etnier, Stephen J. Silverman, 2023 Research Methods in Physical Activity Eighth Edition offers step by step information for every aspect of the research process providing guidelines for research methods so that students feel capable and confident using research techniques in kinesiology and exercise science disciplines

Research Methods in Physical Activity, 7E Thomas, Jerry R., Silverman, Stephen, Nelson, Jack, 2015-05-21 Research Methods in Physical Activity Seventh Edition systematically guides students through the research process introducing methods and tools specifically for kinesiology and exercise science disciplines including the subdisciplines of physical therapy rehabilitation and occupational therapy The seventh edition leads students and novice researchers to research competency with the distinctive humor that has become a trademark of this internationally recognized text

Research Ethics in Exercise, Health and Sports Sciences Mike J. McNamee, Stephen Olivier, Paul Wainwright, 2006-10-19 This work tackles the question of research design and places ethics at the centre of any comprehensive research project Presenting an overview of current theories of moral action the book guides students and researchers on how to best prepare and present proposals to institutional review boards

Ethics, Disability and Sports Ejgil Jespersen, Mike J. McNamee, 2013-10-18 This volume addresses a range of philosophical and ethical issues in adapted physical activity and disability sports participation more broadly It is comprised of a range of essays by international scholars whose backgrounds embrace different traditions of philosophy pedagogy and

adapted physical activity The principal aim of the symposium was to open up and critically explore a range of conceptual and ethical issues and perspectives that have arisen with respect to the engagement of persons with disabilities in a range of physical activity contexts including but not exclusively located in mainstream sporting activities This book was published as a special issue in Sport Ethics and Philosophy

Conducting and Reading Research in Kinesiology Ted A. Baumgartner, Larry D Hensley, Weimo Zhu, Pamela Hodges Kulinna, 2019-10-14 Updated and reorganized Conducting and Reading Research in Kinesiology Sixth Edition teaches students how to conduct their own research and how to read with understanding the research that others in the field have done This text is comprehensive yet practical and understandable incorporating many examples of the application of various research methods and techniques in an attempt to increase students grasp of the research process Written for those students with little research background and those who may not write a master s thesis the text helps readers develop an appreciation for research and an understanding of how different types of research are conducted so they will become good consumers and readers of the research of others Conducting and Reading Research in Kinesiology Sixth Edition will also serve the need of students beginning the introduction to research course knowing they will write a master s thesis or complete a master s project as it highlights the numerous

Qualitative Research Methods in Sport, Exercise and Health Andrew C. Sparkes, Brett Smith, 2013-10-15 Qualitative forms of inquiry are a dynamic and exciting area within contemporary research in sport exercise and health Students and researchers at all levels are now expected to understand qualitative approaches and be able to employ them in their work In this comprehensive and in depth introductory text Andrew C Sparkes and Brett Smith take the reader on a journey through the entire qualitative research process that begins with the conceptualization of ideas and the planning of a study moves through the phases of data collection and analysis and then explains how findings might be represented in various ways to different audiences Ethical issues are also explored in detail as well as the ways that the goodness of qualitative research might be judged by its consumers The book is based on the view that researchers need to make principled informed and strategic decisions about what why when and how to use qualitative forms of inquiry The nature of qualitative research is explained in terms of both its core assumptions and what practitioners actually do in the field when they collect data and subject it to analysis Each chapter is vividly illustrated with cases and examples from published research to demonstrate different qualitative approaches in action and their relative strengths and weaknesses The book also extends the boundaries of qualitative research by exploring innovative contemporary methodologies and novel ways to report research findings Qualitative Research Methods in Sport Exercise and Health is essential reading for any student researcher or professional who wishes to understand this form of inquiry and to engage in a research project within a sport exercise or health context

Management Theory and Practice in Physical Activity Education (Including Athletics) F. Zeigler Earle F. Zeigler, Earle Zeigler, 2010 A new text in management thought theory and practice applied to physical activity education and athletics required justification Management Theory and Practice in Physical Activity Education Including Athletics has been planned primarily for administrators of physical education and athletics at several levels of educational institutions However much that is included here can be very helpful as well to the sport and physical recreation manager in public and or commercial sport and physical activity In other words it is the underlying thought theory and practice that is fundamentally important The twentieth century has been characterized as a transitional one in human history Moving into the twenty first century we start down the path to finding the answer to this assumption At any rate changing times are occasioned by the impact of a variety of social forces on society Additionally such change has its accompanying but often unsteady influence on the professional training of leaders in the large number of fields that make up the society in which such change occurs The caliber of young people recruited into the field within education is paramount as is the way they are prepared for leadership roles as managers teachers coaches performers supervisors or exercise specialists This is OUR responsibility We should carry out these assignments in a way that is comparable to that used in the finest professions

Qualitative Research and Evaluation in Physical Education and Sport Pedagogy Kevin Andrew Richards, Michael A Hemphill, Paul M Wright, 2023-01-30 A practically focused introductory qualitative methods text specific to physical education and activity to guide graduate students and early career researchers through the design conduct and reporting of qualitative research studies with specific references to the challenges and possibilities of the field

Applied Ethics for Sport and Physical Activity Professionals Earle F. Zeigler, 2007 This text is designed to provide the sport and physical activity professional with an introduction to ethical decision making It can apply readily to the reader's personal professional and environmental or societal life if such a division can be established in connection with ethics and morality in one's life pattern In the final analysis of course everything is personal Any new book being recommended for use by a great many people needs solid justification In Applied Ethics Sport and Physical Activity Professionals an excellent case can be made for use of this basic multi phased 1 2 3 4 approach to ethical decision making offered here Faced with the prevailing ethical chaos of the early 21st century and keeping firmly in mind the vital need to preserve our individual freedom and civil

liberties it starts in a relatively simple fashion in Phase One. Actually the three steps offered here might actually do it for the reader and for the author too in most situations. Then it moves progressively and sequentially through Phases Two, Three, and Four that are assuredly desirable but optional. Although it says optional, it is true that using one or more of them could serve to confirm or negate the reader's Phase One decision. Interestingly and importantly, nevertheless, all four phases of this approach to ethical decision making can be carried out successfully by a reasonably intelligent person. Phase Four, a case method technique, can be pursued best in a group discussion of the issue at hand by those concerned. It is argued here, basically for several reasons, that the young person in society today is initially missing out completely on a sound experiential introduction to ethics and morality. This is true whether reference is made to that which typically takes place in the home, the school system, or the church, actually an experience that doesn't take place adequately. In fact, the truth is that typically no systematic instruction in this most important subject is offered at any time. And the author refuses to accept the often heard osmosis stance, i.e., that such knowledge is better caught than taught. In Part I, in an effort to improve the prevailing situation, the reader learns initially how this all came about, how and why such a terrible gap exists. Where previously, for many at least, a relatively strong orthodox religious indoctrination prevailed and was of some help, the situation has steadily deteriorated in our present multi-ethnic secular culture to a point where confusion reigns as to ethical conduct (see Chapters 1-3). This topic will be elaborated still further through a brief narrative explaining how such a confusing miasma came into existence on the topic of ethical values and problems in our society today. Chapter 2: Next, the good and the bad will be explained briefly in historical perspective. In Chapter 3, Next, because this subject can become confusing unless the terms used are understood and one's reasoning is sound elementary reasoning, i.e., informal logic or critical thinking, was planned for Chapter 4, but it is now in the Appendix for ease of reference. So Chapter 4 offers now instead a quick look at six of the major ethical routes or approaches extant in today's confusing Western world scenario. Finally, in Part II, it is explained how a person's ethical outlook should be an implicit/explicit experiential approach that necessarily moves daily from personal to professional ethics. Chapter 5: In Part II, one basic philosophic approach to applied ethics, a three-step one, is offered as Phase One of a total four-phase experiential plan that may be applied to a specific problem-solving ethical situation. Chapter 6: This plan of attack moves sequentially from the time-proven thought of three great philosophers of the past, i.e., it proceeds from Kant to Mill to Aristotle. Then a second, legal or

Research with Children and Young People in Physical Education and Youth Sport Fiona C.

Chambers, Rachel Sandford, Oliver Hooper, Lee Schaefer, 2023-12-04. This innovative book presents a new framework for researchers in the field of physical education and youth sport. By examining the complex interplay between values, voice, and ethics within the research process, it showcases how the CREATE Principles for Research Design can facilitate meaningful research with children and young people. Adopting a design thinking approach and underpinned by principles of youth voice, the book rethinks educational research with children and young people and offers a new framework for the field. With

contributions from leading international experts this book exemplifies how the CREATE Principles for Research Design can be applied in practice across a range of diverse populations and contexts through ten in depth case studies Reflecting contemporary issues in the field such as gender race and ethnicity disability and social disadvantage these case studies take the reader through the process of applying the CREATE principles as a reflective lens through which to consider research design with for youth Designed to support aspiring and experienced researchers alike this book equips readers with valuable ideas and tools to enhance their research praxis and shape meaningful and relevant research with for children and young people

Best Practice Approaches to the Study of Cognitive Functioning and Physical Activity/Sports Antonio Hernández-Mendo, Sidonio Serpa, Jeanette M. López-Walle, Rafael E. Reigal, Oddrun Samdal, 2020-07-29 *Participatory Research in Sport and Physical Activity* Kyle A. Rich, Robyn Smith, Audrey R. Giles, 2024-07-03 This is the first book to focus on participatory research in the context of sport and physical activity It explores the transformative potential of participatory research methods and provides an introduction to the practicalities of doing participatory research in sport and physical activity The book is structured around phases of the research process covering research design data collection data analysis and knowledge mobilization and translation Chapters cover research design topics such as building research partnerships reflexivity and ethical issues methods such as social photo elicitation go along interviews and biographical mapping analytical approaches such as collective memory work and collaborative analysis and knowledge mobilization and translation topics such as podcasting digital tools and peer review Every chapter includes a review of key developments a guide to how that approach can be employed an example from the author s own work and critical reflections on how that approach can shape future research and have an impact on public discourse This book is an invaluable resource for students and researchers working in sport studies the sociology of sport sport and exercise psychology sport management and policy and human movement and health studies more broadly It will be particularly useful for those interested in diverse and inclusive approaches to qualitative research methodologies

Issues in Physical Activity Studies Barbara J. Kelly, 1993 Sport and Physical Activity Jacqueline Merchant, Barbara Griffin, Anne Charnock, 2017-09-16 This authoritative introduction to physical activity applies the main theories models and approaches in health promotion to the field of sport and exercise It draws together the disciplines of psychology sociology physiology and social policy to look at issues affecting the health of individuals of communities and of society as a whole

The Psychology Of Sport, Performance And Ethics Yair Galily, Roy David Samuel, Gershon Tenenbaum, Edson Filho, 2021-04-12 *Psychological Factors in Physical Education and Sport, volume III* Manuel Gómez-López, Carla Maria Chicau Costa Borrego, Marianna Alesi , David Manzano Sánchez, 2024-05-23

The Psychology of Sub-Culture in Sport and Physical Activity Robert J. Schinke, Kerry R. McGannon, 2014-08-21 International Perspectives on Key Issues in Sport and Exercise Psychology is a series of edited books with a global focus which reflect the state of art in areas of current and emerging interest in the study of sport and exercise

psychology Each volume in the series contributes to the better understanding of a key issue facing researchers and practitioners in sport psychology This volume in the series focuses upon the sociocultural issues that challenge and often undermine participation performance and well being in sports Contributors address a number of important issues such as exclusion miscommunication and ineffective practice in sport The book extends the recent interest in culture within sport psychology by using a critical approach to highlight less mainstream sports such as martial arts circus arts extreme sports and dance and it will help sports participants and social scientists to gain an understanding of these marginalized sporting identities By highlighting subcultural contexts with their individual practices and values it is hoped that the volume will promote the goal of achieving a more just inclusive and ethical sport psychology The Psychology of Sub Culture in Sport and Physical Activity will be ideal reading for sport and exercise academics and practitioners advanced students of applied sport psychology and related fields such as sport science critical studies sociology cultural studies and social anthropology

Mental Health in Sport and Physical Activity Robert J.
