**Changing Public Sector Values** Montgomery Van Wart, 2013-10-28 First Published in 1998 The single most important purpose of this book is to create a field of public administration values a field that currently does not exist in a recognizable form Surely values are

discussed significantly and usefully by the fields of ethics management decision making and organization behavior and theory to mention only a few But these discussions are inevitably narrower in scope than is necessary for a true field of values Such a field is needed to help bridge the seeming chasm about discussions of values among the established fields A second purpose of this text is to provide a comprehensive treatment of values A third purpose of the text is to provide a balanced treatment giving all the major schools of thought roughly the same coverage so that their values can be compared as dispassionately as possible A fourth purpose of the book is to make the subject accessible to and interesting for practitioners and students
